

Self defense that sticks

You don't have to worry about wind blowback or misfires. Thanks to gel stream technology, this pepper gel allows you to quickly hit the mark and protect yourself against threats from a distance.

- Gel stream technology dispenses as a thick, glue-like substance that sticks to and incapacitates the attacker
- OC pepper gel causes respiratory distress and coughing, impaired vision and an intense burning sensation to the skin
- UV dye leaves a long-lasting residue to support investigation and identification

Enhanced control and safety

Simply grab your pepper gel and you're ready go. And, thanks to reliable flip-top safety cap, there's no need to stress about accidental misfires.

Always ready

Pepper Gel Magnum 4 is ready if and when you need it. Simply put your thumb under the flip-top safety cap and press down on the actuator button to spray.
