

COLD STEEL®

ANYTIME. ANYWHERE.

2021

PERFORMANCE

Good looks are important, in knives as much as in life! Perfect fits, clean lines, precise grinds and beautiful polishes all add value and satisfaction when you buy a knife. Often, the true beauty of a knife only becomes apparent when the knife is used!

At Cold Steel,® we believe that all of our knives must perform. We insist all of our knives deliver extraordinary performance for their asking price – “they must deliver their money’s worth”.

In order to achieve this goal, we are vitally interested in all the

elements that are critical to performance. When it comes to the blade, these include profile, thickness, blade geometry, edge geometry, steel and heat treatment. Every one of these factors is studied in minute detail to arrive at the optimum combination for a specific use. If the knife is a folder, we concentrate on the locking mechanism to ensure the strongest, safest construction. For handles, we strive to develop the perfect mix of materials and ergonomics to offer the most comfortable secure grip available. Above all, we TEST what we make! Rigorous testing is the only way to ensure we get the level of performance we demand.

STEEL AND HEAT TREATMENT

SAN MAI®

San Mai® comprises of three layers of expertly laminated stainless steel combined in one blade.

Hard carbon steel is sandwiched between two layers of tough lower carbon spring steel, thus maximizing edge holding ability while still being able to withstand impact and lateral stresses.

Produced in extremely small production runs, San Mai® is used on only our most collectible high-end fixed blades, and is a registered trademark of Cold Steel® worldwide!

AUS 8A

We have been using the same expertly heat treated Japanese AUS 8A steel for nearly 3 decades. This steel has tested amazingly well over the years and has proven to be an excellent steel for working knives – tough, corrosion resistant, with good edge holding and easy to re-sharpen.

1090 HIGH CARBON

1090 High Carbon Steel is an excellent choice for larger fixed blades. It has the ability to take and hold a good edge while remaining more than tough enough to withstand even our most brutal stress tests. It is essentially a good all-around performance high carbon steel that is very forgiving under shock.

SK-5 HIGH CARBON

Japanese high carbon SK-5 is traditionally used for making a variety of hand tools, including chisels and woodcutting saws. With good all-round toughness and excellent edge holding capabilities, as well as excellent abrasion resistance it has stood the test of time and seen use in many countries.

4116 STAINLESS

4116 is a fine-grained stainless steel that’s often used in the pharmaceutical industry and in high end kitchen cutlery. Its carbon and chromium content is balanced for excellent corrosion resistance and strength. Capable of taking a very fine, sharp edge, it makes an outstanding choice for outdoor hunting knives and kitchen-utility applications.

GTS® XHP

Carpenter American GTS® XHP is a high carbon, high chromium powdered alloy steel with impressive edge holding abilities. With an extra fine, uniform grain structure it outperforms its ingot-steel equivalents by a large margin. It has been used in everything from superior custom kitchen cutlery to surgical tools. It can be polished to a beautiful satin finish, making it an excellent choice for high end every day carry knives.

S35VN

An exceptional American super steel, CPM-S35VN is not only very tough and durable but it will take a fine razor sharp edge that will last a long time. An incredibly fine-grained powdered steel with a uniform microstructure, it offers very consistent performance. Durable, reliable, highly corrosion resistant and tough even when honed to a very fine edge, it is a good well rounded steel choice for high-end superior quality custom knives and tools.

AUS 10A

AUS 10A is equal in strength and toughness to AUS 8A, but has the extraordinary advantage of an additional 20% in edge holding ability. This ability to retain a sharp edge for a longer period of time gives it wider performance advantages over other, more common stainless steels.

8CR13MOV

Possessing very similar properties to AUS 8A, 8Cr13MoV is a reliable steel for working knives. This high carbon stainless steel has proven itself to be tough and corrosion-resistant in our tests. Like AUS 8A, it boasts good edge holding and is easy to re-sharpen.

1055 HIGH CARBON

The carbon content and lean alloy of this shallow hardening steel make this a very sturdy material that avoids a lot of the brittleness commonly associated with higher carbon materials. Particularly suited to blades requiring impact resistance, it’s often seen in large fixed blades and swords.

4034SS

A Japanese made medium grade stainless steel that admirably resists corrosion due to its higher Chromium content.

It is also relatively easy to sharpen and features a moderate degree of wear resistance.

Often it is used for kitchen cutlery or for smaller knives that are of a generally good quality but are economically priced.

3-V

Though costly, this modern tool steel is astonishingly tough and exceptionally wear resistant. It’s a fine-grained powdered steel, with a very uniform micro structure, giving it excellent impact resistance and fine edge holding performance, and making it perfectly suited for larger blades where extreme toughness is required.

ANDREW DEMKO

Undoubtedly, Cold Steel® makes the safest, strongest folders on the planet. It’s one of many qualities that separates Cold Steel® from our competitors. Our latest improvement is our patent-pending Tri-Ad® lock. Andrew Demko is the originator of the Tri-Ad’s® novel locking mechanism.

THE “STOP PIN”...

The cornerstone of the Tri-Ad’s® strength, among other subtle refinements, is the inclusion of a new “stop pin” which re-distributes the load of vertical positive and negative pressures on the lock.

The stop pin receives all positive pressure (pressure on the cutting edge) and transfers it into the handle frame and liners where it can be more effectively absorbed.

Negative pressures on the lock produced, for example, by prying, digging, piercing or even abusive spine whacks are redistributed because the stop pin receives the forward pressure from the rocker and transfers it into the liners protecting the rocker and its pivot from failing.

SELF ADJUSTING...

Finally, outside of keeping the lock free from the buildup of pocket lint in the mechanism, the Tri-Ad® lock requires very little maintenance. It’s designed to be self adjusting, in the sense that, over time as parts begin to wear, the Tri-Ad’s® design will allow it to adapt so the locking bar always wedges deeper in the lock channel between the stop pin and the shoulder of the precision cut tang notch. This feature allows for a very safe and secure lock-up.

THE BLADE IS SHOULDERED AROUND THE STOP PIN FOR INCREASED RESISTANCE TO WEAR AND TEAR. THE STOP PIN BUFFERS AGAINST, AND REDISTRIBUTES THE FORCE PRESSURE FROM THE BLADE.

THE FULL SURFACE OF THE LOCK AND BLADE TANG MATE FLUSH TOGETHER. THE SLIGHTLY ANGLED LOCK TENDS TO FORCE THE LOCK INWARDS UNDER PRESSURE INSTEAD OF OUTWARD.

EXTRA SPACE IS PROVIDED TO ALLOW THE ROCKER TO FALL DEEPER INTO THE NOTCH OVER TIME IN RESPONSE TO NORMAL WEAR AND TEAR.

THE ROCKER PIN HOLE IS MADE WITH EXTRA SPACE ON EITHER SIDE TO ALLOW FOR SELF ADJUSTMENT.

TRI-AD® LOCK STRENGTH:

Negative Pressures on the lock are transferred to the rocker, pushing it forward into the blade tang. The stop pin effectively absorbs most of this force and re-distributes it into the frame and liners.

Positive Pressure on the cutting edge is transferred from the stop pin into the handle frame and liners where it can be more effectively absorbed.

FRENZY

Designed by award-winning custom knife-maker Andrew Demko, the Cold Steel® Frenzy takes its inspiration from ancient Japanese Kabutowari – with a thick spine, slender blade, needle-sharp piercing point and a long flat cutting edge.

Made from premium American CPM S35VN steel for superior edge retention, and line-grain satin polished with a deep fuller, the Frenzy's five and a half inch blade is as visually appealing as it is effective, and as it catches the light it's truly a wonder to behold!

The Frenzy's handle is made from multiple layered and 3D CNC Machined dual-tone G-10. It's thin and flat enough to comfortably carry without "printing" while it's expertly designed and ergonomically contoured shape provides both comfort and retention in any grip.

Equipped with the ground-breaking Tri-Ad® locking mechanism for supreme endurance, reliability and safety, the Frenzy is a sleek and stylish mega-folder that takes up very little space in your pocket but snaps open to become a true force to be reckoned with!

TI-LITE® SERIES

Cold Steel's® Ti-Lite® folding knives evoke the sleek speed and rebellious lines of the classic 1950's switchblade. Often imitated, but never equaled, the Ti-Lite® (designed by the late, great Phil Boguszewski) is a masterpiece of performance and style.

The Ti-Lites® are equipped with our stainless steel leaf spring locks (proven, in our tests, to hold upwards of 145 lbs).

For ease of carry, the Ti-Lites® come equipped with a small, but unobtrusive steel pocket clip, and can be opened rapidly by using the thumb studs or by snagging a quillon on the edge of your pocket as you draw your knife out.

STANDARD TI-LITE®

The standard Ti-Lite® (available with 4 or 6 inch blade configurations) features a sharp and strong S35VN bead-blasted blade, and a CNC milled 7075 Aluminum handle which is finished with a protective EDP (Electric Discharge Plating) coating.

MODEL:	4" Ti-Lite®	6" Ti-Lite®

G-10 TI-LITE®

The G-10 Ti-Lite® (available with 4 or 6 inch blade configurations) features an S35VN steel blade and a rich black DLC (Diamond Like) coating for durability and scratch resistance.

The handle is painstakingly 3D CNC machined and milled, providing an incredibly comfortable grip however you choose to hold your knife.

Furthermore, the premium G-10 offers an exceptional strength to weight ratio, rivaling even our aluminum handled model while being a fraction of the weight!

ZY-EX™ TI-LITE®

Our Zy-Ex™ Ti-Lite® (available with 4 or 6 inch configurations) mimics the look of its more expensive counterparts almost exactly – but instead of 7075 Aluminum or G-10, we use 43% glass filled Zy-Ex™ for the handle, and Japanese AUS 8A instead of S35VN for the blade. The resulting knives are extraordinarily lightweight, while remaining remarkably strong, sharp and good looking.

COUNTER POINT SERIES

We spent years exploring high-end boot knives, and now we've applied that knowledge to a folding knife – the Cold Steel® Counter Point. The Counter Point is available in three blade sizes - 3", 4" and 6". Their stiletto-inspired spear point blades have a distinctively pronounced false edge and a lustrous satin finish, combining to make a blade that not only looks great, but delivers a show stopping performance!

The Counter Point is highly corrosion and stain resistant and takes a very sharp and durable edge. The Counter Point's handle is made from Griv-Ex™ and reinforced with heat treated aluminum liners, making it not only very strong, but comfortable and secure in almost any grip imaginable. For added strength and safety, we equipped the Counter Point with our famous Tri-Ad® locking mechanism, proven again and again to be incredibly strong and shock resistant.

RANCH BOSS II

No one works harder than a rancher or a farmer. And their work environment can put a variety of demands on a simple folding knife. But our new Ranch Boss II can meet just about any challenge your work can dish out!

Designed from the ground up for usefulness, durability and effectiveness, it offers a long, sharp, clip point blade that's flat ground out of high carbon steel. Honed razor sharp it folds up into an equally tough handle. Made with faux sawed bone handle scales, and reinforced with tough stainless steel bolsters, it will outlast nearly any brass frame folding knife. What's more, it comes with a stiff back spring (like a slip joint pocket knife) and a stainless steel liner lock, so your fingers will have extra protection.

It's paired with a thick brown leather belt sheath, making the whole package an incredibly affordable bargain.

CRAWFORD MODEL 1

Wes Crawford, the custom knife maker, has been a friend of Cold Steel® for years, so we were happy to collaborate with him on the creation of an inexpensive version of one of his pricey custom "flippers". The result was our new Crawford Model 1.

Strongly resembling Wes's custom knife, the blade features a wide saber grind and a strong, sharp point with plenty of belly for cutting and slashing. It's made from Japanese 4034 Stainless and is hollow ground to a thin, razor edge that will cut at the slightest touch.

And, because Wes's "flipper" is integrated into the tang, it can be opened lightning fast!

The handle of the Crawford Model 1 mimics Wes's original's profile and silhouette but is made from a strong (yet economical), glass reinforced nylon that includes traction rubber inlays, and a low-profile pocket clip.

To keep your fingers safe from potential harm, we have equipped the Crawford 1 with our leaf spring lock, and a (patent pending) secondary safety mechanism that, when engaged is extremely resistant to shock and impact.

WEIGHT: 4.1 oz.

LUZON SERIES

Lynn C. Thompson's love of Filipino Martial Arts encouraged this collaboration with Mike Wallace on the Luzon (LOO-ZAHN) folder. Inspired by several balisongs in Lynn's collection, but functioning as a flipper, the Luzons are a politically correct alternative for those who are unable to legally own balisongs. The Luzon's blades are comprised of 8Cr13MoV Stainless, and expertly hardened to 57-58 Rockwell and feature sharp, strong, points with just enough belly to make them equally useful for cutting and slashing. You'll be dreaming of the Philippines once you experience the Luzon's bamboo-inspired handles, featuring concave segments that offer countless comfortable grip options. Made of glass-filled nylon (GFN), the Luzon's handles are impervious to the elements, and are unlike any handle we've ever made before.

Handsome and budget friendly, and a breeze to flip open, the Luzons are a formidable choice for those going in harm's way. Offering incomparable levels of safety, they're equipped with a sturdy leaf-spring lock and a (patent-pending) secondary safety mechanism that, when it's engaged is extremely resistant to shock and impact. Your fingers will be safe even under the worst conditions. Available in two sizes, both feature a lanyard hole and a pocket clip.

TIGER CLAW

Created by custom knife maker Andrew Demko, the Cold Steel® Tiger Claw is overflowing with design innovations! The blade was designed following Andrew Demko's extensive testing as a Journeyman Electrician and Engineer. When developing his own hand-made knives he made a Karambit-Hawkbill hybrid blade that could cut rope, cable, wire and anything else his vocation threw in his path. This knife served him well through years of hard use, and, when tasked by Cold Steel® to develop his own take on a folding Karambit; this blade shape immediately came to mind.

Replicating Andrew's original blade design in premium American Alloy steel*, the Tiger Claw offers the tactical performance of the Filipino and Indonesian fighting Karambit, coupled with the utility and function of a working man's Hawkbill. With the Demko thumb-plate, the Tiger Claw offers a fully ambidextrous fast draw from the pocket either in a saber grip or a traditional blade-down Karambit grip, deploying the blade with lightning fast ease! Made with his signature minimalist style, Demko's Tiger Claw features a slim CNC machined G-10 handle, a black aluminum pommel ring, and our exclusive Tri-Ad® lock.

BLACK TALON II

The original Cold Steel® Black Talon was a handmade, limited edition folder, featuring a modified curved talon blade* made from Japanese San Mai® steel. It had a sleek titanium frame with G-10 scales and - for its time - a very strong locking mechanism. Our fans begged us to release a revised version of this classic blade, so we happily obliged, with a re-designed knife that we have christened the Black Talon II! A design collaboration between Lynn C. Thompson and Andrew Demko, the Black Talon II features the distinctive down-swept point and pronounced belly of the original, but with satin polished S35VN Steel and a re-designed tip for added durability. The G-10 scales offer maximum retention and grip even in cold or wet conditions while still being kind on your clothing when drawn from the pocket.

Featuring our high performance Tri-Ad® locking mechanism for added safety, this thin, lightweight and eye-catching knife is sure to be the talking point of anyone's collection!

RAJAH® SERIES

A good Kukri is outstanding multi-purpose tool that's able to cut, chop, slice and shear through even the toughest materials.

Designed by custom knife maker Andrew Demko, the Cold Steel® Rajah® series has proven to be both fan favorites and instant classics! Available in two sizes, their unique blade shape presents their thin, flat ground edges at just the right angle so they naturally bite deep, making cuts that way exceed other knives of the same size and weight.

The Rajah® handle also shares similar aesthetic lines and design nuances with traditional Kukris, with the addition of strategically placed curves for optimum grip and control. We've also equipped the Rajah® series with our world renowned Tri-Ad® locking mechanism, which has proven itself again and again to be amazingly strong and shock resistant. Try our Rajah® series today and experience for yourself the power of a Kukri that can fit in your pocket.

SPARTAN

SPARTAN

Designed by celebrated custom knife maker Andrew Demko, our Spartan is one of our most popular folding knives.

The Spartan's super-sharp stonewashed blade is made from AUS 10A Steel, and was designed to echo the aesthetics and cutting performance of the world famous Kukri. Its distinctive Kopsis-inspired handle is precision injection molded out of Griv-Ex™ with heat treated steel liners, and this, in addition to our famous Tri-Ad® lock, makes for a knife that is incredibly safe and secure.

The Spartan also features the patented Demko thumb plate, which can be used to open the knife like a conventional "one handed opener" or be snagged on the edge of a pocket during the draw stroke and opened at lightning speed!

TALWAR FOLDER

A design collaboration between Lynn C. Thompson and Andrew Demko, the Talwar packs an astonishing amount of cutting power into a thin and lightweight pocket knife.

The Talwar folder boasts one of the widest blades available in the industry today. Made from S35VN steel, and almost 2" wide, the blade is beautifully flat ground, with a continuously curved edge, offering cutting potential that has been hitherto unavailable in a folding knife.

The Talwar's textured, ergonomic pistol grip handle is made from premium G-10, with strategically placed integrated finger grooves for both comfort and safety.

For added safety, each of our Talwar knives has our Tri-Ad® locking system; which has proven itself again and again to be the safest lock in the industry.

The Talwar also comes equipped with Andrew Demko's revolutionary ambidextrous thumb plate. Open the knife smoothly and effortlessly with either hand, or draw-snap the knife on a pocket to open the knife at the speed of lightning!

ESPADA® SERIES

The Cold Steel® Espadas® are inspired by the classical Navaja knives of Spain, but are utterly modern in both appearance and materials. A design collaboration between custom knife maker Andrew Demko and Lynn C. Thompson, our Espadas® are available in two sizes to suit both the bold and the boldest of individuals!

Despite their imposing size, our Espadas® are expertly designed to fit comfortably and discreetly in your pocket. You'll soon forget that you are carrying such a large and impressive blade. Equipped with the patented Demko Thumb Plate, the Large and Extra Large Espadas® can be snagged on your pocket, opening the knife as you draw it - and opening in the blink of an eye! The Espada's® beautiful blades are made from premium American S35VN Steel- chosen for its ability to not only take a super-fine cutting edge, but to hold it for an exceptionally long time. They also feature expertly polished G-10 scales and mirror polished 7075 Aluminum bolsters and frame.

Each Espada® is equipped with our patented Tri-Ad® locking mechanism, proven to have amazing shock resistance and strength. In our own notoriously brutal product testing, the XL Espada® was not only capable of holding 600 lbs of free hanging weight, but we even used it to support a hanging engine block!

