

Indy ANC

Noise Cancelling True Wireless

TRUE FREEDOM, NO DISTRACTIONS.

Indy ANC is the pinnacle of our Indy true wireless family. In other words, they're loaded with the latest technology. With everything from touch controls to premium Active Noise Canceling to Personal Sound tuning to wireless charging, these are the perfect choice for those of you who like to have it all.

KEY SELLING POINTS

AMBIENT MODE: TAP AND HOLD TO HEAR THE WORLD.

Noise-canceling is ideal for blocking out the world around you. But sometimes, you need to tune into your surroundings. That's why Indy ANC is designed with Ambient Mode. A quick 'tap and hold' of the main sensor lets you hear everything around you. Even have a conversation. When you're done, just repeat the 'tap and hold' to block out the noise again.

LONG-LASTING BATTERY AND WIRELESS CHARGING.

Not only is Indy ANC engineered to deliver extended battery life, it also features a convenient wireless charging case. Just lay it down on a wireless charger (or check out our Fuelbase™ series of charging pads) and juice up your battery without any extra wires. When you're in a hurry, you can get 2 hours of play from just a 10-minute charge.

TUNE FOR YOUR HEARING WITH PERSONAL SOUND IN THE SKULLCANDY APP.

No one's hearing is the same. That's why we want to help you optimize your audio for your unique hearing. Audioto™ technology in the Skullcandy App analyzes the hearing in your left and right ear, then creates a Personal Sound Profile that is used to adjust the audio to optimal levels for your specific hearing. That profile is then stored on your earbuds so you'll experience sounds in your audio that you've never experienced before.

DON'T WORRY, YOU'VE GOT TILE™.

Indy ANC features built-in Tile™ finding technology. If you ever misplace your earbuds, you can easily "ring" them from the Tile App. So what might have seemed lost, is now quickly found.
