CONNECTTM

Smart
LED Light Strip

**QUICK
START GUIDE**

Thank you for choosing the *Energizer*® LED Light Strip. This quick start guide will help you with setup and installation.

Package Includes:

1 – 16 foot LED Light Strip

1 – Smart LED Controller

1 – Power Adapter

1 – Mounting Adhesive

1 – Quick Start Guide

Note: Energizer® Connect devices only work on a 2.4ghz WiFi network.

Before mounting your LED light strip, make sure it is paired and set up in app first.

Pair the Smart LED Light Strip

1

Download the **Energizer**® Connect app from the App Store (for iPhones) or Google Play Store (for Android phones).

Before opening the app, make sure your phone is connected to the WiFi network that your smart LED light strip will be placed on.

CONNECT

1

2

Open the app and create an account by following the on-screen instructions.

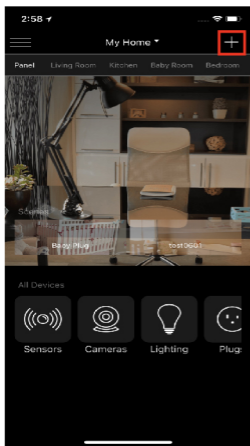

Energizer

2

4

After logging in, click “+” on the top right of the screen and select “Add Device”.

Energizer

4

3

Plug the LED controller into the power adapter and then plug the power adapter into a wall outlet.

Make sure to twist the screw cap on to lock the power adapter to the controller. The connection between the controller and strip has been preconnected and sealed. Please do not remove, the connection pins are very fragile.

Note: The LED light strip should start blinking red rapidly (about 4 times per second) for EZ pairing mode.

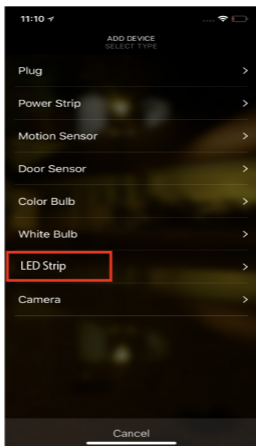

AP MODE	Slowly blinking (about 2 times per second)
EZ MODE	Rapidly blinking (about 4 times per second)

Energizer

5

Select "LED Strip".

6

Confirm that the LED light strip is still rapidly blinking, then click next.

Energizer

6

7

Confirm that the network WiFi displayed is your 2.4ghz WiFi network, enter your WiFi password and click confirm.

Energizer

7

Your smart LED light strip will now be connected to the network. Confirm the settings for your device and then click finish device setup.

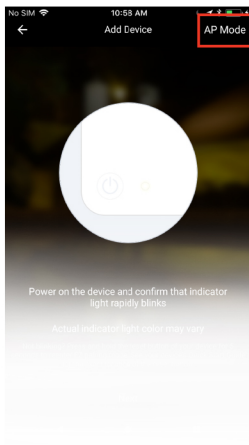

Troubleshooting

If you need to reset or troubleshoot your LED light strip, simply hold down the controller button for 5 -10 seconds.

Pairing Modes:

EZ mode: The device's light is rapidly blinking for easy, quick pairing setup.

AP Mode: Access Point mode is a secondary setup process in which the device's light is slowly blinking and requires multiple steps for pairing. Follow the on-screen step by step instructions.

Installation

- 1) Determine where you will install the LED strip
 - a. Make sure you install close enough to a power outlet (Power adapter cord is 6 feet and controller cable is 3 feet)
 - b. Note: For best mounting results, place adhesive onto desired surface with one attempt. Reapplying multiple times will not guarantee secure mounting onto surface.
- 2) Peel beginning of adhesive off led strip and firmly stick onto surface
 - a. Peel off more of the adhesive cover as you mount the LED strip

- 3) Use included adhesive to stick controller wherever is most useful
- 4) Manually pressing the controller button will cycle the LED strip through a few colors, preset modes or turn off. These settings can be changed in the app.

Energizer

Note: This product has limited outdoor use. Only the LED Light Strip is splash-proof. The controller and power adapter are not.

Do not submerge strip in a pool or place in an area that may become flooded.

FCC Compliance

This device complies with Part 15 of the FCC. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF Exposure Statement

To satisfy FCC's RF exposure requirements, a separation distance of 20 cm or more should be maintained between the antenna of this device and persons during device operation.

To ensure compliance, operations at closer than this distance is not recommended.
