

Hesh ANC

Noise Canceling
Wireless Headphones

WIRELESS SIMPLICITY WITH NOISE CANCELING.

Plenty of people drop a lot of coin to flex that they can afford noise-canceling headphones. Hesh ANC is for the rest of us. For those of us more concerned with sharing a great playlist than showing off our status. But don't think you're compromising: Hesh ANC delivers a 4-mic, digital active noise canceling experience that rivals anything out there.

KEY SELLING POINTS

SIMPLICITY PERFECTED.

Hesh ANC is the unrivaled everyday noise-canceling headphone for people who want to keep it simple. They're engineered with just the right amount of added features to make your life a little easier — without a lot of additional technology that you might not need.

EASY, CONVENIENT CONTROLS.

Simple, intuitive buttons let you take calls, adjust volume, change tracks and even activate your device's assistant (like Google or Siri) without ever touching your phone.

COMFORT FOR HOURS.

With an ultralight headband and soft pads that fully surround your ears, Hesh ANC is one of the most comfortable headphones you'll ever put on.

GO-ANYWHERE DESIGN.

Thanks to rugged, innovative hinges that both fold flat and collapse, Hesh ANC easily goes wherever you go.

DON'T WORRY, YOU'VE GOT TILE™.

Hesh ANC features built-in Tile™ finding technology. If you ever misplace your headphones, you can easily “ring” them from the Tile App. So what might have seemed lost, is now quickly found.

TIME-PROVEN SOUND QUALITY.

With powerful 40mm drivers and exceptional acoustics, Hesh ANC features audio quality that has been refined over four generations of constant improvement. The clear, rich sound—combined with active noise canceling—delivers the kind of captivating audio experience that you'd expect for twice the price.

AMBIENT MODE: YOUR BUTTON TO THE WORLD.

Noise-canceling headphones are ideal for blocking out the world around you. But sometimes, you need to tune into your surroundings. That's why we've designed Hesh ANC with Ambient Mode. Two quick presses of a button let you hear everything around you. Even have a conversation. When you're done, just double press again to block out the noise.

LISTEN LONGER WITH 22 HOURS OF BATTERY.

We know: It's hard to remember to plug in all the devices you have in your life. That's why Hesh ANC features a long-lasting 22 hours of battery life. Plus, whenever you get low, the Rapid Charge feature gives you 3 hours of listening time on just a 10-minute charge.