G-10 Handled Version: Our popular Espada® series is also available in a slim-line, tactical edition. Featuring a hard-wearing AUS 10 steel blade with a stone wash finish and G-10 handle scales.

ULTIMATE HUNTER

A design collaboration between custom knife-maker Andrew Demko & Lynn C. Thompson, the Ultimate Hunter represents the culmination of almost 3 years of design evolution.

Exhaustively field tested on four continents - the Ultimate Hunter has proved its worth time and time again!

Made from American CPM-S35VN, the Ultimate Hunter is flat-ground by hand to a razor edge that will last an amazingly long time.

The heavily bead blasted, CNC machined G-10 handles are comfortably smooth, while still giving a very secure, safe grip.

Equipped with a super-strong Tri-Ad® locking mechanism for extra safety, it's a pure thoroughbred hunting/outdoorsman's blade that also makes an excellent everyday carry knife - practical, functional and incredibly capable!

BUSH RANGER

Longtime Cold Steel® customers may remember the original Bush Ranger, a fixed-blade field knife from years past that was designed by Lynn C. Thompson. One of its major strong-suits was its extremely comfortable handle. Mike Wallace drew inspiration from that knife to create a folding field knife that also feels great in the hand for extended periods of time without causing fatigue. The new Bush Ranger is perfect for the hunter or survivalist who wants something midweight, yet is a real workhorse. While designed for tough work in the field, it's equally at home in a pair of jeans or slacks for everyday carry (EDC). If you like having lots of choices when you carry, the Bush Ranger's got them; from a lanyard hole, to its ambidextrous pocket clip options, and the ability to easily deploy from your pocket thanks to Andrew Demko's patented Thumb Plate. You can be sure your fingers are safe no matter the task at hand, as the Bush Ranger features Cold Steel's® Tri-Ad® lock, the strongest and safest folding knife lock on the market. Featuring a 3 1/2" American-Made S35VN Sheffield clip point blade and a CNC machined G-10 handle, this premium folder will proudly give you many years of service.

MIKE WALLACE

BUSH RANGER LITE

For those intrigued by the Bush Ranger but seeking a budget-friendly folding field knife, Mike Wallace developed the Bush Ranger Lite. With an almost identical 3 1/2" Sheffield clip point blade, the Lite version of the Bush Ranger utilizes durable 8Cr13MoV steel and a thumb stud for ease of opening. As comfort in use is key, the Bush Ranger Lite's handle is comprised of expertly contoured glass filled nylon (GFN) that fits your hand like a glove. With ambidextrous carry options offered through an interchangeable pocket clip, and weighing just 5.2 ounces, the Bush Ranger Lite makes carrying a breeze. As always, safety and security continue to remain priority number one to Cold Steel®, so we supplied the Bush Ranger Lite with a state-of-the-art rocker lock featuring a secondary safety that when engaged is enormously resistant to shock and impact. We're confident you'll agree, the Bush Ranger Lite is an excellent first folding knife or budget-friendly, reliable utility knife for everyday carry (EDC).

DOUBLE SAFE HUNTER SERIES

If you're looking for a budget friendly yet high-performing folding hunter, look no further than the Double Safe Hunter. It's modeled after our extremely popular old-school Voyager®. Its wide, clip-point blade is 3.5" in length and is made of 8Cr13MoV steel, tempered to 57-58 Rockwell hardness.

No matter what job, you can be confident you have the right knife on hand, with a blade small enough for intricate cutting tasks, yet big enough to skin anything from a mouse to a moose. A dream to use for any length of time it has a glass-filled nylon (GFN) handle that is thin and ergonomically pleasing and features a steel pocket clip. It is available with three handle variations: blaze orange, OD green and a distinctive camouflage styled version.

As always, Cold Steel® had your fingers in mind when designing the Double Safe Hunter. Its state-of-the-art rocker lock features a secondary safety mechanism, that when engaged is enormously resistant to shock and impact.

SLOCK MASTER HUNTER

Tim Wells spends more hours in the field hunting than most of us spend doing anything else. And if there's one thing he's learned, it's the importance of a good skinning knife. Especially when you're hungry, wet, tired and your hands are freezing. The Slock Master Hunter is a special Tim Wells version of our Double Safe Hunter. It features his signature red handle, and a custom designed drop point blade (with plenty of belly) that's perfect for all outdoor activities.

RANGE BOSS

Whether you are riding the range in a taxi in Manhattan or riding a horse in Montana, we're sure you're going to appreciate our Range Boss.

Designed to ride all day in your pocket or waistband, it's light and easy to carry. It doesn't take up much room and can be carried virtually unnoticed...until you snap it open.

The Range Boss's clip point blade is flat ground to a thin edge that is so sharp it will astonish you. It is stone washed to resist rust, and its versatility makes it a darn good skinning knife, not to mention food preparation too.

The glass reinforced nylon handle is textured with a stippled pattern for a good grip, and it features our renowned Tri-Ad® lock for superlative strength.

FINN WOLF

A design collaboration between custom knife-maker Andrew Demko and Lynn C. Thompson, the Cold Steel® Finn Wolf is a folding utility and camp knife that draws inspiration from the classic Finnish Pukko.

Equipped with our Tri-Ad® lock for superior safety and security, the Finn Wolf is a folder that you can rely on in even the most uncompromising conditions. Its satin polished Japanese AUS 8A blade is ready to put in long hours and hard work, and with its keen zero ground edge it's a breeze to re-sharpen in the field. With this much performance packed into this comfortable, strong, practical and inexpensive a package, there's simply no excuse not to add a Finn Wolf to your collection today!

4-MAX

The 4-MAX was developed as a collaboration between Cold Steel® and award winning custom knife maker Andrew Demko. It was produced with one clear goal in mind - to deliver a folding knife with the maximum strength and performance possible within a 4" blade limit.

Bridging the gap between production knives and expensive custom offerings, the 4-Max is made to Andrew's exact specifications and from the highest-grade materials. Its extra wide, drop point stonewashed blade is made from S35VN stainless steel, offering a near perfect balance between durability and edge holding performance.

The 4-Max's tumbled titanium liners and back spacers and 3-D CNC machined and bead blasted G-10 handle scales provide even greater degrees of strength!

Equipped with the ground breaking Tri-Ad® locking mechanism, this knife is quite possibly the strongest production folder we have ever produced! The 4-MAX has passed every one of our grueling and torturous shock and impact tests, and then gone on to easily hold over 800 lbs of free hanging weight - with no damage!

If you are looking for a highly collectible mega-folder made with the specifications, tolerances and materials normally only found on a luxury custom knife - then your search is over!

4-MAX SCOUT

The original 4 Max proved to be all that we hoped for. But it was expensive and difficult to manufacture and deliver in a timely manner to meet customer demand.

The 4 Max Scout is easier to produce and is a far more affordable alternative. It features an extra wide, drop point blade and stone wash finish, which is identical to the original 4 Max. It's crafted from 5mm thick AUS 10A steel, for strength, toughness and edge holding potential.

The handle's silhouette mirrors the original. Instead of a G-10 handle the 4 Max Scout has one made of Griv-Ex™ with stainless steel liners and a Griv-Ex™ back spacer.

Equipped with Andrew Demko's ground breaking Tri-Ad® locking mechanism the 4 Max Scout has passed every one of our grueling shock and impact tests and then gone on to hold 600 lbs. of free hanging weight with no damage!

CODE 4®

When developing the Cold Steel® Code 4®, our aim was to create an ultra-thin, ultra-light, highly functional utility knife that is a breeze to carry.

There is great comfort to be gleaned from knowing you are carrying a good knife, and many of our friends in Law Enforcement talk about how they're always looking for that one reliable, lightweight blade that can become a permanent part of their everyday load out. We believe that our Code 4® is destined to become that knife!

It won't weigh down your uniform or provide unnecessary bulk. So it's always there when you need it! Available in a variety of blade configurations, with ambidextrous pocket clips and thumb studs, each Code 4® features sturdy, hard-anodized gun metal grey 6061 Aluminum handles, our world-renowned Tri-Ad® locking mechanism, and high satin polished, razor sharp American CPM S35VN steel blades.

SILVER EYE

The Silver Eye's hand-honed razor sharp blade comes with Andrew Demko's signature

modified Drop point. It has a line grain two-tone satin polish finish - a costly and time consuming process usually seen on expensive custom knives, but it makes the Silver Eye's exquisite grind lines really gleam.

The Silver Eye's ergonomic medium textured Carbon Fiber handle scales give an extremely secure and comfortable grip. Carbon Fiber, with its excellent strength-to-weight ratio, provides a perfect balance between good looks, comfort and class, with impressive durability and all-round toughness.

An extra-long, slimline steel clip (with integrated lanyard hole) allows for comfortable and discreet ambidextrous tip-up carry, while keeping the Silver Eye snugly secure in your pocket.

OYABUN

For years we have thought about making a folding knife that closely emulates our famous Tanto. Andrew Demko worked on the problem, and with Lynn Thompson's input, a satisfactory solution was discovered. The result is what we offer here, the Oyabun!

It incorporates a reinforced blade point, a high satin polish, expert heat treatment (Rc57 and sub-zero quenched), and the kind of stunningly sharp edge Cold Steel's reputation was founded upon. Furthermore, it is equipped with an integral flipper for effortless opening, and a (patent pending) leaf spring lock and safety. The lock/safety on the Oyabun was first utilized in our Crawford 1 folder and has proved to be quite tough and reliable.

The 4034 stainless steel blade is housed in a strong, economical handle that's reinforced with stainless steel liners. The handle is injection molded with a Griv-Ex™ foundation and then over molded with soft, checkered Kray-Ex™ fastened to the frame with two robust bolts.

OYABUN LIMITED

LYNN C. THOMPSON SIGNATURE KNIFE

The Oyabun Limited is a high-end collectible version of our Oyabun. It shares features in common with the standard model in terms of functionality and appearance but differs markedly in the materials used in its construction.

LYNN C. THOMPSON

It also has the value of being a collectible keepsake in that only 3500 have been produced. Each is individually serial numbered, and each box will be personally signed by Lynn C. Thompson himself!

The premium S35VN steel in the blade is a costly powdered steel that is heat treated to Rc 59-60 and sub zero quenched. It has been given an attractive two-tone line grain finish on the blade flats, and a high satin polish on the blade bevels.

Most noticeably, the handle frame is milled from two solid billets of 6061 aluminum to create the bolster and pommel, which have been given a fine mirror polished finish. The handle also features CNC machined G-10 slabs with a diamond checkering pattern for a good secure grip.

AIR LITE SERIES

We know many of our customers are more and more concerned about the weight and "bulk" of their EDC (every day carry) knife as there is a lot of competition for the limited space in their pockets. That's why we focused on making a feather light (3.2 oz) ultra slim (8.8 mm thick) folder that can be carried 24/7 while still leaving room in the pocket for other essential gear.

But what we didn't do in our quest to make a super EDC knife was skimp on workmanship and materials. That's why every Tanto and Drop point blade in our Air Lite series exhibits flawless craftsmanship and premium materials. The blades are made from costly Japanese 10A stainless steel famed for its edge holding ability, strength and toughness and the handles are laser cut from real G-10. Even the locking mechanism can't be beat as there is nothing better than our celebrated Tri-Ad® Lock when it comes to protecting your fingers.

Budget friendly pricing, amazing sharpness, and enormously comfortable and usable, the Air Lites are hard to beat for every day carry!

SR1 SERIES

The Cold Steel® SRK® (Survival Rescue Knife) has been a flagship blade in our line-up for over 25 years. The knife of choice for many in the military, it remains the standard issue fixed blade of the Navy SEALs during BUDS training to this day.

When we asked custom knife maker Andrew Demko to develop a high-end tactical folding knife for military application, he took his inspiration from our SRK®! The SR1 features Andrew's signature minimalist style, without flourishes or embellishments, just pure functional, practical design.

The SR1 and the new SR1 Tanto are made for work. Crafted from American CPM-S35VN premium powdered steel, both are heavy duty work horses, designed for the harshest and unforgiving environments.

A good blade needs a good handle, so the SR1's handle is made from premium G-10 with heat treated nested steel liners. With a coarse-textured surface for a secure grip even in cold, wet conditions, and expertly contoured to allow for a comfortable and safe grip even while wearing heavy gloves.

For added reliability and peace of mind, we equipped the SR1 with our Tri-Ad® locking mechanism - proven over time to weather the worst abuse, with unparalleled shock and impact resistance - making this knife the ideal choice for a survival rescue blade.

TUFF LITE AND MINI TUFF LITE

Tough enough to do the job and light enough to be handy, Cold Steel's® Tuff Lite folders are there when you need them. Perfectly sized to slip into any pocket, clip to your waist band or wear around your neck on a lanyard.

With the wide, hollow, ground blades they are mercilessly sharp and can shear through the toughest materials with unexpected ease. And due to their slanted points, they offer deep penetration and precision cutting potential without appearing aggressive enough to draw unwanted attention.

Both the standard sized version and the mini version are bred for work and offer a surprisingly good grip due to their superbly engineered Griv Ex™ handles that offer a tremendous strength to weight ratio and feature our state of the art Tri-Ad® Lock, which gives them astonishing muscle for their size.

LUCKY

The Cold Steel® Lucky is our modern re-invention of the classic Gentleman's pen knife. Astonishingly lightweight, it barely moves the scale at a little over one ounce, making it utterly effortless to carry. Use the removable pocket clip to wear it with dress pants or lightweight summer slacks, carry it in a shirt pocket or even use it as a tie clip, it is so thin and light you'll forget you even have a knife - but it's always there when you need it! The Lucky's twin blades (one plain edge, one serrated) are made from premium CPM S-35VN steel, securely nestled between two-tone polished carbon fiber scales - and with an RC of 60-61, the Lucky takes a razor edge that will last! Stylish, unobtrusive, elegant and legal almost everywhere in the world, it's a versatile knife that will serve you well, and look beautiful while doing it!

KIRIDASHI

The Kiridashi is the original Japanese utility knife. Traditionally carried in the sleeve pocket of one's kimono by both Samurai and peasant alike. The Kiridashi is now used by practically everyone in Japan from children to master craftsmen! In many ways it's the fixed blade equivalent of the western pocket knife.

Because of its innate practicality, it's used for everything from whittling, carving, paring, and nearly every conceivable cutting chore. Now Cold Steel® has updated this famous classic utility knife by making a folding knife version! Our Kiridashi folder offers a razor sharp classically shaped blade made from 4116 stainless steel that's mated to a handsome, comfortable Griv Ex™ grip that will never rot, crack, warp or mildew. To guard your fingers, it comes with our Tri-Ad® Locking mechanism, proven time and time again to be the strongest, safest locking mechanism available.

Light in weight, thin and handy, our Kiridashi is a joy to carry clipped to a pocket. And it's bargain priced and a tremendous value to boot!

GRIK

Created by custom knife maker Andrew Demko, the GriK is a pocket-friendly, functional utility and every day carry knife.

The GriK's distinctive modified spear point blade is made from expertly heat treated and cryo-quenched Japanese AUS 8A steel for a perfect balance between edge holding and ease of re-sharpening. A shallow indent in the spine of the blade makes a comfortable thumb stop for leverage when doing hard work, or a rest for your index finger when using the tip for precision cutting.

The GriK's two tone line-grain satin polished blade and contrasting black polymer HTR™ thumb ramp make the knife really "pop" - making it as easy on the eye as it is to use.

But it's the GriK's handle that sets it apart! Made from ergonomically contoured GFN with a replaceable and reversible clip, it's an extremely thin and flat low-profile carry that's easy on your pockets and incredibly discreet.

Furthermore, the GriK's polymer clip is comfortable in-hand, negating those "hot spots" that often occur when using a steel-clipped folder for any prolonged length of time. Plus, unlike a steel clip it won't scratch your paint work or tear the leather seats in your car!

Equipped with our Tri-Ad® locking mechanism, that has been proven to offer unsurpassed levels of safety security and strength, the GriK is a tough, practical and functional everyday working tool that you'll find is utterly indispensable.

VOYAGER® SERIES

The Cold Steel® Voyager® series is designed to be the true "everyman" knife. Lightweight, comfortable, super sharp, they are rugged, dependable and perfect for hunting and camping as well as general utility and daily cutting chores. The Voyagers® excel in many survival and rescue applications, and they have proven to be very popular with Police and Military personnel, who appreciate the combination of cutting performance and safety that they offer. They are precision engineered and held to our most exacting standards. Featuring AUS 10A blades, and our Tri-Ad® Locking mechanism - which is quite possibly the most secure, safe and shock resistant lock on the market today!

The ergonomic Griv-Ex™ handles (reinforced with heat treated 6061 aluminum liners) provide great comfort and a secure grip even under extended use in tough conditions.

New Drop Point Voyager® Our new Drop Point Voyagers® are perfect for anyone who wants a big tough folder that's "lower profile" but is ideal for hunting and utility work.

Saber ground, its blade is slightly heavier than most to facilitate cutting and features a strong yet sharp point with lots of belly. It's ideal for the biggest skinning jobs and will make short work of everyday tasks as well.

HOLD OUT SERIES

In many ways, the Cold Steel Hold Out series are ideal "EDC" or every day carry knives - providing the comfort and peace of mind that comes from carrying a high performance folder but in an astoundingly lightweight and easy to carry package.

Their beautiful satin polished S35VN steel blades are extremely functional. They are flat ground from the spine, with a shallow "V" cross-section culminating in a razor sharp hand-honed edge. Continuously curved from the heel to the needle-sharp tip, the blades cut and shear through tough, fibrous material with ease and makes short work of daily tasks and cutting chores.

Available in two sizes, the Hold Outs are incredibly thin and flat, with an ambidextrous pocket clip.

AD-10

If you're planning a big game hunt, a dangerous expedition, or an exciting adventure and want to carry a high-performance folding knife that won't draw unwanted attention look no further than Andrew Demko's AD-10.

Resembling Andrew's massive 4-Max, but reduced in size and weight, the AD-10 features an ultra wide saber ground blade that terminates in a sturdy (yet innocuous) drop point.

Ground thin at the edge and honed to razor sharpness, the AD-10 delivers unprecedented cutting, shearing, and piercing power in a sub 4-inch blade but remains remarkably resistant to bending, breaking or chipping.

The handle of the AD-10 is likewise strong and user friendly, with heat-treated, full-length aluminum liners, 3D machined G-10 scales, and oversized pins and bolts; it fits snugly and securely in the hand due to its precise contouring and integral finger guard.

No folder would be complete without a reliable locking mechanism, so we have incorporated Andrew's famous Tri-Ad® lock. It's been proven over time to be unsurpassed in strength, shock resistance and durability, and offers unrivaled protection for your irreplaceable fingers.

