1. Notes On Installation

The unit is designed for 12V DC negative ground operation system only. Before installing the unit, make sure your vehicle is connected to DC12V negative ground electrical system.

The negative battery terminal must be disconnected before making connections, which can decrease the chance of damaging the unit due to short circuit.

Be sure to connect the color coded leades correctly according to the diagram. Incorrect connection may cause the unit malfunction or damage the vehicle s electrical system.

Be sure to connect the speaker (-) leads to the speaker (-) terminal. Do not connect the left and right channel speaker cables to each other or to the vehicle body.

Do not block vent or radiator panel. Blocking them will cause heat build up inside and may result in fire.

After the completion of the installation and begin to play the unit (including replacing the battery), please press the RESET button on the front panel with pointed objects (such as ball-point pen) to set the unit to initial status.

2. Wiring Diagram
3. Remote Control Description
Basic Operations

Installing the lithium coin battery (CR2025)

● Aim the remote control directly at the remote sensor on the unit

● DO NOT expose the remote sensor to strong light

   (direct sunlight or artificial light)

   WARNING: To prevent accidents and damage

● DO NOT install any battery other than CR2025 or its equivalent

● Store the battery in a safe palce where children cannot reach

● DO NOT charge, decompose,heat up the battery or dispose it in a fire.

● DO NOT poke or pierce the battery with tweezers or similar tools.

● Wrap the battery with tape for insulation when throwing it away for

   keeping it for future use.
