

Designed to fit your home. And your life.®

Model DM221

Safe & Sound Audio Monitor

Extended Range

Up to 1,000 feet of range allows you to feel safe and connected to your child while you go about your day.

Soothing Voice

Reassure your baby remotely by speaking to your baby from the portable Parent Unit. It is just like you are in the room with them.

Rechargeable Batteries

Take advantage of the extended range by carrying the Parent Unit with you as you go about your daily activities. Parent Unit can be powered by the AC adapter or from included rechargeable batteries.

Features

- DECT 6.0 digital technology provides crystal clear transmission, eliminating the annoying white noise you hear from analog monitors. The only sounds you hear are coming from your baby.
- Secure Transmission—the signal is digitized and encrypted ensuring that all transmissions between the baby unit and parent unit are private and secure.
- Extended Range—Up to 1,000 feet or range allows you to feel safe and connected to your child while you go about your day.
- Talk back intercom system—remotely communicate to your baby from the parent unit to the baby unit. Soothe your baby from another room or even from outdoors.
- Rechargeable batteries—with up to 18 hours of monitor time, have the freedom to carry the baby unit everywhere you go without the hassle of a power cord.
- Five Level Sound Indicator—Turn the sound down on the Parent Unit and rely on the visual sound alert LED's to indicate sound levels in the baby's room.
- Night Light—the loop on the Baby Unit illuminates to be used as a soothing night light.
- Belt Clip—take advantage of the extended range and rechargeable batteries of the Safe & Sound Audio Monitor by clipping on the parent unit using the built in belt clip.