And, to assure lightning quick deployment and convenient carry, we have equipped the AD-10 with an ambidextrous thumb stud and dual pocket clips.

WEIGHT: 6.9 oz.
THICK: 3.8mm

AD-15

The AD-15 might be the most comfortable, user friendly, sub 4 inch tactical folder we've ever made! Modeled after Andrew Demko's patented original, it offers ambidextrous operation and opens and closes with one hand.

The saber ground spear point blade comes with a false edge and includes jimping on the spine to assure great piercing ability and edge control when precision cutting is required.

The AD-15's unique hybrid handle is what distinguishes it the most; because it features Andrew's famous Scorpion Lock. You see, the bottom portion of the handle has 3D-machined G-10 scales mated to steel liners, while the upper portion of the handle, called the "yoke" is crafted from a 3D-machined 6061 aluminum billet that includes an integral back spacer which conceals a strong compression spring. To open the knife, simply engage the thumb stud and watch the yoke rise up, until it falls snugly into a deep notch cut in the blade's tang. Held securely by constant pressure from the spring and, supported by the strength of one's grip, the Scorpion Lock is virtually immune from failure!

AD-15 LITE

We think the AD-15 is worth every penny we ask for it, but we realize its price tag might be out of reach for many fans who would like to own one. Well, the AD-15 Lite is the economical ver-sion those AD-15 enthusiasts have been waiting for.

Identical in look, style and construction, to the original, the AD-15 Lite features a blade made of Japanese 10A steel and an injection molded Griv-Ex™ handle instead of the costly 3D CNC machined grip that is used on the standard AD-15.

AK-47®

The Cold Steel® AK-47® has proven to be exceptionally popular with Military personnel and Law Enforcement professionals, and with good reason! It features a solid 6061 Aluminum pommel and an American CPM-S35VN Steel blade, vacuum heat-treated and sub-zero quenched for maximum toughness, and hollow ground for an edge that has to be felt to be believed.

The AK-47® blade is also DLC (Diamond Like) coated for superior corrosion and abrasion resistance. It has a high quality G-10 handle that offers a secure grip even when wearing thick gloves or working in cold or wet conditions, plus, it is equipped with our Tri-Ad® lock.

The Tri-Ad® is arguably the world's strongest locking mechanism. With a rock-solid lock-up and extreme shock resistance - two features of particular concern to our modern Military, who require dependable tools for the worst possible situations!

Finally, to assure fully ambidextrous and fast deployment, each AK-47® features our patented thumb plate, allowing the knife to be drawn and simultaneously opened by snagging it on the edge of a pocket.

AMERICAN LAWMAN®

Cold Steel's® American Lawman® is named in honor of, and expressly designed to serve, our brothers and sisters in Law Enforcement. This rugged knife is designed to perform in the most extreme environments yet still remain comfortable to use and easy to carry. The drop point blade is big and sharp enough for almost any task yet remains "Civilian Friendly" in appearance. Made from high performance American CPM S35VN steel and flat ground to a thin, hand-polished edge, each blade is also DLC (Diamond Like) coated for added endurance and corrosion resistance.

The Lawman's handle is also designed to be as versatile and user friendly as possible. Made from G-10, it is contoured for grip security in even the worst conditions.

A lock failure on your folder is incredibly dangerous - but if the lock fails on a police officer's

knife in the line of duty, it could be disastrous! That's why we have equipped the American Lawman® with our Tri-Ad® locking mechanism. Designed to withstand terrific impact forces and shock, it has passed some of the most gruesome torture testing in the industry.

CLICK-N-CUT SERIES

The issue most people have with a utility knife is weakness. Weak locking mechanisms, thin brittle blades, and an inability to do hard work. Cold Steel® has addressed this problem and created a utility knife that's all about strength. And, it's affordably priced!

The Click-N-Cut, (patent pending) features elements that are based on our extremely strong, Tri-Ad® lock, so it's built for strenuous cutting chores. It comes complete with three interchangeable blades. There is a drop point blade and serrated and plain edged versions of our utility blade. The blades are double the thickness of most blades on the market, so they can stand up to the most strenuous cutting, scoring, scraping and gouging tasks you can imagine.

Exchanging a blade is easy. The handle has a lock bar release, similar to the release on a folding knife. When the lock bar is pressed the blade slides easily out. Keep the lock bar pressed and slide a new blade in and release the lock bar and the blade will "click" into place.

The Click-N-Cut includes a belt sheath that will hold the knife with one of the blades installed and it has integral pockets for the two remaining extra blades. Extra replacement blades are also available for purchase separately.

CLICK-N-CUT HUNTER

The Click-N-Cut's popularity has made it something of an imperative to create specific variations. The new Hunter's model has a blaze orange handle and comes complete with three blades designed for a hunter's needs. There is a Bowie blade, for sticking and skinning, a gut hook blade for field dressing and our standard serrated utility blade for general chores.

CLICK-N-CUT SLOCK MASTER SKINNER

Our good friend, Tim Wells of Relentless Pursuit TV show fame was so impressed with our Click-N-Cut we said why don't we make a Slock Master model so we did. It has Tim Wells' signature red handle and his distinctive logo, and comes with three blades. There is a clip point blade, a serrated utility blade, and a caping blade that can prep a trophy in the blink of an eye.

CLICK-N-CUT FOLDER

Most, if not all, replaceable blade knives share the same common failings. Their blades are thin, narrow, brittle and puny! And if they fold their locking mechanisms are egregiously weak!

Now Cold Steel® introduces a folding knife with 1.5 mm thick interchangeable blades, and has the value of a sufficiently strong locking mechanism. Like our Click-N-Cut knives, it incorporates elements of our strong Tri-Ad® lock for superior strength.

It comes with a drop point blade and a serrated utility blade. Both blades can be re-sharpened with little effort or discarded and easily replaced.

Installing or changing a blade is simple. With the blade open, just depress the lock bar and fold the blade down about 70° and slide it out. Click in a new blade and you're back in business! Simple, economical, and astoundingly practical!

BIRD & TROUT

MASTER HUNTER®

Without a doubt, the Master Hunter® is one of the finest hunting knives we have ever produced. Available with Japanese VG-1 San Mai® steel, or with American CPM 3-V High Carbon Steel blades, it features a broad blade that's been flat ground to achieve the ideal blade cross-section and edge geometry for hunting application.

Carefully honed to razor sharpness, its edge cuts effortlessly while its dropped point simplifies the chore of field dressing and skinning. The spine of the blade is a full 3/16" thick to allow for the necessary strength and stiffness to field dress and skin the biggest animals. The grip is specially designed to promote long use without fatigue. Made of the shock absorbent, highly tactile Kray-Ex™, it will offer a secure purchase no matter how wet or bloody your hands get. For safety, the Master Hunter® comes in a thick Secure-Ex® sheath that will accommodate just about any size belt and allow you to carry it all day without fatigue.

BIRD & TROUT

The Bird & Trout knife is a much loved, lightweight tool that is enjoyed by hunters, fisherman and outdoorsmen the world over.

Its lightweight one-piece construction and its versatile, ultra-skeletonized sheath make it effortless to carry and a joy to wear all day long. The Bird & Trout's integrated finger ring allows the knife to hang from the finger when not in use, keeping it instantly accessible even when working with cold, wet or bloody hands. Use the bead chain lanyard provided to carry the knife discreetly around your neck, fasten it to your key ring or wallet chain, or utilize a Tek Lok or a Molle compatible adapter (like the offerings by our friends at Blade Tech) to carry the knife on your belt, your L.B.V. or even strapped to a pack.

BIRD & GAME

The Cold Steel® Bird & Game is a must-have lightweight knife that's the perfect option for when weight is truly a factor. Its simple, full tang construction belies a multitude of design nuances that will soon become apparent to any hunter, survivalist or outdoorsman. Simply put, once this knife is in your hand - you'll love it!

Inspired by our much-loved Bird & Trout Knife, and taking design-cues from our Spike series, the Bird & Game is designed for small game use, but is more than capable of processing large game in a pinch. The integral finger ring (coupled with the textured polymer handle scales) allows the wielder to keep a secure grip on the blade, and even let it hang from a finger while working on particularly intricate or delicate tasks.

The Bird & Game's razor sharp Japanese AUS 8A blade has been expertly heat treated for durability, while still being a breeze to re-sharpen in the field.

Weighing in at a meager 1.4 oz., the Bird & Game is an inexpensive, super lightweight hunting tool that can be stowed in a bag or pack, or even hung from a chain around your neck with its Secure-Ex® sheath.

PENDLETON SERIES

Lynn C. Thompson, bought the first knife that custom maker, Lloyd Pendleton ever made in 1973. The two went on to be fast friends, and together they collaborated on some of our most popular and critically acclaimed hunting knives, the Pendleton Series.

PENDLETON HUNTER

The Pendleton Hunter is much loved by the hunting community; it has remained a staple in our collection for many years. Lloyd Pendleton's signature drop point blade makes skinning and field dressing a cinch! The Pendleton Hunter's thick spine, combined with its deep flat grind result in a very versatile point combined with a razor sharp edge. The contoured handle supports a modest guard and thumb stop while still facilitating a wide range of grips for the intricacies of processing game.

The Pendleton Hunter's deeply checkered Kray-Ex™ handle also helps the hunter to retain a secure grip on the knife even when his or her hands are cold, wet and bloody.

PENDLETON MINI HUNTER

Our Mini Hunter pares down a functional hunting knife to the smallest size that practicality allows. Despite its diminutive size and unassuming appearance, this excellent hunting knife is capable of skinning, dressing and processing even large game. The Mini Hunter is an indispensable tool that makes a perfect addition to any hunting pack or survival kit, while being innocuous enough to wear on your hip without drawing unwanted attention. The Mini Hunter comes complete with a tough, weather resistant Secure-Ex® sheath, which locks it safely in place, while remaining light enough to carry 24 hours a day.

MONOLITHIC AXE AND TOOL® FIXED BLADES

Lynn C. Thompson has become enamored with the simple functionality of drop-forged knives. Their solid one-piece construction allows for new levels of strength and durability, and as an avid survivalist, hunter and outdoorsman their bare-bones ruggedness has an undeniable appeal.

These incredibly tough and hard wearing blades have no leather or wood handle to crack, rot or break. They are easy to maintain and to clean, and inexpensive enough that you can afford a spare to add to your hunting pack or bug out bag.

Our Monolithic Axe and Tool® fixed blades are drop-forged (not cheaply cast!) from 52100 High Carbon Steel. Their solid steel bodies are expertly heat treated from the tip of their sharp blades to the butt of their stout handles. Furthermore, each one is ergonomically contoured with a deep trough in the handle for a comfortable and secure grip. Easy to modify and simple to customize, they also make great "project knives" for re-handling, filework, engraving or any other fun modification projects.

DROP FORGED BOOT KNIFE

The Drop Forged Boot Knife is a knife designed for concealed carry.

With a keen double-edged 5" blade and needle sharp tip, it's a substantial and shockingly effective last ditch self-defense tool, but thanks to its slim profile and one-piece construction it carries remarkably flat without "printing". The Drop Forged Boot Knife is strong, sharp, and thanks to its handle-heavy design it has tremendous piercing power.

Each Boot Knife comes complete with a Secure-Ex® sheath and an integral Ulti-Clip™* for superior, reliable retention whether in a boot or clipped to a waistband.

DROP FORGED BOWIE

This addition to our Drop Forged line of knives has total length of 14 inches and features a 9 1/2 inch blade, it shares many of the same attributes of the other knives in the series, including the same robust construction, being forged as a single piece of steel, giving it a startling amount of strength. But, unlike the other Drop Forged knives, it has distinctive faux stag slabs incorporated into the handle.

The blade is flat ground to a moderately thin edge and is then honed to razor sharpness. The point of the blade is acute enough to offer deep penetration, and the balance point is just in front of the guard making it lively in the hand and only slightly blade heavy.

Like the other knives in the Drop Forged Series, it comes with a military grade, Secure-Ex™ sheath that includes a detachable Cordura belt loop.

DROP FORGED HUNTER

Inspired by a solid steel hunting knife by French knife-maker Michel Achez, our Drop Forged Hunter is a no-nonsense hard working outdoor / hunting knife and tool. It features a continuously curved, super-wide blade that is both sharp and strong, and designed to put in great work in even the most demanding conditions. With its handsome and weatherproof dark grey finish and modern Secure-Ex® sheath, the Drop Forged Hunter brings all the best features of a time-honored hunter's knife, but in a thoroughly modern package!

DROP FORGED SURVIVALIST

The Survivalist is the largest of our Monolithic Axe and Tool® knives. It's long, wide blade (inspired by our ever-popular Recon Scout) is designed for military application as well as hunting, survival & bush-craft.

Its razor-sharp edge, steel guard, generous belly, thick spine and stout tip make it an excellent choice for almost any endeavor.

Drop-forged from one solid piece of steel, the Survivalist is unbelievably durable, making it an excellent choice for tactical /military use, emergency preparedness and survival applications.

The Survivalist comes with our versatile military-style Secure-Ex® sheath, giving you a host of comfortable and secure carry options in the field.

DROP FORGED WASP

It's a real challenge to make a double-edged knife strong and tough enough to meet our standards but our new Drop Forged Wasp has exceeded all of our expectations. You see there is nothing to break, become loose or wear out! Its monolithic construction makes the blade, guard and tang one inseparable piece! Only the handle scales are an "add on" and they are quickly and easily replaced in the very unlikely event they break or wear out.

Perfectly balanced with a sturdy yet needle sharp point and wasp waisted so it cuts coming and going. The Wasp is a frighteningly effective knife that's virtually bomb proof! Delivered with a terrific Secure-Ex® sheath. It's light enough to carry all day and sure to last a lifetime if it's given a reasonable amount of maintenance.

DROP FORGED BATTLE RING II

If you're relying on your knife in a self-defense emergency, you shouldn't need to fumble around to access it, or risk having it wrested away. If that's your situation, consider our Drop Forged Battle Ring II.

It's drop forged, like the other knives in this series from a single piece of steel, has twin razor sharp edges with a needle point, an integral guard, and a finger ring. Its grip is sized for nearly any hand, and it's precisely contoured to prevent slipping. It can accommodate eight different grip styles, and it's easy and quick to draw when you're in a hurry. Plus, it has the strength to double as a skull crusher or "iron knuckle".

It comes with a cut resistant, Secure-Ex® sheath that features a state of the art Ulti-Clip™*, making it a steadfast companion you don't want to be without.

DROP FORGED BATTLE RING: EIGHT DIFFERENT GRIP STYLES

52100 HIGH CARBON

52100 High Carbon is a hard wearing steel that's an excellent choice for custom hunting and outdoor fixed blades. Often used by custom knife makers in forged blades that require toughness and wear resistance in unforgiving conditions.

ULTI-CLIP™

*Included as a special feature on the sheath for the Drop Forged Boot Knife, the Drop Forged Battle Ring II, and the Drop Forged Boot Knife.

Made in America from 1075 Spring Steel, the Ulti-Clip™ offers extremely secure retention and increased concealable potential.

MARAUDER®

Honoring the name of Merrill's Marauders - also known as Code name "Galahad", the United States renowned assault unit within the South East Asian Theater of conflict - our Marauder® Bowie is rugged, relentless and reliable.

It features an extra broad, razor sharp blade, with a continuously curved edge, deep wide blade bevels (for added edge toughness) and a formidable clip point.

Suitable for many military, survival and hunting scenarios, the Marauder® is available with a plain or serrated edge style and is equipped with a versatile Secure-Ex® sheath allowing the knife to be fastened comfortably and securely on a belt or pack, or LBV.

PLAIN EDGE

OSS

Much prized by hunters, survivalists, Martial Artists, and our military, the double-edged OSS is almost unbeatable as a thrusting tool. Because its twin edges are honed razor sharp it's no slouch at cutting and is capable of delivering a lightning quick slash in any direction.

OSI

The OSI is a very sturdy, single edged version of our OSS. Flat ground to a thin, ultra-keen edge, it too is an awesome sticker and will cut and slash with equal aplomb! Extensively field tested by Lynn C. Thompson, it has field dressed, skinned and "broken up" dozens and dozens of animals from wild boar to buffalo and proved to be outstandingly efficient field knife. It's also ideal for use in countries or localities that prohibit or restrict double edge knives.

CHAOS® SERIES

Taking inspiration from the classic "Trench Knives" from both World Wars of the last century, we have developed a series of tactical fixed blades that are suitable for the challenges faced by today's modern day warriors. Our Chaos® fixed blades are equipped with unique "D" ring guards, allowing for an incredibly secure and comfortable grip while protecting the hand both from incoming attack and damage while striking or cutting an opponent who's covered in body armor, ammo, flashlights, magazines and gear!

Their tough Secure-Ex® sheaths are Molle-Lok and Tek-Lok compatible with rugged adjustable Cor-Ex belt loops and retaining straps for a secure and reliable lock up when not in use. The Chaos® series combine maximum safety and security with extreme performance and combat potential.

CHAOS® DOUBLE EDGE

Featuring a Tai Pan style blade with twin razor sharp edges, our Double Edge Chaos has a wide spear point blade which is thick enough to resist breaking, but acute enough to offer deep, effortless penetration. It features a 1055 carbon steel pommel, a reinforced 6061 aluminum "D" ring guard, and a full tang, SK-5 High Carbon blade.

CHAOS® BOWIE

Exhibiting an SK-5 High Carbon, extra wide blade and false edge, the formidably intimidating Chaos Bowie is well-suited to thrusting, cutting, and slashing. It also blocks and parries with equal ease. It's saber ground to a sturdy edge and is honed razor sharp. It's a highly affordable bowie and sure to please even the most discriminating warrior.

Like the Chaos Double Edge, it has a reinforced 6061 aluminum "D" ring guard.

CHAOS® PUSH KNIFE

Finally, a D-guard push knife designed from the ground up to thrive in the toughest military and special operations environments.

Made with a broad, double edged blade that's honed to razor sharpness, it cuts, slashes and thrusts like a chainsaw on steroids. But it's the D-guard handle that really makes it unique as it offers unprecedented protection for your hand and fingers.

The handle is injection molded form Griv-Ex™ with Kray-Ex™ over-molds for comfort and shock resistance. It allows for multi-directional percussion blows due to its twin skull crusher pommels, which are removable.

The Secure-Ex® sheath is highly functional and comes with a Cordura belt loop, so the Chaos® Push Knife can be carried at your side at all times.

