

MuscleHook

MULTI-TOOL

GoFit's Muscle Hook Multi-Tool targets the total body for deep tissue muscle recovery. Its unique hook design and hand grips help reach tight muscles with massaging leverage. The relief-pattern of its rolling massage bar kneads sore muscle tissue while the roller-ball end knobs simulate massaging thumbs for total body recovery.

Introduction and Guidelines

IMPORTANT: Please check with your physician before engaging in any kind of exercise or massage therapy program to determine if it is appropriate for you.

RECOMMENDED MASSAGE GUIDELINES

This Training Manual is a reference guide showing a variety of massage usage suggestions. As you put the Muscle Hook Multi-Tool to use for yourself, explore its multiple massage options to help with your individual muscle relief. GoFit's Muscle Hook Multi-Tool is designed for "total body" self massage. It can help you reach all muscle groups to roll out soreness and promote circulation. You decide on the best angle, massage type, and amount of pressure you want to apply for maximum relief. Always start at a level that is comfortable to you.

OVERALL BENEFITS OF USING THE MUSCLE HOOK MULTI-TOOL

- Quick relief to muscular pain and soreness
- Erodes trigger-points while massaging the muscle
- Accelerates the de-stressing process
- Restores and increases your flexibility/range of motion
- Promotes blood circulation and aids in avoiding injury
- Use **pre-workout** to ease tension and improve range of motion for greater performance
- Use **post-workout** to assist with muscle recovery and soreness

Guidelines Continued

BEGINNER: Place, hold or roll on muscle areas that are tight, stiff or sore using **light** pressure for 15 to 20 seconds. Repeat 1 to 2 times per session, or until muscle tissue relaxes or soreness decreases.

ADVANCED: Place, hold or roll on muscle areas that are tight, stiff or sore using **greater** pressure for 30 to 45 seconds. Repeat 3 to 4 times per session, or until muscle tissue relaxes or soreness decreases.

- Do not put pressure directly onto bones

- Do not massage areas of skin irritations or inflammation

- If bruising or discoloring occurs, this is a sign of too much pressure and massage should be discontinued immediately. Too much pressure could cause damage to your tissues.

- To allow for better relaxation and results, take deep breaths in and out
- You may feel some discomfort where you start to massage trigger-points
- Some of these areas may be more tender than others, so apply only the amount of pressure that is comfortable to **you**
- If you feel extreme discomfort, discontinue use of the Muscle Hook Multi-Tool immediately
