

Description

- **This Mace® gel spray is powered by the hottest pepper allowed by law.**
- **Shoots the furthest distance in its category.**
- **Sticks to the face of your attacker.**

Self defense that sticks

You don't have to worry about wind blowback or misfires. Thanks to gel stream technology, the Mace® Magnum 3 pepper gel allows you to quickly hit the mark and protect yourself against threats from a distance.

- Gel stream technology dispenses as a thick, glue-like substance that sticks to and incapacitates the attacker
- OC pepper gel causes respiratory distress and coughing, impaired vision and an intense burning sensation to the skin
- UV dye leaves a long-lasting residue to support investigation and identification
- This Mace® gel spray contains 20 bursts with a spray range of 18 feet, but always replace use.

Ideal for vehicle defense. Clip it to your sun visor for protection from carjackings and other in-vehicle dangers.

Enhanced control and comfort

Compact and easy to carry, all you have to do is grab your Mace® gel spray and go. And, thanks to reliable safety controls, there's no need to stress about accidental misfires.

- Flip-top safety cap to prevent accidental discharge
- Built-in belt clip for fast and easy access

Always ready

Pepper Gel Magnum 3 is ready if and when you need it. Simply put your thumb under the flip-top safety cap and press down on the actuator button to spray.