SAN MAI®

San Mai® comprises of three layers of expertly laminated stainless steel combined in one blade. Hard carbon steel is sandwiched between two layers of tough lower carbon spring steel, thus maximizing edge holding ability while still being able to withstand impact and lateral stresses.

Produced in extremely small production runs, San Mai® is used on only our most collectible high-end fixed blades, and is a registered trademark of Cold Steel® worldwide!

SAN MAI® AMERICAN TANTO SERIES

There isn't a person working in the knife industry today that knows more about the Tanto than Cold Steel® does. It was, after all, Cold Steel® who invented and popularized this knife style in the early 1980's. We have spent millions of dollars persuading the public, both through advertising and live or videotaped demonstrations, of the Tanto's many advantages.

We have been producing Tantos for over 40 years now, and there is still no factory or custom knife maker around making a Tanto that can approach the cutting, slashing or piercing power of one that is manufactured by Cold Steel®. All of our Tantos feature a deep lustrous satin finish on the hollow ground blade bevels and a contrasting line grain finish on the blade flats. This technique highlights our state of the art grinding methods and emphasizes the Cold Steel® Tanto's unique appearance. In addition, the Tantos come with our famous flattened oval Kray-Ex™ handle. The oval shape provides a solid grip and resists rolling or twisting in the hand under hard use, the kind that, over time, would destroy a lesser knife. The use of Kray-Ex™ in knife handles is another Cold Steel® innovation. Kray-Ex™ is an unparalleled space age material that won't crack or rot and is immune to the ravages of bad weather.

The tapered, solid steelommel is another important Tanto feature that should not be ignored. Lynn Thompson designed it to concentrate the full force of a crushing blow in a small area so that even a moderately powerful blow can be remarkably effective in disarming or otherwise incapacitating an attacker.

MASTER TANTO:

This knife features a six inch blade with a specialized guard for increased finger protection.

MAGNUM TANTO II:

Seven and a half inches of cutting power, coupled with the visual impact of a Tsuba-style (Sword) guard and you have perhaps the ideal Tanto.

MAGNUM TANTO XII:

This was created in response to popular demand for a longer Tanto. It has a 12 inch blade length.

SRK®-SAN MAI®

The SRK® in San Mai® features a tremendously strong clip point blade that's fine enough for delicate work, yet possesses enough belly for efficient cutting, slashing and skinning strokes as well. And, at 3/16 of an inch thick, the SRK® offers the sturdiest possible point and edge configuration, without sacrificing sharpness. The SRK's® handle sports a single quillon finger guard and a deeply checkered Kray-Ex™ grip. If you want a knife you can bet your life on, and is reasonably priced, check out our SRK® it's the knife for you.

RECON TANTO-SAN MAI®

Our Recon Tanto continues to redefine the standard for combat knives around the globe. Having seen active military application in numerous conflicts over the last 20 years, it is well on its way to becoming the preferred fixed blade for special military units and even SWAT teams on our own soil. Experience the extraordinary quality - test the distinctive razor-sharp edge for yourself and you will see why the Recon Tanto is a knife you can't afford to be without!

OUTDOORSMAN®-SAN MAI®

Razor sharp, with a wide belly and an up-swept point for skinning, and a secondary bone-breaking edge on the spine for harder harvesting tasks, the Outdoorsman will make short work of even the biggest game.

The Outdoorsman's generous full tang is encapsulated in weatherproof non-slip Kray-Ex™, allowing the knife to be safely used even when your hands are wet and bloody.

TAI PAN®-SAN MAI®

Like its serpent namesake, the Tai Pan® is aggressively fast and deadly. Designed by Lynn C. Thompson in the distinctive "Tanto" style, the Tai Pan® embodies all the best features of a classic dagger while minimizing its shortcomings.

Most daggers are notorious for having thin, fragile points that are easily broken. In contrast, the Tai Pan® features a sturdy spear point which is wide and thick enough to resist breaking without compromising its ability to offer deep, effortless, penetration.

BLACK BEAR CLASSIC-SAN MAI®

This classic sub-hilt design fighter was first developed by Bob Loveless, one of the founding members of the knifemaker's guild. It's perhaps the quintessential combat knife. Its 8" blade offers excellent reach and incredible penetration with very little physical effort. The sub hilt practically eliminates the possibility of the hand being dislodged or coming into contact with the blade. Plus, the sub hilt facilitates rapid and effortless withdrawal after insertion.

The VG-10 San Mai® blade is perfectly heat treated and a double grind is expertly applied. Then the surface of the blade is polished to a beautiful satin finish and the edges are honed and buffed to hair shaving sharpness! The black G-10 scales are fastened to the blade tang by 6 stainless pins and expertly hand shaped and contoured.

TRAIL MASTER®-SAN MAI®

The Cold Steel® Trail Master® represents the culmination of years of development, field testing and modification. Designed by Lynn C. Thompson, it was devised with the aim of becoming the best all-purpose Bowie Knife in the world. From its broad clip point and hand honed, razor sharp blade to its extra sturdy non-slip Kray-Ex™ handle, the Trail Master® is built to perform! The Trail Master® is a rugged Bowie that will be your trusted companion whatever your mission!

RECON TANTO

Over the last 40 years, Cold Steel® has succeeded in establishing the Tanto as a superior blade for combative application. Our pioneering research, development and refinement of this blade shape has proven the value of the "American Tanto" style reinforced point beyond question. Our Recon Tanto continues to redefine the standard for combat knives around the globe. Having seen active military application in numerous conflicts, it is well on its way to becoming the preferred fixed blade for special military units and even SWAT teams on our own soil.

Experience the extraordinary quality - test the distinctive razor sharp edge for yourself and you will see why the Recon Tanto is a knife you can't afford to be without! The Recon Tanto is made in SK-5 steel, and comes complete with a Secure-Ex® sheath.

SRK® (SURVIVAL RESCUE)

Our SRK® (Survival Rescue Knife) was built with one aim in mind, to produce the toughest multi-purpose survival tool in the industry. A knife you can truly trust with your life!

This practical and tactical fixed blade was immediately embraced by the Military and Special Forces community - and issued by the Navy SEALs for B.U.D.S training - who appreciated the SRK's® versatility and durability in even the worst conditions.

This version of our tried and trusted survival rescue knife is made in either SK-5 steel or CPM-3V, and comes complete with a Secure-Ex® sheath.

SRK® COMPACT

Designed expressly for those who want or need a low-profile fixed blade. The SRK® compact is almost a mirror image of its big brother with all the features you have to come to expect. Supplied with a super sturdy Secure-Ex® sheath it's a light weight wonder you will treasure for years to come.

WARCRAFT SERIES

The Warcraft Tanto series represents our latest design concepts for modern military tactical tanto design.

Noticeably thicker than many of the knives on the market today, with tough reinforced tips, elegantly curved cutting edges and sturdy one-piece construction, they will soak up punishment while delivering unprecedented performance in the field. Each of our Warcraft Tantos is made from the highest quality American CPM 3-V steel, with a flat ground primary cutting edge and a chisel ground secondary blade bevel, both hand honed to hair popping sharpness.

The intersection of these two blade bevels (known as the Yakote) forms a wickedly effective secondary point that allows for a devastating snap cut. The larger Warcraft models are DLC coated (Diamond like Coating), and the Medium Warcraft Tanto has a stone wash finish. The thick, full tang, is encased in 3D machined G-10 scales, making our Warcraft series comfortable and secure in hand, and equally at home as a reliable workhorse or life-saving combat knife.

Available in two sizes, the Warcraft is quite possibly the highest quality premium tactical fixed blade in the world today. All come complete with a Secure-Ex® Sheath.

LEATHERNECK SERIES

The Cold Steel® Leatherneck® Series is comprised of two distinct and iconic blade styles, both of which have proven to be exceptionally popular with our brothers and sisters in the armed forces: The Leatherneck®-SF (for Semper-Fi) has a beautiful hand honed saber ground clip point blade, and the Leatherneck® Tanto features our signature Cold Steel® "American Tanto" blade with a stout reinforced tip for extra strength. Both are made from tough D2 Tool Steel with a non-reflective black powder coat finish. To keep the user's fingers from sliding forward onto their keen edge, the Leathernecks® come with a solid steel double quillon guard.

The handles are made of deeply checkered Kray-Ex™ that totally encompasses the Leatherneck's® extra wide, full tang. The Leatherneck's® handle is capped with a thick, machined steel butt cap (not cheap casting or plastic like some others on the market) so they can even double as a hammer in an emergency!

To carry the Leatherneck® knives safely and conveniently, each blade comes complete with a sturdy and versatile military style Secure-Ex® sheath with fully detachable and ambidextrous belt loop.

NIGHTFALL SERIES

Our Japanese San Mai® blades have been a Cold Steel® staple for decades. Coveted by Martial Artists and knife collectors alike, they are still much in demand, but these luxury fixed blades are only produced in very limited numbers. With this in mind, we created the Nightfall Series - Made with the same level of quality and attention to detail as our Japanese classics but trading San Mai® for premium American CPM 3-V powdered super steel. Each of these tough, reliable blades feature a Kray-Ex™ grip and a blade, that's honed to a screamingly sharp edge. All come complete with a Secure-Ex® sheath.

COMBAT CLASSICS: RECON SCOUT IN 3V

In almost every respect, the Recon Scout® is simply a 7 1/2 inch Trail Master® Bowie. Unlike other combat knives, the Recon Scout's® broad clip point is highly resistant to bending or breaking. It's ideal for long range cutting and slashing. Additionally, the blade is equipped with a false edge that measures approximately 3 1/2 inch long.

Like the Trail Master®, the Recon Scout® has a slight curve along the entire length of the blade. This curve allows the blade to be used in a draw cut as well as a chopping stroke. Plus, the extra curve near the tip provides plenty of "belly" for emergency field dressing and skinning.

TRAIL MASTER® IN 3V

Developed as a result of years of field testing, the Trail Master® was designed by Lynn C. Thompson with the goal of creating the best, all-purpose bowie knife in the world. From its broad clip point to its razor sharp blade and durable non-slip handle, it's built for performance.

Popular with hunters, outdoorsmen, and survivalists and military personnel who appreciate a larger fixed blade that can serve multiple roles in hard conditions, the Trail Master® is a rugged work-horse bowie that will be your trusted companion no matter what your mission!

LAREDO BOWIE IN 3V

Awesome is the only adjective that even begins to describe the Laredo Bowie. It features a long, heavy blade made from 3V steel, which is flat ground to produce incredible cutting power and perfect balance. And, as an added bonus, it is given an absolutely ferocious cutting edge that terminates in a dagger sharp point.

To further enhance its versatility and efficiency as a weapon, it sports a four and a half inch long semi-sharpened clip point that helps facilitate the deadly back cut, as well as a wide variety of more conventional cuts and stabbing attacks.

The smooth Micarta handle is as tough as it is beautiful. It is specially contoured to fit the hand like a glove and to provide a positive grip when cutting, chopping or thrusting.

NATCHEZ BOWIE IN 3V

The Cold Steel® Natchez Bowie was born "Under-The-Hill" and takes its pedigree from those seedy taverns and dimly lit streets. Line-bred for battle, it's the definitive Fighting Bowie. Its long blade is perfectly shaped for strength, reach and leverage, and its significant heft is flawlessly balanced, giving it unparalleled liveliness and velocity. Combine all that with its wickedly razor sharp edge and you have a knife that pierces like a dagger, cuts like a razor and chops like a cleaver!

The handle also plays a big role in the overall performance. It has a highly polished double quillon guard, bolster, andommel, and a gorgeous polished black linen Micarta handle. The handle on the Natchez Bowie will easily accommodate a wide variety of gripping methods while serving as a very formidable impact weapon as well.

GURKHA KUKRI PLUS IN 3V

Lynn C. Thompson designed the Gurkha Kukri Plus in conjunction with renowned martial artist Dr. Maung Gyi to be a truly versatile tool that can chop, pierce, slash, and smash with impunity.

The Gurkha Kukri Plus features a 12-inch blade with a narrow point for easier piercing.

The Kray-Ex™ handle offers a secure grip that absorbs the hardest blows, and, there's an integral guard for added security when blocking or parrying!

Check out the absolute superior fit, finish, and above all, sharpness and then put it to work and we are sure you'll agree it is an incredible bargain.

SECRET EDGE

Thin, light, and flat, our Secret Edge is suitable for anyone in the market for an unobtrusive, yet highly effective neck knife.

Unlike its heavier, bulkier rivals, the Secret Edge virtually disappears under clothing and, at 3.2 ounces (with sheath!) it's easy to wear all day. Inspired by the Scottish Skean Dhu, but with modern materials, performance and appearance, the Secret Edge has a flat ground Japanese AUS 8A blade that's wide at the base for cutting power and narrow at the tip to assure effortless penetration.

For secure purchase on such a diminutive blade, the Secret Edge is equipped with highly textured Griv-Ex™ scales and three lightening holes, to allow the handle to hug the palm and resist rolling or twisting in the hand. The Secret Edge also comes with a Secure-Ex® sheath, offering reliable retention without compromising speed of access or deployment.

KYOTO SERIES

As much as we love the massive cutting and piercing power of big, fixed blade knives, there is no denying that wearing one in plain sight will often draw unwanted attention or comments.

Conversely, small fixed blades like our Kyoto knives seem to go unnoticed or, if they do draw attention, they almost always get a "pass" because of their small size and innocuous appearance.

Available in with traditional and reinforced point blade styles, they offer astounding cutting and thrusting potential that belies their modest stature.

The robustly stout blades have wide, full tangs that run the full length of the handle. They are coupled with stainless steel guards and super high traction Kray-Ex™ handles that are stylized to mimic the traditional look of cord wrapped Japanese sword handles.

The slim, comfortable sheath is versatile and will accept a bead chain lanyard, or a Cold Steel® C-Clip, so it can be carried in a variety of ways.

MINI LEATHERNECK SERIES

It is not the size of the dog in the fight that matters as much as the size of the fight in the dog! The Mini Leatherneck Series embodies this saying completely.

Made from 8Cr13MoV steel and offered in three blade styles, each features a stainless steel guard with broad quillons to protect your fingers. The grip is made from Kray-Ex™ and is designed to be reminiscent of our larger Leatherneck models.

These knives come with a tough, sturdy Secure-Ex™ sheath that will accommodate a bead lanyard or a Cold Steel® C-Clip. Best of all they are economically priced.

SUPER EDGE

SUPER EDGE

This rugged little workhorse can cut through tough materials that would make a bigger knife choke!

Its diminutive size and light Secure-Ex® sheath make it a natural for attachment to a key ring, zipper pull, "D" ring or a belt loop. A perfect "EDC" choice.

URBAN EDGE

Our Urban Edge makes a surprisingly versatile and useful everyday utility tool. Its secure grip allows the user to open their hand while still having full control over the knife. Many of Cold Steel's® employees use them regularly - opening boxes, pausing to sign for deliveries or type on computers or tablets - all without the knife ever leaving their hand! Light enough to be worn as a neck knife or hung from a key ring, but still packing enough cutting power to handle tasks that would challenge even some larger knives; the Urban Edge also makes a formidable last resort self-defense tool.

MINI PAL

For a small knife, the Mini Pal™ delivers heavyweight performance!

It has an edge that zips through a host of materials at unbelievable speed. And, since the one inch long blade is razor sharp, it will open delicate packages and envelopes, cut rope or punch through heavy cartons with ease.

Also, the Kray-Ex™ handle totally encapsulates the tang and part of the shaft, for increased comfort and improved control.

URBAN PAL

The Urban Pal should be standard equipment for survival in today's urban jungle! Weighing less than half an ounce, it's perfectly at home unobtrusively carried in a pocket or purse and can be easily attached to a key ring, or hung around the neck.

SAFE MAKER SERIES

Cold Steel® has been making push knives for over a quarter century. We have continually refined our designs, discarding some features and enhancing others.

Our Safe Maker series represents the pinnacle of our learning, experience, testing, and development. The blades, shafts, and 'T' shaped tangs are fashioned from one solid piece of AUS 8A Stainless Steel, and then subsequently vacuum heat treated and sub-zero quenched for added strength and performance and given a stone wash finish. A textured Kray-Ex™ handle encapsulates the tang and part of the shaft for added comfort and security. Available in two sizes; each Safe Maker includes an easily concealable and sturdy Secure-Ex® boot/belt sheath.

KITCHEN CLASSICS

The Cold Steel® Kitchen Classics series feature high performance ice tempered, cryo-quenched and precision flat ground 4116 steel blades for exceptional cutting performance. All models in the series come with a razor sharp edge that lasts and lasts, and some have serrated edges uniquely appropriate to the tasks they were designed to do.

Our Kitchen Classics are available for purchase as single items, or as a complete set. The set includes an attractive oak counter-top stand, one of each of the knives shown here, and 6 steak knives.

The Kitchen Classics feature a newly re-designed handle to ensure a secure, yet comfortable grip. Featuring a stiff Zy-Ex™ core on the inside for durability, with a softer, food-safe Kray-Ex™ exterior for the kind of non-slip grip that must be felt to be appreciated!

More comfortable, convenient and secure in hand, and delightfully easy to clean - the new and improved Kitchen Classics series is better than ever!

OUTDOORSMAN LITE AND TANTO LITE

Following the overwhelming success of our Pendleton Lite Hunter, we decided to make more economical versions of our incredibly popular Tanto and Outdoorsman knives.

They resemble their more expensive counterparts in many ways, (with similar blades, guards and pommels) but featuring 4116 Stainless Steel blades, and newly designed handles. The handles are made in two parts. They feature a Polypropylene guard, pommel, and core section, which envelopes the knives' full tangs. The core is then over-molded in a deeply checked Kray-Ex™ for a non-slip grip that's easily cleaned with soap and water. To carry your knives safely and conveniently in the field, we are including a pouch-style versatile low profile polymer sheath with integral belt loop that can be easily worn on your hip or tucked into your pack or tackle box.

FINN HAWK
WEIGHT: 3.5 oz.
THICK: 2.7 mm
BLADE: 4"
HANDLE: 4 1/2"
OVERALL: 8 1/2"

FINN HAWK®

A design collaboration between Andrew Demko and Lynn C. Thompson, the Cold Steel® Finn Hawk® is the latest in our series of inexpensive hard wearing bushcraft and outdoor tools. Its traditional Nordic styled "Scandi Ground" 4116 steel blade is sub-zero cryo-quenched for superior edge holding potential, with a steep 7.5mm blade bevel and a functional curving belly for skinning and slicing strokes. Furthermore, its 4" blade is more than big enough for most game processing tasks, not to mention for camp chores and food prep too.

