

Package Contents

- O-Ring
- Barrel
- Stopper
- End Cap
- Extension Cable*

* Available cable lengths include: 100ft, 200ft, 300ft

Recommended Use

The CAT6 UL Direct Burial Underground Extension Cable (weather shielded, cUL CMR Riser Rated, UV Treated, Direct Burial Underground) covers the camera's Ethernet connector and the RJ45 plug to provide weather-resistance and protection from dust, dirt and other environmental contaminants.

Note: The outdoor extension cable is weather-resistant. Seal the cap with silicone and/or electrical tape for additional sealing if it will be exposed to precipitation regularly.

Using the CAT6 Outdoor Extension Cable

1. Fit the o-ring around the camera Ethernet connector until it is firmly around the base of the connector.
2. Feed the Ethernet extension cable through the end cap and the barrel as shown above. Connect the cable to the camera Ethernet connector.
3. Twist the barrel securely onto the camera Ethernet connector. The o-ring becomes compressed when the seal is properly tight.
4. Split the stopper to wrap it around the cable between the barrel and end cap as shown above.
5. Push the stopper toward the barrel until it is underneath the teeth at the end of the barrel.
6. Twist the end cap clockwise to secure it onto the barrel. The stopper becomes compressed and will stick out of the end cap slightly when the seal is properly tight.
