OutBack Speakers: MK2

NEW & IMPROVED: Next Generation of Outdoor/Indoor/Bookshelf Speakers

**THE BEST SOUNDING
OUTBACK SPEAKERS YET!**

The OutBack Loudspeakers: MK2 are designed to deliver rich, full sound in extreme environments, such as a backyard, patio, deck, or other areas subjected to temperature shifts and high-moisture exposure. Their high-efficiency design and multiple mounting options allow these speakers to be easily installed on a wall, eave, pole, corner or as a freestanding stereo pair.

With a lineup of four models, the OutBack speakers are equipped with features to ensure durability in any outdoor

conditions. Sealed enclosures, salt-tested marine grade hardware, and aluminum grilles make the OutBack speakers rugged and extremely weather resistant for all-season enjoyment. Drivers with polypropylene cones, rubber surrounds and 1" Teteron dome tweeters deliver full range audio through a wide range of temperatures.

The new and re-voiced line of OutBack Speakers: MK2 includes the 5B45mk2 4", the 5B55mk2 5.25", and 5B65mk2 6.5" stereo pairs, as well as the 5B65Smk2 6.5" Single Point Stereo models. Most models are available in both Black (-B) and White (-W) finishes.

Mounting options

For a greater number of mounting options over previous Russound outdoor speakers, new all aluminum mounting brackets allow for the traditional vertical or horizontal mounting options, as well as providing for mounting in a corner or on a pole. A machined channel in the brackets allows speakers to be suspended by mounting screws for easy installation in hard to access locations. These models also include a foot that installs in place of the bracket, allowing the speaker to sit upright on a bookshelf.