The Finn Hawk's® handle is two time injection molded. The first layer of high-impact polypropylene is strong, durable and highly weather resistant, while the outer layer (made of Thermo Plastic Rubber) has a whorled spiral pattern providing a food safe, comfortable and secure grip in even the worst conditions.

The Finn Hawk® is supplied complete with a slim line Secure-Ex® polymer sheath with integrated belt loop.

FINN BEAR

Reflecting its Finnish heritage, the Finn Bear is ideal for use in the great outdoors, and makes an efficient utility knife as well! Its sub-zero quenched 4116 Stainless blade is hollow ground and given an RC of 56-57 so it will hold its edge well while remaining easy to re-sharpen in the field.

The Finn Bear has a sturdy point for piercing and plenty of belly for skinning and carving. It's big and strong enough to skin large game, yet thin and delicate enough to slice a tomato or cut an apple. The durable Polypropylene handle has a modified diamond cross-section that will fit your hand like a glove and accommodate a wide variety of gripping methods. To carry your knife safely and conveniently in the field, we are including a pouch-style versatile low profile polymer sheath that can be easily worn on a belt or tucked into your pack or tackle box.

20PC
FINN BEAR

PENDLETON LITE HUNTER

Our Pendleton Hunters have become enormously popular, and many people have asked us for a more affordable version.

In appearance, the Pendleton Lite Hunter strongly resembles Lloyd's classic functional designs, with a practical drop point blade, modest guard, hollowed bolster area, and a flared butt to aid retention in slippery and inclement conditions. The only major changes were the adoption of subzero cryo quenched 4116 Stainless steel and the use of high-impact polypropylene for the handle. If you are looking for a dependable and award winning hunting / utility knife that will serve you well for years to come - then you would be hard pressed to beat the Pendleton Lite Hunter.

20SPH
PENDLETON LITE HUNTER

CANADIAN BELT KNIFE

The Cold Steel® Canadian Belt Knife takes its inspiration from an old 1950's classic. It has all the features that made the original an award-winning, international favorite plus some modern improvements.

Our contemporary version is made out of sub-zero quenched 4116 stainless steel and ground to an incredibly sharp edge.

Unlike some wooden handles, our durable Polypropylene handle is tough enough to endure hard knocks while remaining light and comfortable to use. This super lightweight 2 ounce blade comes with a secure low-profile polymer sheath, making it a breeze to carry all day or on extended hunting or camping adventures.

20CBL
CANADIAN BELT KNIFE

ROACH BELLY

Historically, the Roach-Bellied knife was a short blade with a pronounced upswept curve and a sharp point that saw popularity in 17th century Britain and the American Colonies. It was most likely named after the common Roach Fish, which had a similarly round curving belly.

Cold Steel's® model is a nod to the Black Powder Community, which has continued to appreciate the Roach Belly's economy, versatility and effectiveness. The blade is made of sub-zero quenched 4116 Stainless steel, expertly heat treated to RC 56-57, and given a sharp edge that's easy to maintain.

Instead of the traditional wood handle, ours is made of a tough injection molded polymer, making the Roach Belly considerably more weatherproof than historical examples - it won't swell, shrink, or rot like its wooden counterparts.

The Roach Belly comes complete with a durable Secure-Ex® sheath, making it a breeze to carry all day or on extended hunting or camping adventures.

AK-47® FIELD KNIFE

Our AK-47® series of blades have set the standard for hard-use tactical folders. A firm favorite with military personnel and special units, these rugged folding knives have seen use all over the world and in several conflict zones. When we decided to explore designs for a multi-purpose fixed blade field knife that would be suitable for military use, we kept coming back to our classic AK-47® design.

Designed by Andrew Demko, the AK-47® Field Knife is enormously sturdy. Expertly crafted from CPM3-V steel, the AK-47® Field Knife is given a stone wash finish from the tip of its beefy saber ground clip point blade through its full tang and integral steel pommel ensuring a hard wearing, super tough surface. Supplied with a versatile Secure-Ex® sheath, the AK-47® Field Knife is the perfect companion for today's modern Military personnel.

MINI TAC® SERIES

Cold Steels® Mini Tac® Neck Knives are so slim and lightweight they can be comfortably worn practically 24 hours a day!

With their rugged Secure-Ex™ sheaths, specially designed to snugly retain the knife while allowing a speedy draw, they can perform as a handy utility or camp blade, every day carry knife or rescue tool. Each Mini Tac® has thin high-quality textured Griv-Ex™ handle scales. This feature allows them to lie flat and close against the body while still providing a positive gripping surface. When these scales are combined with integral sub hilt they give the fingers of the hand incredible purchase and facilitate a remarkably secure grip that resists rolling or twisting.

MINI TAC® TANTO

The Mini Tac® Tanto offers a remarkably wide, stiff blade and a very sturdy reinforced point, making it ideal for piercing even tough, hard objects. As an added bonus, its width allows for a generous hollow ground blade bevel and an extra keen edge, so it can cut almost as well as it pierces.

MINI TAC® BOWIE

A welcome addition to our popular Mini Tac® series, the Andrew Demko designed Mini Tac® Bowie offers the well-known versatility of a sharp, sturdy clip point, making it ideal for use in the field or for everyday carry. Supplied with a Secure-Ex® sheath and steel bead lanyard, it's sure to give you many years of service.

SPIKE SERIES

Our Spike series neck knives are slim, light and super-tough. Their razor sharp, zero ground blades, are made from 4116 Cryo Quenched Stainless Steel and are complemented by heavily scalloped, textured handle scales that offer a comfortable and secure grip. The Spike's ergonomic handles feature Integral quillons that provide a safe stop for index finger and thumb, while deeply textured and sculpted Griv-Ex™ provides excellent positive traction even when your hands are cold, wet and slippery. Available in four distinctive blade shapes (Bowie, Drop Point, Tokyo and Tanto point) they offer all the strength of a one-piece solid steel construction while still being light enough to carry all day without fatigue. Each Spike is supplied complete with a Secure-Ex® sheath that provides excellent retention and safety.

STEEL: AUS 8A

HIDE OUT®

Our Hide Out® was designed as a small, inexpensive and super-functional neck knife. The resulting blade is a true featherweight, weighing a meager 1.5 ounces!

Its high satin polished, double-edged Japanese AUS 8A blade is "Scandi" ground, which makes it very sharp and also very stiff, allowing for a strong and durable tip, despite its sharpness. Its full tang is encapsulated in a weather proof Kray-Ex™ handle that has been designed to be very thin and flat. The handle is subtly contoured and deeply checkered to give the hand great purchase and security on such a small, thin knife, while still enabling effortless transition between grips. A Secure-Ex® sheath and bead chain lanyard allow you to wear this knife discreetly and comfortably all day long.

COMMERCIAL SERIES

For decades now Lynn C. Thompson has spent any of his rare "down time" traveling the world product testing while hunting and fishing. On these exotic excursions, he not only processes the game he kills (which is donated to local communities) but he spends all the time he can spare talking to every butcher, fisherman, hunter or chef he can find in a constant search for new ideas, information or "tricks of the trade".

Our new Commercial Series is the culmination of all those years of accumulated knowledge. Lynn has developed a huge range of versatile blades for commercial users and professionals.

From slaughterhouses and butchers, commercial kitchens and chefs to hunters and fishermen, there are blades for everyone!

Each knife is made from razor sharp 4116 Steel, for ease of re-sharpening at work or in the field. Their handles feature a stiff Zy-Ex™ core on the inside for durability, with a softer, food-safe Kray-Ex™ exterior providing a comfortable non-slip grip for hours of use.

COUNTER TAC SERIES

Our Counter TAC boot knives were designed with one simple philosophy in mind. Functionality. Quite simply - they work, and they excel at what they do! Their stone wash finished, AUS 8A full-tang blades are vacuum heat treated, and sub-zero quenched for strength and durability. The ergonomic design of the Kray-Ex™ handle is comfortable and adaptable to any grip, and the deeply textured surface and double guard will insure that the knife is not likely to slip from your hand under any circumstances. Finally, each Counter TAC is shipped with a state of the art Secure-Ex® sheath, complete with a removable boot/belt clip and lashing slots so you can carry it just about anywhere.

STEEL TIGER®

The Steel Tiger® is a thoroughly modern tactical interpretation of the Indonesian Karambit. A design collaboration between Lynn C. Thompson and the late custom knife maker Steven Likarich, the Steel Tiger® was designed to possess all the best features of this iconic hooked blade and to integrate them seamlessly with modern materials and styling. The Steel Tiger's® deeply curved and needle sharp AUS 8A stainless steel blade is vacuum heat-treated and sub-zero quenched, taper ground and given a stone wash finish for maximum strength, cutting power, edge retention and performance.

The durable Griv-Ex core handle fully encapsulates the tang, emerging to create the bolster, thumb-shelf and distinctive finger ring. This core is then injection over-molded with premium Kray-Ex™, creating a superb, non-slip grip that won't let you down even in when your hands are cold or wet.

For safety and convenience the Steel Tiger® comes with a Military style Secure-Ex® sheath that you can lash to your gear or retain on your person via the removable boot/belt clip.

KOBUN®

The Cold Steel® Kobun® is a lightweight knife that takes its name from the Japanese underworld, where the word "Kobun"® is sometimes used as an indicator of rank that suggests the word "soldier", or one who takes orders from his "Oyabun" or boss. It's a fitting name for a knife like the Kobun®, which was effectively designed to be "a good soldier". Proven to be incredibly popular with the Military, where it's prized for its light weight and discreet profile as much as its durability and cutting potential.

The Kobun® features Cold Steel's® iconic reinforced "American Tanto" point, making it highly resistant to bending or breaking because it is reinforced by the full thickness of the blade's spine (which runs almost to the very tip of the blade). Despite its thin profile, the Kobun's® deeply checkered Kray-Ex™ handle is designed to offer maximum grip and is contoured to resist turning or shifting in the hand.

The Kobun comes complete with a Secure-Ex® sheath and heavy duty boot/belt clip. It is also now available in a fully serrated edge as well.

PEACE MAKER SERIES

If you're in the Military or Law Enforcement; if you ride horses or motorcycles; or live on a ranch or a farm - then the Cold Steel® Peace Maker is for you! Clipped to the top of your boot and covered by your pant leg, these versatile fixed blades are rendered virtually invisible; furthermore, your knife is always easily accessible when you need it. The Peace Makers are astoundingly light and substantially thinner than many of the "tactical" knives available on the market today. The Peace Makers compound-ground blade bevels makes them very easy to re-sharpen, and their stiff, distal tapered points are capable of piercing even thick material. As these inexpensive boot blades offer a wide spectrum of uses - utility, hunting, fishing, emergency rescue and survival and of course self-defense - and our ambidextrous polymer sheaths with custom-made, stainless steel belt clips make them effortless to carry.

WILD WEST BOWIE

Styled like the iconic big blades featured in Western TV shows and movies, our Wild West Bowie is a noteworthy American classic.

The blade is made from 1090 Carbon Steel. It is a long wide blade with weight forward balance and is saber ground and fortified with a false edge to assure maximum cutting, chopping, and piercing power.

The handle has a classic profile, featuring Malaysian Sal Wood scales attached to the full tang with brass screws, and it has the characteristic "S" patterned brass hand guard to protect your fingers and enhance its defensive potential.

The Wild West Bowie is kitted with a traditional black leather sheath that features a brass swivel belt loop and leather leg strap.

BLADE: 12"
HANDLE: 5 1/2"
STEEL: 1085 HIGH CARBON
OVERALL: 17 1/2"

1849 RIFLEMAN'S KNIFE

This rare blade was originally issued in extremely limited numbers, and has the distinction of being the first knife officially designed for, and purchased by, the U.S. Army back in 1849.

Our blade takes inspiration from an antique in the private collection of Lynn C. Thompson, and while our blade is not an exact replica, it features many of the design nuances that make this knife such a classic!

It's big, stout spear point blade is stiff enough to oppose even much larger weapons, making it an ideal complementary knife to carry and use alongside a saber or cutlass. Plus, its beefy 12" blade and solid guard make a more than capable stand-alone blade in its own right! It's easy to see why it was chosen as a back-up blade for our nation's riflemen.

The Cold Steel® 1849 Rifleman's Knife is hand forged from 1085 High Carbon steel, with a solid brass guard and beautiful Malaysian Sal Wood handle scales that encapsulate the sturdy full tang.

The Rifleman's Knife is sold complete with a high quality hand-stitched leather sheath and belt frog, with polished brass throat and chape.

SWORDS

EMPEROR SERIES

Cold Steel's® Emperor Series swords are styled to reflect some of the most distinctive hallmarks of Japanese sword design. We use only traditional materials for our Tsuba (guard), Fuchi (collar), and Kashira (pommel) - Each piece is expertly made and finely crafted in nickel-silver. The Habaki (blade collar) is also hand-made from nickel-silver and the hilt is covered in samé (ray skin) and tightly wrapped in the traditional style with black silk cord.

A beautiful Menuki (a small, ornamental sculpture inserted between the ray skin and the cord wrappings) further enhances the handles appearance.

All of our Emperor swords feature fully sharpened 1060 carbon steel blades that are heat treated to a tough spring temper. The blade is then carefully hand-finished with a beautiful mirror polish applied to the fuller.

DRAGONFLY SERIES

Many Japanese swords offered today are interpretive copies of antiquities from feudal Japan, and they were made for warriors of small stature who seldom rose above five and a half feet. As beautiful and skillfully designed as these swords are, they may not be perfectly suited for the modern warrior, who has grown to be a substantially taller and stronger version of his historical counterpart! With that in mind, Cold Steel® has created the Dragonfly Series - a line of Japanese swords featuring thicker, wider and heavier blades.

These beautiful swords have a distinctive teal-green silk cord-wrap and black samé (ray skin) handles, complementing rich iron furniture with a dragonfly motif.

Their deeply curved and hand polished 1060 steel blades terminate in a long "iris leaf" point for maximum cutting potential.

Additionally, these swords come with two protective bags. A blue cotton travel bag and an intricately decorative display bag made from fine heavy silk brocade.

MIZUTORI® SERIES

The Crane is a symbol of luck and longevity, loyalty and strength, and is a much-loved symbol in Japan.

As we developed a new Katana to add to our long standing and world-renowned line-up of Japanese blades, we felt it only fitting to add the Crane as a motif.

The Mizutori® (Crane) Katana is a high-end, high-performance blade that was inspired by older, practical battlefield Katanas.

Measuring a hair under thirty inches, the Mizutori's® blade is made from high quality Damascus steel and differentially hardened with a clay tempered Hamon. The handsome blade features a hand sharpened Hamaguri grind with highly polished spine and blade flats.

The Tsuba and Menuki both feature an iconic crane motif, and the high quality ray-skin handle is tightly wrapped in brown silk cord, adding a level of detail and beauty that must be seen to be believed.

Housed inside a lustrous black lacquered Saya, the Mizutori® Katana a stunning and attractive sword that is sure to become the pride of your collection!

The Mizutori® (Crane) Wakizashi mirrors the materials, fit and finish of its larger brother in every way except size. It's equally light and fast, and with the same high-quality materials, but at a fraction of the size, making it an exquisite companion piece to the Mizutori® Katana, or a beautiful stand-alone blade.

GOLD LION SERIES

The Cold Steel® Gold Lion Katana represents a Samurai's "every day carry sword" for personal protection, and the defense of his Lord, his family and his home. Significantly lighter than some of our other heavier-duty Katanas, it is not only faster in-hand, but easier and more comfortable to carry when tucked into an Obi and worn all day.

The Katana's Menuki bears the symbol of the Japanese Shisa (Lion Dog) a guardian or protector - a fitting motif for this beautiful lightweight sword.

Measuring just under thirty inches, the Gold Lion Katana's blade is made from expertly hand honed and highly polished Damascus steel, with an Hamaguri grind, peaked Lori Mune spine and undulating clay-tempered Hamon.

The black iron Tsuba, Fuchi and Kashira all have gleaming 24 carat gold leaf accents and the handle features white ray-skin and a black silk cord wrap.

The Gold Lion Wakizashi mirrors the materials, fit and finish of its larger brother in every way except size. It's equally light and fast, and with the same high-quality materials, but at a fraction of the size, making it an exquisite companion piece to the Gold Lion Katana, or a beautiful stand-alone blade in its own right.

WARRIOR SERIES

Since their initial introduction, Cold Steel's® Emperor Series swords have proven to be popular with many of our customers. Still, we are aware that there are some people who want a battle ready sword but hope to find one at a more affordable price.

Our Warrior Series addresses this problem directly. The Warrior Series swords share the same high-performance 1060 steel, heat treatment, and sharpness as their Emperor counterparts, but we have omitted their expensive mirror polishing in favor of a more practical finish. This makes the Warrior Series a perfect choice for training and perfecting cutting techniques (Tameshigiri) without damaging or tarnishing the blade.

SWORD BREAKER

The ancient Chinese Sword Breaker had a rectangular (occasionally hollow ground) cross section with sharp corners making it possible for it to focus a blow with maximum impact. Such a blow could, at the very least, beat an opponent's blade aside or so far "out of line" that recovery in time to mount a defense was virtually impossible. At the most, it could live up to its name and could break, bend or disable conventional swords and many other weapons with a single blow!

We at Cold Steel® drew inspiration for our design from an original antique Sword Breaker we were privileged to handle and study in China. Our handle is made of heavy, dense Rosewood with a fluted cross section that affords a good grip. It features beautifully cast nickel-silver fittings throughout, from the decoratively detailed circular guard to the very stout 5 lobbedommel that effectively counter balances the weight of the blade and makes it easier to wield.

Our Sword Breaker has the traditional rectangular cross section and hollow ground "flats", and comes complete with a Rosewood scabbard that features nickel-silver furniture to match the grip.

JADE LION SERIES

Hand forged and expertly tempered from high-quality Damascus steel, the swords of the Jade Lion Series features subtly patterned blades as sharp as they are beautiful.

The watchful Chinese lion motif is cast in nickel-silver with almost sculptural detail on the heavy guards and pommels. This provides a compelling contrast to the elegant jade green color of the cord wrapped handles and matching rosewood scabbards that are covered in highly polished Samé (ray skin) that's dyed to match the handles.

Jade Lion Gim: The Lion Gim is a civilian self-defense Wen Jian (Scholar's Sword), with a little more panache than the practical versions (like our own Gim Sword) that were made for the battlefield. In our tests it severed and pierced 4" bamboo poles with a single cut or thrust.

Jade Lion Dagger: A perfectly scaled down version of the Gim, it shares the same design, materials and exquisite craftsmanship of its larger counterpart. It's perfectly balanced, big and strong enough to stand on its own or fight alongside its bigger brother.

