MULTI-ADJUSTABLE JEEP WRANGLER BRACKET

SALES 800-221-0932

PRODUCT OVERVIEW

The new bracket allows 110 degrees of swing side to side with a 2 1/2 inches of travel at the head of the bracket. The base can also be adjusted on the spare tire bolts with 5 inches of height adjustment to allow for many different types of configurations for a variety of different wheels. The camera included in the kit allows for a wide diagonal viewing angle of 170 degrees with an IP rating of IP67 for a water resistant solution. The camera is made of a high quality metal housing that compliments the durability of the brackets steel design. Powder coating on the bracket finishes up the design to provide a solid, high quality product.