BATTLE GIM

The Battle Gim is forged from our best Damascus Steel by talented smiths, it features a broad symmetrical point and a slightly wider, heavier blade than custom would dictate. This gives it a more pronounced blade-heavy balance making its twin razor-sharp edges slightly more suitable for cutting and slashing than thrusting.

The attractive Rosewood hilt is framed by a blackened iron guard and pommel. They're embellished with an intricate filigree of traditional Chinese Peony flowers and leaves. The matching Rosewood scabbard is styled in a similar fashion on its chape, throat and ring mounts. Radiantly polished, with twin combat sharp edges, this is not only a vividly striking Gim, but one that you can stake your life on in battle.

GIM SWORD

After extensive study of the history and use of the Wu Jian or "Martial Sword", we decided to make our own battle worthy Gim for serious collectors and practitioners of Chinese Martial Arts. The blade of our Gim is forged from 1060 carbon steel and expertly heat treated. With twin sharp edges and a strong, useful point, the Gim is as elegant as it is effective.

The traditional guard and pommel are made of thick brass and fit snugly on a beautiful Rosewood handle. The Gim Sword comes with a wood scabbard with brass throat, chape and sword rings, so that it can be worn suspended from the belt or slung over the shoulder.

88G GIM SWORD

TWO HANDED GIM SWORD

This type of sword was usually reserved for only the strongest warriors in ancient China, as some specimens weighed over 6 pounds! The long heavy blade cut a wide swath and thus could smash through the defenses of enemy soldiers who were armed with shorter and lighter weapons. It was a natural for defending tight spaces like gates and passage ways where there was room.

Our version is a bit lighter than some of the originals, giving one the option of wielding it with one or both hands.

The battle-tough blade is embellished with a cast brass guard and pommel which are decoratively accented with an intricate relief pattern. The guard and pommel are fitted to an attractive hardwood handle covered with tightly braided cord.

A rosewood scabbard completes the package. It is fitted with decorative brass fittings similar in style to the guard and pommel on the sword.

88THG TWO HANDED GIM SWORD

BUTTERFLY SWORDS

Still amazingly popular with Martial Artists and collectors alike, these iconic Chinese Butterfly Swords are carried in pairs that are cleverly nested together so they appear to be one sword in the sheath. But when they are drawn, they can be separated and wielded in both hands with lightning speed!

Our interpretation of these classical blades are 15" long and 2 5/8" wide. Their pronounced "D" shaped guards have a long forward quillon for deflecting and trapping opposing weapons.

The Butterfly's handsome hardwood handles are covered with braided silk cord to provide a secure and comfortable grip. The perfect gift for Chinese Martial Arts practitioners, and a fine addition to any blade-lover's collection!

WILLOW LEAF SWORD

This is the classic Chinese broadsword used by soldiers and civilians alike from ancient times right up through the 1940's. Its broad, heavy blade is distal tapered to aid balance and perfectly shaped for all cutting, slashing, and chopping strokes.

For ease in handling, it comes with a long, cord wrapped handle as well as a traditional brass guard andommel.

Supplied with a sturdy leather scabbard, it's a battle ready sword you'll be proud to own!

CHINESE WAR SWORD

There are few swords in the world that are more effective than the two-handed Cold Steel® Chinese War Sword.

Over the years we have tested this sword time and time again, and we've consistently cut bigger, tougher and more challenging targets. It remains one of the most popular swords in our line up, and when you see the tests, it's easy to see why!

The Chinese War Sword's cord wrapped grip, "S" shaped guard, and steel ring shapedommel all work in concert to make it a well-balanced sword that's unbelievably fast and agile despite its formidable size. Each sword is hand sharpened and is protected by an attractive heavy leather scabbard.

SWORD CANES

The Sword Cane remains an enduring and romantic personal defense tool that is still popular to this day. The steel blade, safely encased in an innocuous walking stick, can be brought into action at lightning speed!

HEAVY DUTY

The Cold Steel® Heavy Duty Sword Cane is quite possibly the toughest and widest sword cane ever built! It features an extra strong partial crook handle made from heavy duty nylon, and a 2mm thick aluminum shaft that's heat-treated for strength. The tapered shaft is capped with a thick rubber ferrule for better traction on slick, icy sidewalks or uneven terrain. The concealed blade is released by quickly pulling on the handle to break the suction of its friction lock. Made from Stainless Steel with a proprietary heat treatment and tempering, it's a hard and resilient blade that's sturdy enough for both cutting and thrusting.

This is no mere show piece! This Cane conceals a true battle-ready sword, proven in our infamous PROOF videos to make the kind of cuts one would expect from a high quality saber!

QUICK DRAW

Cold Steel® has long extolled the virtues of Sword Canes. These dapper and discreet self-defense tools are non-threatening and just plain stylish. Hiding in plain sight until needed - then they spring into action in a heartbeat!

The Quick Draw features a black aluminum shaft that is lightweight and durable, with a rubber ferrule tip to aid traction when walking on slippery or uneven surfaces.

A short, swift pull on the Griv-Ex™ pistol grip handle will disengage the friction seal and quickly deploy a tapered 8mm thick and 18" long needle-tipped spike!

This "Quick draw" style steel piercing implement is designed for rapid deployment, and when coupled with an ergonomic and intuitive pistol grip, even smaller or infirm wielders can bring this sharp little threat-deterrent into play in a flash!

The Quick Draw Sword Cane is so inexpensive, so good looking, and so easy to use - there's simply no excuse not to add one to your household today!

1911 GUARDIAN I

You can add a bit of 1911 pistol flare to your personal style by carrying our patented 1911 Guardian I Sword Cane. It has a handle that closely mimics the characteristics of a 1911 pistol grip in terms of size, shape and thickness, and it features thin, pebble grain synthetic grips. If you choose, you can modify your cane to your own tastes, because it can accommodate most custom 1911 pistol grips easily.

The tough and sturdy shaft is made from seamless 6061 Aluminum with a 3mm wall thickness. It's heat treated for strength so that it can support heavier loads without breaking. It's also capped with a custom-made rubber ferrule for extra traction, so it resists slipping or sliding on wet, icy or uneven surfaces.

The blade is made from 10 mm thick 420 Stainless steel and is heat treated to a hard, spring temper. It will resist bending or breaking, and thanks to its long needle sharp point, will punch a gaping hole in just about any target! Like our other sword canes, the 1911 incorporates a "friction seal". A quick tug, and the blade will appear, ready for action.

MAN AT ARMS SERIES

The Man at Arms was a stalwart and dependable fighter who exhibited great martial prowess with a range of weapons. He was a capable and competent warrior who was the veteran of many conflicts and was often first into the fray. Although he was not a Knight, he fought and trained alongside them as a brother in arms. To honor these rugged, reliable, salt-of-the-earth warriors we have created a range of true journeyman's weapons that we have called the Man at Arms Collection.

MAA ARMING SWORD

The Arming Sword takes its inspiration from the side arm of choice for many of history's foot soldiers and journeyman warriors. Smaller and more agile than many of the heavier swords on the battlefield, this double edged blade was light

enough to be easily wielded with one hand, and stiff enough to find vulnerable gaps in a knight's plate armor, or burst through his mail!

Our interpretation of this lightning fast fighter's sword is made from expertly heat treated carbon steel and richly blued to an inky black finish. Featuring pronounced upturned parrying quillons, a fluted leather grip, and a counter balancing wheel pommel, the Arming Sword is beautifully balanced, and, with all blued steel fittings, it's good looking too!

The MAA Arming Sword is sold complete with a hand stitched black leather scabbard with a steel throat and chape.

NAME: MAA ARMING SWORD
WEIGHT: 40.2 oz.

MAA MESSER

Designed by Luke LaFontaine and Dave Baker, Cold Steel's® one-handed Messer is a sword that has to be held to be appreciated!

This modern interpretation of the historical German Langes Messer (or Long Knife) is beautifully balanced and a joy to use. Thinner and lighter than

many of our current offerings, it handles almost like a giant Bowie Knife!

Its clip-point style blade is fully sharpened on the primary edge, with an un-sharpened "false edge" terminating in a sturdy upswept point.

The Messer's stylish and functional cross-guard, knuckle bow and pronounced shell-shaped "Nagel" are also blued to match the blade and enhance the Malaysian Sal Wood handle scales.

Complete with a black leather scabbard with blued fittings, this beautiful addition to our Man at Arms series has already become a firm favorite with our crew, and we're sure it will be a popular addition to your collection!

MAA LAFONTAINE SWORD OF WAR

Designed by noted swordsman Luke LaFontaine and bearing his name, the LaFontaine Sword of War combines elements of a 16th Century "Sword of War" with a "Complex Hilt Longsword".

Not carried on a belt or baldric, rather it was held in hand, rested on the shoulder or simply carried by a manservant or page.

Designed primarily for battlefield combat, it was almost as big as a Zweihander or a Great Sword; with a long double edged blade, elaborate ring guards, counter guards and peaked quillons, a closed ricasso for looping a finger through the cross for added control, and a heavy counter-balancing pommel that made a fearsome weapon in its own right!

A versatile and complex weapon with many advantages that should be apparent to any Historical European Martial Artist, it was also a symbol of prestige that said much about the status and prowess of its wielder.

Made in our signature "Man at Arms" style, the LaFontaine Sword of War features a 1055 Carbon Steel blade that has been deeply blued to an inky black sheen.

The LaFontaine Sword of War comes fully sharpened and is supplied complete with a thick leather and steel scabbard.

COLICHEMARDE SWORD & DAGGER

The Colichemarde emerged during the decline of the Rapier and the rise of the small sword.

With a uniquely shaped blade that was extra wide at its forte but then dramatically tapered to a fine needle point. This allowed the sword to be used to parry or oppose even the heaviest weapons, yet remain light enough to be fenced with lightning speed. Cold Steel's® interpretation of this blade closely mirrors the historic original, from extra wide forte to super sharp point. The hilt features a decorative double shell guard, complete with finger loops and knuckle bow, while the grip is completely wire wrapped and capped with a matchingommel. We have also created a matching dagger as an optional companion to this exquisite sword, with a beautifully polished blade, double quillons, and wire wrapped handle.

LARGE PARRYING DAGGER

Right at home in any period between the 15th and 17th century our large parrying dagger would be a prized possession worthy of being handed down through generations. Made to be equally useful for offense or defense it sports a long thick, wide blade that is stout enough to oppose the heaviest sword yet remains capable of piercing the thickest cloth, leather or even chain mail or light plate!

Equipped with extra sturdy down turned quillons and a generous side ring it offers terrific protection to the hand and the forearm from sword and dagger attacks and is very useful for catching and trapping blades as well.

Easily wielded in any direction and with great speed it comes with a period correct wire wrapped handle and a strong steelommel which easily doubles as an impact weapon in its own right.

Delivered fully polished, sharpened and encased in a thick black leather scabbard embellished with a decorative throat and chape it's the parrying dagger you have been waiting for as its advantages are undeniable.

CAVALIER RAPIER

By the mid-1600's dueling was at the height of its popularity. In fact, this trend for settling affairs of honor with steel reached such heights that King Louis XIII of France outlawed dueling for fear of losing too many of his important dignitaries to this dangerous pursuit!

Aristocratic noblemen saw it as their manly duty to defend their honor at sword-point, and as such began not only seeking out the knowledge and training imparted by specialist sword masters, but also exploring new types of weapons to help them gain a decisive edge.

One particular sword began to gain popularity - a smaller, lighter and faster version of the Rapier that was easier to carry and quicker in combat. A precursor to what would eventually become the Small Sword referred to by many simply as the "transitional rapier".

Cold Steel's® interpretation of this blade (which we have named the Cavalier Rapier) features a sharp double edged and needle tipped blade which is decidedly shorter and lighter than a classic Rapier, allowing for much more speed and agility.

With a tempered steel pierced shell guard, rings, quillons and knuckle bow it offers astonishingly good hand protection, while its wire wrapped grip and counter balancingommel give great comfort and liveliness in-hand.

Provided complete with a hand-stitched leather sheath with steel throat, chape and integral belt hook for ease of carry.

RIBBED SHELL SWEPT HILT RAPIER

The Rapier enjoyed a long reign as the civilian weapon of choice for self-defense and dueling for centuries! Its long, double-edged blade was ideal for delivering the point at great distances. Its elaborate hilt (evolving from rings, bars and quillons, to shells, and chiseled cups) offered excellent protection and caught or deflected blows with ease. Sadly, the rapier eventually succumbed to the dictates of fashion and gave way to smaller swords. Our modern interpretation of this historical classic has a long, narrow blade with a single wide fuller to assure perfect balance. Its hilt features a classic ribbed shell and multiple bars, quillons and a knuckle bow for hand protection. The grip is made of wood covered with rich black ray skin and wire and terminates in a heavy ribbedommel that serves as a perfect counter balance to our Rapier's blade.

ITALIAN DUELING SABER

Most military sabers are effective for cutting and thrusting, but they can be heavy and are challenging to wield with precision for any length of time. The Italian Dueling Saber, however, is different! Its long, slim, moderately curved blade is feather light and you can easily write your name in scarlet with its razor edge.

Many years ago, Maestro Ramon Martinez introduced this fiercely effective blade to Lynn C. Thompson, and Lynn was impressed enough to want to produce one for Cold Steel®.

Our Italian Dueling Saber is best described as ornate. The blade, artfully forged, tempered, and polished has an attractive deep scroll etching that is sure to capture your eye, and the intricately pierced guard is made from brightly polished nickel steel. The guard has rolled edges and provides unsurpassed protection for a swordsman's hand and forearm.

The handsome scabbard is made of thick black leather and features a mirror polished and etched throat and chape, with dual carrying rings.

SMALL SWORD

Toward the end of the 17th century, a sophisticated, shorter and lighter version of the Rapier emerged as the tool of choice for personal carry and defense - the Small Sword.

Its stiff, lightweight blade was forged in a triangular cross section, and the hilt was both simple and smartly functional, consisting of no more than an elliptical plate, or two shells and a knuckle guard. Cold Steel's® modern version duplicates the best features of many historical examples, but uses 1060 carbon steel, heat treated to a tough spring temper.

The hilt features two shells with functional finger loops and a light, but strong, knuckle guard. Each Small Sword also comes complete with an attractive leather scabbard with an intricately decorated throat and chape.

TALWAR

Here at Cold Steel®, we have been fascinated with the Talwar for decades, and we have made it our mission to bring the highest quality production version of this historically significant sword to the market. The Cold Steel® Talwar is the culmination of years of experimentation and extensive research.

With its hand-forged and beautifully balanced blade, the Talwar features a solid brass hilt that will accommodate even a large gloved hand. Supplied with an excellent wooden scabbard covered in black leather and fitted at either end with highly decorative brass furniture; our Talwar is a sword to be reckoned with!

We are grateful to Shastar Vidya Martial Artist, Nidar Singh Nihang for his valuable insights into the traditional combat application of the Talwar.

1796 LIGHT CAVALRY SABER

Our Cold Steel® 1796 Light Cavalry Saber is inspired by the iconic swords used by the British and their allies at the Battle of Waterloo. Its distinctive blade profile is considered by some to have been derived from the Indian Talwar, and it gained such popularity that it remained in use (by the German Cavalry) until the beginning of the Twentieth century! But this is more than just an historically inspired showpiece - it's a high quality modern saber that is fully capable of passing the famous British Proof Test for quality and durability.

It comes with a fully sharpened forward edge, and your choice of a wood and leather scabbard with steel mounts and fittings, or the traditional all steel scabbard.

U.S. 1860 HEAVY CAVALRY SABER

During the American Civil War, there were two types of saber issued to the Cavalry: one "light" and one "heavy".

The light version was popular, but the heavy model, affectionately dubbed the "Old Wrist Breaker" was considered by many to be the one to carry into battle!

With a lengthy 36" blade, it offered distinctive reach advantages over most blades, and its added weight gave it superior leverage and power. Taking inspiration from antique blades in private collections, our saber is made from 1055 carbon steel with a hard spring temper that is capable of passing the famous British Proof Test.

This beautiful sword is sold complete with a double ringed steel scabbard which can easily be attached to a saddle or belt.

1815 FRENCH OFFICER'S SABER

The army of Napoleon was celebrated for its organization; despite the countless variations in uniforms and equipment. While the rank and file soldier was issued the standard accoutrements of the day, the officer's ranks were composed of a somewhat vainglorious lot who sought ways to distinguish themselves in both dress and in the styling of their weaponry. Among the best examples of these special sabers was one forged for Lancer Officers.

It was beautifully balanced and offered a moderately curved blade, a sharp useful point, and an excellent three bar hilt. As a cavalry weapon, it was more than suitable for use in a charge and performed equally well when fighting at close range in the mêlée.

Our faithful reproduction comes with a highly polished, battle ready blade forged from 1055 carbon steel, a wire wrapped leather handle, polished stainless steel scabbard and a dazzling, highly decorated three bar hilt.

DAMASCUS LONG SAX & DAMASCUS VIKING SWORD

Was it your destiny to be a Viking Earl? If you've got warrior blood in your veins, then we have two weapons you're bound to love. The Damascus Viking Sword and its companion, Long Sax are hand forged from our finest Damascus steel and come fully sharpened and ready for battle.

They include some superb appointments, each featuring a beautiful Rosewood grip, and a classically styled guard and pommel made from brass and steel that's "sandwiched" in the ancient fashion, and polished to a lustrous shine.

The sword comes with an impressive wood and leather scabbard that includes a belt loop and a brass throat and chape, that's accented by deeply embossed decorative elements. The Long Sax comes with an historically correct, thick leather scabbard complete with an embossed brass welt, chape, and carrying rings.

DAMASCUS LONG SAX

HUNTING SWORD

The hunting sword or "Hanger" is an iconic short bladed weapon (seldom over 26") that became quite popular in Europe and the Americas during the 17th and 18th centuries. Among the reasons for its popularity, outside of the dictates of fashion, was that it was an immensely handy, effective sword that was the perfect companion whether you were on foot, horseback, or on a crowded deck at sea!

Like many of the originals, our version is quite stylish. The blade is satin polished with multiple fullers and a wicked false edge. The intricately hand carved handle is made from Malaysian Sal Wood and ornamented with nickel-silver pins.

The scabbard's style harmonizes engagingly with the sword's design. It's made from heavy, black leather and capped at each end with an embossed nickel-silver throat and chape.

GERMAN LONG SWORD

Cold Steel's® German Longsword is a high-end, high performance sword for serious users and collectors. A modern interpretation taking its inspiration from historical examples, it has an expertly heat treated and spring tempered 1060 steel blade that is exquisitely balanced, beautifully polished and hand-honed to a keen edge.

A large S-guard and protective side ring offer significant hand protection while being capable of performing the binding, trapping, and winding techniques that made the German Sword Masters art so effective!

A wrapped leather grip terminates in a heavy steel pommel that not only counter balances the long blade but serves as a potent weapon in its own right. The twisting spiral design on the pommel is more than just a good looking decorative feature; it also provides a comfortable and secure grip even in gloved or gauntleted hands.

Finally, the German Longsword is encased in a thick ridged, hand-stitched leather scabbard with an antiqued steel chape and brass buckled leather straps for wearing your sword on a belt or baldric.

GROSSE MESSER

The German Grosse Messer ("big knife") is one of the largest of the blades that fall under the classification of "Messer".

It can be wielded in one or both hands and is capable of astonishing cutting feats. Cold Steel's® modern version of this historical classic features a hand-forged blade of 1060 carbon steel that's so sharp we've used it to split a telephone book in half, with a single blow! The guard and pommel are made from blued steel and feature Rosewood handle scales strongly riveted to the sword's full tang. The Grosse Messer also comes with a handsome wood and leather scabbard, reinforced with a steel chape and throat that has been blued to match the guard and pommel.

SCOTTISH BROAD SWORD

The infamous weapon of the Highland clansman, the Scottish Broadsword has a long, double-edged blade and distinctive basket hilt, and, when combined with targe and dirk, has proven to be more than a match for enemy soldiers on battlefields the world over. Cold Steel® has chosen to make our own interpretation of this famous sword. Hand forged 1055 Carbon Steel, expertly heat treated and beautifully polished with triple fullers, our blade is capable of passing the stringent British Proof test.

The Sword's basket hilt is made of blued steel with a wood grip covered in ray skin and wrapped in wire.

Finally, the Broadsword is safely housed in a wood and leather scabbard with a blued steel chape and throat.

ENGLISH BACKSWORD

"What a brave weapon is a short sharp light sword, to carry, to draw, to be nimble withal, to strike, to cut, to thrust both strong and quick"
- Paradoxes of Defense, George Silver, 1599

We are proud to add our interpretation of a 17th Century English Mortuary Hilt Sword. -Inspired by historical examples, this nimble single-handed sword is fast and lively in the hand and a sheer delight to train with.

Able to land a decisive blow even when cutting fast from the wrist, this beautiful sword has already proven to be very popular among our crew, who have proclaimed it to be one of their favorite one handed cutters.

Made from 1055 Carbon Steel and supplied with a mild patina to give an "antiqued" finish, each English Backsword is fully sharpened and supplied complete with an ornate leather and steel scabbard. An excellent addition to the collection of any Historical European Martial Artist or Historical Reenactor.

SCOTTISH DIRK

Cold Steel® is proud to offer quite possibly the finest production Scottish Dirk on the market today.

Unlike many replicas - which have devolved into blunt novelties and costume accessories for stage and screen - our modern version of this historical blade is a fully functioning tool. The wide, sharp 13" blade is forged to a hard spring temper from 1055 carbon steel, while the intricately hand-carved Malaysian Sal Wood handle is as beautiful as it is functional.

The Scottish Dirk by Cold Steel® is sure to be treasured for generations.

HUNGARIAN
SABER

88RPS
POLISH SABER

HUNGARIAN SABER

Hungary by virtue of its position on the world map is a country that straddles the cultural influence of both the East and the West. This influence is, of course, directly echoed in Hungarian weapons.

The Hungarian Saber is primarily a cutting, slashing weapon mostly used from horseback although thrusting with it on foot was not unknown.

The blade of our saber is made from 1055 high carbon steel with a hard spring temper. It has a hatchet point making it wider at the tip or point than at the guard.

The guard of our saber has very wide sturdy quillons. The wider quillons offer greater protection to the hand and forearm. Also because of their greater width, a skilled swordsman can catch a blow aimed at his hand, wrist, or forearms with a minor twist of his wrist as the long quillons cover a "lot of real estate", and minimal movement by the defender is all that is required to block the path of an oncoming blade.

The leather scabbard is, in a word, gorgeous. Its fittings are attractively arranged and provide a light, bright contrast to its black leather base.

POLISH SABER

Inspired by examples of early 17th Century Polish Sabers, and used both on horseback and on foot, these battlefield sabers had a fearsome reputation, not least for the skill-at-arms of the Polish Noblemen who wielded them, but also for their phenomenal cutting potential.

Our interpretation of this historically significant blade was designed by custom bladesmith Dave Baker, and is made from expertly heat treated Carbon Steel. With a fully sharpened, distal tapered and strongly curved blade, the Polish Saber is capable of delivering exceptional cuts, while still remaining stiff enough for the thrust.

WEIGHT: 40 oz.
THICK: 1/4"

Equipped with a solid steel, brass inlaid guard and knuckle bow for hand protection and a functional thumb ring to facilitate the moulinet - allowing the wielder to keep the blade in continuous motion, parrying, cutting and changing direction at great speed!

With an eye-catching leather wire wrapped hilt, and matching leather scabbard and brass inlays left blank for personal engraving, this sword is as good looking as it is functional, and it's sure to be the pride of any European Martial Artist or blade enthusiast's collection.

88ITD
ITALIAN DAGGER

ITALIAN LONG SWORD & DAGGER

Historically, the Long Sword featured a distinctive cruciform hilt and a long, double edged blade that was equally adept at opposing both light and heavily armored foes. Its extra-long blade offered the reach and leverage for powerful stabbing, cutting and chopping strokes while its long cross guard and heavy pommel were useful for hooking, striking and smashing.

When heavy plate armor was encountered, strikes with the edge were often abandoned in favor of a "Half-Swording" technique; where one hand grips the hilt and the other the blade for grappling and in-fighting - to better direct the point in powerful jabs, and to accurately thrust at the small gaps and joints in a suit of armor.

Cold Steel's® Italian Long Sword is designed so that the blade and balance slightly favor the thrust, while still being capable of delivering astonishingly effective cuts. It features a simple cruciform hilt, long upturned cross guard, leather-over-wood grip, and a heavy counter-balancing fish tail pommel.

Scaled down in size but almost identical in appearance, our optional companion dagger is sharply tapered with a double edged blade. Ideal as an offhand parrying tool, a back-up blade or just as a fine dagger to wear on your belt!

ITALIAN LONG SWORD

TWO HANDED GREAT SWORD

Our iconic Two Handed Great Sword is one of the biggest swords we make. But don't let its size fool you! There is nothing awkward or clumsy about this awesome sword.

Sure, it's big and meant to be carried over the shoulder instead of in a scabbard, but it's extremely well balanced and easily wielded by people of larger stature and physical strength.

The Great Sword features a large guard with side rings and integral parrying hooks that allow the blade to be "choked up" on for closer range sword techniques.

The leather covered wooden handle comfortably affords a full two-handed grip, and is capped by a heavy steel pommel that helps counter balance its long blade.

If you're looking for the ultimate in big, beastly and battle ready blades - your search is over!

VIKING SWORD

VIKING SWORD

The historic Viking sword of the 9th & 10th centuries featured a long wide blade with a broad central fuller and two keen edges. A simple guard with forward curving quillons was often utilized and combined with a utilitarian wooden handle and a heavy 5 lobed pommel to balance the long blade.

Cold Steel's® interpretation of this sword features a double-edged blade that is hand forged out of Carbon steel and hand polished and sharpened to perfection. The wooden handle is covered in leather and is supported by a simple, elegant guard at one end and a 5 lobed pommel at the other.

It comes with a leather wrapped wooden scabbard that is reinforced with a polished steel chape and throat.

NORMAN SWORD

NORMAN SWORD

Cold Steel® is pleased to offer you our version of the sword ancient Norman warriors used as they crossed the English Channel to conquer Britain at the battle of Hastings in 1066 A.D.

Like the original swords we have studied, our replica offers a long, wide blade with twin fully sharpened edges and a broad point. To reduce weight, increase "hardiness", and maximize eye appeal we have added a broad fuller in the middle of the blade.

The hilt of Norman Sword has also seen equal attention featuring upturned, spatulated quillons, a leather-over-wood grip and a modified "cocked hat" pommel. This pommel shape was chosen because it allows greater articulation of the hand while counter balancing the long heavy blade.

COMPETITION CUTTING SWORD

COMPETITION CUTTING SWORD

While Japanese sword cutting competitions have been popular for many decades, there has been little or no interest in exploring the cutting potential of Western swords until very recently. Now in response to this awakening Cold Steel® would like to encourage it by offering our own Competition Cutting Sword. Broadly based on the Arbedo, it's intended for contests using rope, mailing tubes, tatami mats and similar soft targets.

The thin, wide, double edged blade is hand forged from 1050 high carbon steel with a hard spring temper and is delivered fully sharpened and polished.

For maximum control and leverage, when attempting big cutting feats, our Competition Cutting Sword comes with a substantial leather covered wood handle that will accommodate one or both hands. To protect your fingers and fend off opposing blades, a simple yet effective double quillon steel guard is provided.

It's supplied with an attractive flared, lozenge shaped steel pommel and comes encased in a thick and sturdy, black leather scabbard with matching steel throat and chape.

HAND-AND-A-HALF SWORD

HAND-AND-A-HALF SWORD & DAGGER

There are few swords that are more versatile or effective than the "Bastard" or "Hand-and-a-Half Sword"

It's reasonably light, fast as lightning in offense or defense and best of all forged from tough 1060 carbon steel with a hard spring temper. Equipped with two fully sharpened edges and a strong yet wickedly effective point it commands respect at first glance!

Its long handle is suitable for use with both a one or two handed grip, and is fashioned out of wood covered in black leather. To balance the Hand and a Half Sword's long blade the butt is capped with a "scent stopper" style pommel.

An optional companion dagger is also available. Scaled down in size and almost identical in appearance, fit, finish and materials. In truth it makes a terrific off hand parrying weapon and can stand alone in its own right as a dagger you can wear with pride on any occasion.

Every Hand-and-a-Half Sword and dagger reflects the highest standards in workmanship and materials. To safely house your sword and dagger, we have also included attractive scabbards made of wood covered with black leather, with steel throat and chape.

TOOTHPICK

WOODSMAN'S SAX

Did you know that the name of the Saxon race was derived from the knife they carried? Its true the Sax knife was so important in their daily lives that an entire people became known by it. So, what was so special about this knife that it endured from the 6th to the 12th century? The answer is, it was easy and cheap to make and incredibly versatile and effective. Usually found without a guard, with a simple wood or bone hilt it offered a long wide, thick blade with a straight edge and a sloping point (easy to forge). This made it just about ideal as it chopped, sliced, hacked, whittled and carved and was no slouch in a fight as the weight forward balance of the blade and sloping point made ferocious chopping and thrusting strokes effortless.

Over the years we have become quite enamored with the history and work potential of the sax so we decided to make a simple version we call the Woodsman's Sax. Like some historical saxes that have survived, the Woodsman's features a stout 11" long blade with the characteristic sloping point and an unadorned wooden handle made from exotic imported hardwood. Each of our broad bladed saxes also come with a sturdy "period correct" leather scabbard, complete with belt straps, and accented with solid brass "period correct" buckles.

WEIGHT: 21.7 oz.

BLADE: 11"
HANDLE: 6"
STEEL: 1055 CARBON
OVERALL: 17"

RONDEL DAGGER

Cold Steel's® Rondel Dagger is inspired by historical examples of the combative incarnation of this medieval dagger. Rather than a multi-purpose tool, this version was a specialized weapon. A side arm developed for in-fighting, to pierce mail or heavy clothing, and to slip through gaps in plate armor.

The long, straight triple-edged and hollow ground blade is incredibly stiff and terminates in a needle sharp point. The blade is richly blued, then the edges are hand polished, giving the Rondel its handsome appearance.

The handle of the Rondel Dagger is turned and intricately hand-carved from Malaysian Sal Wood, with brass pins added to give further decoration and more traction to the grip.

The period-correct double dish guard and pommel are further embellished with file work and offer incredible hand protection. An historically accurate hand-stitched leather sheath with blued steel throat and chape allows the Rondel Dagger be tied to a belt or baldric and comfortably worn in a variety of positions.

ARKANSAS TOOTHPICK

The main competition to the Bowie knife from the late 1830's to the period just after the Civil War was the Arkansas Toothpick. The Arkansas Toothpick got its namesake as an ironic reference to the coarse, rough and tumble culture that populated the lowlands of Arkansas and the Mississippi delta in the mid 19th century. Travelling journalists from Europe often made up stories about how they commonly saw men and old boys picking their teeth with giant knives that they dubbed Arkansas Toothpicks.

Like the Bowie, it was frequently a large knife almost always double edged with a sharp acute point. The knife almost always had a double quillon guard and many were fancy, and some imitated the Bowies of the day in size and appearance. Sure, some were plain, but most were fairly elaborately decorated.

Our version has a substantial double edge spear point blade, with a Malaysian Sal wood handle and a fancy pommel with an alligator motif. The scabbard is equally stunning, it's finely made and decoratively enhanced to complement the handle.

WEIGHT: 21.9 oz.
THICK: 6MM
BLADE: 13 1/4"

CHIEFTAN'S SAX

Every Viking Chieftain was familiar if not an expert with sword, shield, spear and axe. But these are long and heavy and often bulky weapons that were not always within reach so for 24-hour protection they almost universally carried a large Sax. Suspended from the belt in front or back (where it didn't interfere with other weapons like their sword or hand axe) it was instantly available if suddenly attacked and was often used in tandem with other weapons.

While most Sax blades resemble the profile of our Woodsman's Sax with a straight edge and sloping point there were popular variations like the broke back Chieftan's Sax we are introducing here.

Forged out of high carbon steel with a hard spring temper and satin polished it boasts a "broke back" blade profile where the line formed by the spine rises then falls abruptly to the point of giving the illusion of a clip point bowie knife while actually predating the bowie by many centuries!

Since the Chieftan's Sax is meant to be a weapon first and a tool a distant second it comes with a modestly sized brass guard that serves to keep the fingers from sliding forward on to the blade while offering a modicum of protection from opposing weapons. But it is the handle of the Chieftan's Sax that we are especially proud of. Intricately hand carved in deep relief in link pattern that is visually stunning and complements the matching brass guard and pommel.

Each Chieftan's Sax comes with a period correct brown leather scabbard with brass accents, a leather laced seam and period correct leather carrying straps!

FACON

The Facon is the national knife of Argentina where the Gauchos made it famous as its large and simply shaped blade proved ideal for everything from dispatching game and livestock to repairing tack and saddles to cooking and eating the evening meal.

With a blade that resembles an oversized chef knife the Facon can trace its roots back to the 14th century where it was widely used and carried by just about everyone, from peasant and serf all the way up to the landed nobility. In fact, it was so popular it jumped the Atlantic Ocean with the first European immigrants and became established through out North and South America.

Now Cold Steel® is delighted to present our version of this iconic knife. Forged in the classic shape from 1090 high carbon steel with a wide, thick blade it measures a full 12" long and offers extensive hand filed "jimping" along the "spine". The handle of our Facon is also hand carved in traditional fashion out of exotic Malaysian Sal Wood and is capped fore and aft with a nicked steel bolster and pommel.

Even the scabbard continues to follow Argentina's tradition by being molded out of thick black leather that is sewn with a center seam and equipped with a fancy nicked steel chape.

CINQUEDEA

The Cinquedeia [Ching-kwi-dey-uh] gained popularity as the sidearm of choice for Italian noblemen. Surviving examples of these unusual short handled and steeply tapered blades are often highly embellished and ornate. With etched or gilded blades and deep multiple fullers that border on jewelry rather than weaponry - but beneath the romanticisms of high renaissance fashion lay a tool made with purpose. A wide, stiff cut and thrust blade that could be brought into play in confined spaces, and deliver a mortal wound!

Our interpretation of the Cinquedeia is made from expertly heat treated 1065 Carbon steel with a highly engraved guard and pommel, and a hand-carved Malaysian Sal Wood grip.

The Cinquedeia is sold complete with a leather scabbard with engraved steel throat and chape.

FILIPINO MEMORIAL BOLO

The Filipino Bolo Sword comes in a variety of shapes and sizes. But the sword that inspired this project came from the private family collection of Guru, Dan Inosanto. It is a style of Bolo sword known as a Talibon and it has a history of opposing many formidable blades like the Kris, Barong, Kampilan and even the Japanese Katana.

It was a sword extensively utilized by the brave Filipino soldiers who fought for America in World War II and the Korean War. Currently, there are some 17,000 surviving Filipino Veterans out of the original 260,000 who served.

Cold Steel® will be donating 10 percent of the profit on this sword to the Filipino Veterans Recognition and Education Project to buy replica Congressional Gold Medals for surviving veterans and their families.

BOWIE

THOMPSON SABER

Cold Steel's® Thompson Saber is not a historical or period-specific sword; rather it is a newly developed, thoroughly modern saber. Designed by Lynn C. Thompson, and bearing his name, the Thompson Saber was created to Lynn's exact specifications. Lynn said: "I wanted to make a battle sword. Not a dueling sword as such, but a true sword fighter's blade for the modern martial artist." "It's ground to my exact specifications; as it slightly favors the cut over the thrust, it's hair

shaving sharp for the first six inches from the point, then gradually less sharp down through the rest of the blade, leaving enough material to block, parry and even bludgeon an opponent's blade. It's deeply blued to aid in rust resistance, but also to make the blade harder to see in the fast paced cut and thrust of combat!"

The Thompson Saber has a modified 1904 Saber guard and a sizeable ray skin wrapped handle that will accommodate even big modern fencer's gloves. The Thompson Saber comes complete with a heavy duty thick leather and steel scabbard with a leather belt frog for ease of carry.

POCKET BUSHMAN

The Pocket Bushman was designed with one clear goal; to create a rugged, dependable folder for camp and utility chores. A knife that could be depended upon for tough outdoor tasks and emergency survival applications, while still being small and handy enough to fit in a pocket or be stowed in a pack.

The Pocket Bushman's sub-zero cryo-quenched 4116 stainless steel blade is incredibly durable, and capable of taking (and holding) a fantastically sharp edge. It's long and wide with a sharp clip-point for maximum practicality and versatility in the field.

For the handle, we used a mono-block construction made famous by the classic French "Douk Douk". There are no liners, handle scales or back spacers. Instead, a single sheet of stainless steel is folded in half to form a housing for the closed blade, as well as supplying the enormous strength and rigidity required to complement our innovative Ram Safe™ lock.

Sheer simplicity, and affordable practicality – the Pocket Bushman is a knife you can depend upon!

BUSHMAN® SERIES

For the money, the Bushman® series of survival knives are hard to beat! Unlike the majority of hollow handled knives, there is no joint or seam between the blades and handles, instead the Bushman's blade and handles are cold forged out of a single piece of steel!

The resulting knives are expertly heat-treated and tempered to RCS4 and, when subjected to our tests, have withstood over two tons of pressure on their blade/handle transition! Every Bushman® has been carefully ground to an extra thin edge, and then honed and buffed by hand until razor sharp.

Their hollow handles will accept survival supplies or a variety of handle extensions which can maximize reach, leverage or ease of throwing.

Available in two blade styles (Standard and Bowie point) both feature curved blades that are ideal for skinning and a multitude of bushcraft chores. Both come complete with a Secure-Ex® sheath which houses a high-quality Ferrocerium Fire Steel.

GUNSTOCK WAR CLUB

Cold Steel® is proud to introduce our modern interpretation of the culturally significant Gunstock War Club. In the early sixteenth century, American Indians observed the potential of a rifle stock as a bludgeoning weapon, and they wasted no time in fashioning their own war clubs based upon its basic shape.

Made of straight grain hard woods, they hit with remarkable force, especially when enhanced by the addition of a short point. Designed by custom Bladesmith Rich McDonald;

Cold Steel's® version of this fascinating tool incorporates many of the features found on historical examples, including the ridged centerline, sharp point, and the classic "Fawn's Foot" handle, but instead of using traditional hardwoods, we chose to make our War Club from injection molded high impact polypropylene.

This material is highly resistant to shock; making it particularly suitable for use in impact tools. As an added bonus, this material won't warp, rot, crack or splinter like wooden versions! For reenactors, the War Club has been given a realistic wood grain texture, which can easily be painted to replicate the finish of historical models.

The Gunstock War Club comes complete with a sheath.

INDIAN WAR CLUB

Lynn C. Thompson is an avid collector of wooden weaponry and ethnographic arms, and when he saw a beautiful example of a Ball Headed War Club made by custom Bladesmith Rich McDonald, he jumped at the chance to work with Rich to reproduce it for a modern audience. Cold Steel's® Indian War Club is injection molded from weatherproof high-impact polymer materials that are virtually impervious to impact. This material is highly resistant to the elements and won't warp, rot, crack or splinter like wooden versions. Each club is approximately 2 ft. long with a 3 1/4" diameter ball head, and fitted with a removable pointed steel stud. For historical re-enactors the surface has a realistic wood grain finish that can be easily painted and customized with brass studs, tacks, or feathers.

MAA GOTHIC MACE

This modern interpretation of a classical Gothic Mace is hand made from 1055 carbon steel. It features a thick walled hollow steel handle, and a weighty pommel to counter-balance the Mace's heavy helmet crushing head.

Designed to oppose armored foes, the Man At Arms Gothic Mace features six steel flanges. Each one is profiled and tapered to reduce weight but also add "bite" upon impact, denting and crushing even the strongest plate armor, while the spiked finial

at the crown allows the Mace to be used as a thrusting tool. Wielded with either one or two hands, the Gothic Mace is light enough to use with speed, but stout enough to block, parry and, of course, deliver a crushing blow!

Richly blued to a deep black finish, with a hand stitched leather wrapped handle, this good looking Mace is sure to be an exciting addition to the collection of any Historical European Martial Artist, Historical Reenactor or weapons enthusiast.

MAA POLISH MACE

Inspired by historical examples, and modelled after a custom weapon by Bladesmith Dave Baker, our Man At Arms Polish Mace is a masterclass of minimalist design.

Unlike highly decorated "Bulawa" or ceremonial weapons, these simple utilitarian Maces were often plain and unadorned, and tucked into a sash or belt at the waist, ready to be quickly snatched and brought into play as a last-ditch tool for personal-defense. Quickly grabbed with either hand, the wielder could use this stout steel Mace to thrust and jab at speed, or swing it to land a heavier (and more devastating) percussive blow.

Small, and surprisingly lightweight, the Polish Mace has a thickly walled hollow handle and a ridged steel bulb shaped head, with a polished brass finial on the crown.

Easily customized, modified or wrapped for historical reenactment, this practical Mace is a fun and unusual addition to any collection!

SIX FLANGE MACE

Maces of this type were in use for hundreds of years as they were simple to make, relatively inexpensive and highly effective especially against enemies in plate armor.

The whole point of the flanges was to concentrate the weight and power of a blow with the mace in one or two narrow ridges so they would better transmit force and crush flesh, bone and armor. A hard blow from a mace could stop the heart of an armored opponent or crush his arm so that he was incapacitated and could not move his arm or leg, knee, elbow.

The mace was carried by the watch (police of the day), archers, foot soldiers, men at arms and knights. Our Six Flange Mace is a little plebeian, but "crosses over" to every group or reenactor at a moderate price.

TRUE FLIGHT THROWER

The Cold Steel® True Flight Thrower is one of our most popular throwing knives.

Made from S50C steel, and finished with a black, baked-on protective coating, the True Flight is a beautifully balanced and hard wearing thrower that also has a sharp, functional utility edge. As such it will also serve as an excellent bushcraft or survival knife.

The True Flight Thrower comes complete with a Cor-Ex™ sheath.

G.I. TANTO

Our G.I. Tanto is a no-nonsense tactical knife that comes with a legion of practical uses.

The G.I. Tanto's broad blade, integral quillon guard, and Polypropylene handle scales exemplify a tactical knife stripped down to its bare essentials.

Made from spring tempered 1055 carbon steel and protected by a rust resistant finish, it's rugged, hard-wearing and dependable.

Popular with sport throwers, the G.I. Tanto is perfectly balanced and capable of being thrown by the blade or handle. In a survival or self-defense situation, it can be quickly and easily converted into a spear tool! Just remove the handle scales and lash the blade securely to a suitable wooden shaft! Best of all, it's a great value blade - inexpensive enough to buy duplicates to keep as back-up or bug-out bag knives, or even just to throw for fun on a sunny day.

The G.I. Tanto comes complete with a Secure-Ex™ sheath.

THROWER

SHANGHAI SHADOW®

The signature ring on our Shanghai Shadow® allows tremendous versatility when handling this popular and fun knife.

It provides a totally secure grip when the index finger is locked in place through the hole. The wielder can also pivot the blade around the index finger for a quick change of grip, and even use the ring as a means of extending his or her reach by as much as four inches.

Made from one solid piece of 1055 Carbon steel the Shanghai Shadow® has a tough spring temper and twin hollow-ground edges. It is provided fully sharpened, and equipped with a heavy-duty military style Secure-Ex® sheath.

SHADOW

PERFECT BALANCE® THROWER

The Cold Steel® Perfect Balance® takes inspiration from a classic thrower from the 1950's.

Thanks to its considerable weight and fully sharpened clip point blade, it hits hard and penetrates its target effortlessly. The Perfect Balance's® strong 1055 carbon steel construction, black rust-resistant finish, and composite handle scales make it durable enough for thousands of throws.

This blade has also become a firm favorite as a low cost utility and hunting tool. Its big Bowie-style blade and tough spring temper make it a rugged reliable companion for the toughest conditions.

MICRO FLIGHT

Our Micro Flight Thrower is slim, trim, and wonderfully compact. But don't let its small size and economical price fool you, as it packs an awfully big punch for very little money.

Made from super tough "spring steel", it's sure to provide years of throwing fun. And, as an added bonus, its broad spear point blade, and integral guard and ergonomically designed handle allow it to be easily and inexpensively converted into a very effective boot knife.

BLACK FLY

Just like its namesake, the Black Fly thrower is small, thin, compact, and packs an inordinately ferocious bite.

Featuring a narrow blade and an ultra-keen point, it's easy to throw and will "bite" deep into just about any target.

Made from carbon spring steel with a rust resistant finish, it's economically priced and we think you'll agree it's quite a bargain. You can buy two for twice the fun!

SPORT SERIES THROWERS

For many years now we have offered some of the finest premium professional-grade throwing knives. Our throwers have become a mainstay in the throwing community and they make regular appearances in the highest level throwing competitions all over the world. Now, due to popular demand, we are proud to introduce a new line of intermediate grade, inexpensive sport throwers. Made from 1055 Carbon steel, and with the same hard spring tempering as our higher end models, these sport models are slightly thinner and lighter but with the same durability and balance that our customers have come to expect. Suitable for any skill level, they are markedly less expensive than our original pro-grade models and make it easier than ever to take up this enjoyable and rewarding pastime.

SURE BALANCE® THROWER

The heavyweight Cold Steel® Sure Balance® Thrower is just shy of 13 1/2" long and weighs a little over a pound! Twice as heavy as many amateur throwing knives, these professional grade knives fly straight and hit like a freight train, sticking in almost any target! With their expertly heat treated solid 1055 carbon steel construction, they are sure to offer many years of hard service, even when used by the most dedicated throwing enthusiast.

SURE STRIKES

The Sure Strike is our interpretation of the classic Shuriken or throwing star. Used for centuries in China and Japan, the throwing star consists of a well-balanced piece of flattened steel with 3 or more sharp points. When thrown overhand like a baseball, side arm, underarm or back hand like a flying saucer, it hits on at least one point every time. Our Sure Strikes aren't like the cheap, shoddy throwing stars you see at flea markets, guns shows, and in martial arts magazines. They are precision laser cut from high carbon steel and heat treated to a durable spring temper before sharpening. They are then treated with a black, baked-on epoxy finish to protect them from the rigors of the elements and repeated throwing. Available in three weight variations - Light, Medium and Heavy.

NAME:	HEAVY SURE STRIKE	MEDIUM SURE STRIKE	LIGHT SURE STRIKE	BATTLE STAR

TORPEDO® & MINI TORPEDO®

Popular with Sport Throwers and hobbyists alike, the Torpedo® has remained a popular part of our line-up for many years - and with good reason! Cold Steel® Torpedoes® are a lot of fun for target throwing, hunting, and even self-defense, and now they're available in two sizes; the original Torpedo® and the new Mini Torpedo®!

The double tapered points slide effortlessly from the hand for a perfect release and offer twice the sticking potential of a conventional throwing knife. The heavier, 2 lb. version lets you stand way back from the target (15 yards or more) and throw it with surprising force, and the smaller, lighter version can be thrown even farther, and is much easier to carry because it's half the weight. Both hit with terrifying power and are very effective.

	MINI TORPEDO	TORPEDO
WEIGHT:	15.8 oz.	2 LBS.
THICK:	3/4"	1"
OVERALL:	12"	15"
STEEL:	COLD ROLLED 1055 HIGH CARBON	

BATTLE STAR

The Cold Steel® Battle Star is quite possibly the largest production throwing star ever offered! Its huge spikes are almost 4 inches long and 2 inches wide at the base, tapering to fine but sturdy points that penetrate even tough materials with relative ease. Big and strong enough to be thrown with force, it hits as hard as a heavy duty throwing knife, and its balanced and accurate enough to hit with precision as well as strength. Perfect for sport, competition and recreation, the Battle Star is a must for any thrower's collection!

TEMPLAR

The Cold Steel® Templar is a specialized throwing tool made for modern sport or competition throwers.

Designed by custom bladesmith Dave Baker, the Templar is inspired by an ancient historical throwing axe known as a Hurlbat. Made of one solid piece of tough spring tempered carbon steel, the Templar is fun to throw and easy to use. When it comes to "sticking" potential, it's the next best thing to a shuriken or throwing star, landing with a satisfying "thunk" over and over again!

With an axe-style head, top and back spikes and a tapered spiked handle, it hits hard at almost any distance and rotation, and thanks to its head-heavy balance it is capable of being thrown even over extended distances.

BOOMERANG

JACK DAGGER THROWER

Jack Dagger is one of the most popular and well known knife throwers in the world. The "King of Fling" has traveled all over the world showcasing his throwing prowess, and has become the go-to trainer for Hollywood's elite, preparing them for knife wielding roles on the big screen.

Making regular appearances on television dazzling audiences with his skills with the blade, Jack has brought knife-throwing to international audiences on a scale that's hard to believe!

Expertly heat treated and made from a single piece of 1050 high carbon steel, and made to Jack's exact specifications, the Jack Dagger Thrower is perfect for professional and competitive knife throwers who are looking for a big, wide clip point "Bowie Style" throwing knife.

A single sharpened edge also makes this a handy utility and camping knife. A functional and tough tool that will also be great fun to throw on those hot summer nights by the campfire!

LA FONTAINE THROWER

Luke LaFontaine is a long-time member of our Cold Steel® crew. Known primarily for his expertise in Japanese Sword Arts, he is also a highly knowledgeable Western Swordsman, historical fencer and amateur historian.

As an actor, stuntman and weapons expert for the big screen, Luke has perfected a wide range of combative skills, including knife throwing.

The LaFontaine Thrower is heavily curved, with a wide belly, sharp cutting edge and an acute tip, that's accented by an unsharpened false edge. With an integral finger guard to stop your hand from sliding onto the sharp edge, and a tapered easy-release handle for throwing, the LaFontaine Thrower is a capable cutting and slashing blade as well as an excellent throwing knife.

WEIGHT:	14.6 oz.

BOOMERANG

The non-returning boomerang, or a variation of the throwing stick has been used as a hunting tool on every continent from time immemorial, and is still found in isolated pockets around the globe even today. Fashioned in various shapes, forms and sizes and made from wood, bone, horn and even metal, it was most effective when used to harvest birds and small game. Since we are in the business of making things to throw, it was only natural for us to try and improve on the classic hunting boomerang by making our own version.

Injected molded from high impact Polypropylene with an attractive wood grain texture, you can use our Boomerang for hunting and sport throwing. It's a great gift, and hours of fun!

CHEAP SHOT™ BROADHEADS

CHEAP SHOT™ BONE SAW

The Bone Saw is made from polymer and super tough, fully heat-treated stainless steel. It's a hybrid broadhead, it's the future and you can buy it today!

It's a perfect choice for beginners, younger hunters, and even old hands who don't want to spend money on super expensive broadheads which can cost over 4 times as much. It's also an excellent choice for varmints and nuisance animals as well as turkey, deer, wild boar, and even elk!

We've all mourned the loss of an expensive, \$15 broadhead when an arrow goes astray or gets damaged. Thanks to the Cheap Shot Bone Saw you can screw on a brand new, razor sharp broadhead for around three bucks!

NAME: CHEAP SHOT™ BONE SAW
WEIGHT: 125 Gr.
WIDTH: 1"
EDGE LENGTH: 1 3/4"
LENGTH: 3"

CHEAP SHOT™ BROADHEADS

Available in two sizes, each Cheap Shot™ is outfitted with Cold Steel®'s signature "grip n' rip" style serrations - developed for use on military tactical knives - specially designed to cut tough fibrous tissue, and capable of making short work of any mere flesh and blood target, dispatching even big game quickly and humanely.

Easy to use and quick to replace, every Cheap Shot™ is accurate, lethal, and most importantly, dirt cheap!

CHEAP SHOT™ 130

At our astoundingly low suggested retail price, the Cheap Shot 130 just might be the most value packed tactical crossbow available! Easy and quick to disassemble (into five components), it will fit into most backpacks, suitcases, and even "roll-ons" with room to spare. But what really sets it apart from all the competition isn't its telescoping AR style buttstock, Picatinny rail, detachable foregrip, red dot sight, or even its cool OD green color scheme. What really sets it apart is its phenomenal ability to shoot into 3 inches at 30 yards in literally a few seconds.

It doesn't matter if you are standing, kneeling, sitting or lying on the ground, the Cheap Shot 130 is lightning quick to load. You see, there is no stirrup, rope, or crank cocker needed to get the Cheap Shot 130 into action. All you have to do is release the cocking lever, so it swings all the way forward, then pull it straight back to re-lock and you're almost ready to fire. Just slip your bolt into the flight groove and make sure it's all the way back, release the safety, and press the trigger.

At 226 feet per second, your Cheap Shot 130 has a lot of zip and delivers remarkable accuracy and penetration out to 30 yards or more!

DISASSEMBLE INTO FIVE COMPONENTS FOR EASY TRANSPORT

OPTIONAL EXTRA BOLTS

- 9 FOREGRIPS
- 10 SLING MOUNTS

BLACK BEAR BOWIE

Continuing our ground breaking tradition for creating unusual and eye-catching "tactical machetes", our R&D team devised a bold new blade for 2017 - the Black Bear Bowie!

It's extra wide, 12" long blade is black-powder coated with a matte-black corrosion resistant finish and then sharpened right here at Cold Steel® HQ.

The Black Bear Bowie's generous full tang and solid steel guard are completely injection over-molded with fine-textured high-impact Polypropylene, creating a very comfortable but tough, weatherproof grip.

Supplied with a sturdy Cor-Ex™ sheath for ease of carry and convenience of use in the field, the Black Bear Bowie is fast and lively in the hand, and wide enough to chop through small vines and saplings, clear brush and perform admirably in many survival or bushcraft duties.

If you are looking for a truly epic bowie knife, but at an affordable price, then you will be hard pressed to find something better than the new Cold Steel® Black Bear Bowie!

TANTO MACHETE

We've prototyped a whole host of different short bladed Machete shapes over the years, but the Tanto remains one of the best we've tested. Although the "Americanized Tanto" is known primarily for its combative application, it also makes an excellent multi-purpose bush craft blade.

In our tests the Tanto Machete cut and pierced exceptionally well and remained tough enough to endure hard use. Its full-tang construction and hard wearing weather-resistant polypropylene handle only add to its durability and functionality.

BOWIE MACHETE

Cold Steel's® Bowie Machete is fast, and lively in the hand, making it an outstanding slashing blade and an admirable chopper while still retaining knife-like capabilities when a smaller handier blade is required. The Bowie Machete is supplied fully sharpened, with a tough, baked-on matte black rust resistant coating and is equipped with a sturdy Cor-Ex™ sheath.

CHINESE SWORD MACHETE

Cold Steel's® historically inspired sword / machete hybrids are firm fan-favorites. The Chinese Sword Machete is no exception!

Similar in look and design to our record-breaking Chinese War Sword, The War Sword Machete has a super wide, deeply curved blade and tough one-piece full-tang construction with over molded polypropylene handles for maximum durability. Plasma cut from expertly heat treated 1055 carbon steel and then hand ground and sharpened; the Chinese War Sword Machete has amazing cutting power.

Supplied with a Cor-Ex back sheath, this beast of a machete will actually out-perform many swords on the market - and at a fraction of the cost!

TACTICAL SERIES MACHETES

Our Tactical Series of machetes are inspired by our hugely popular and record breaking Warrior Series of Tantos, Wakizashis and Katanas.

Available in 3 sizes, each of these fun and distinctive machetes features a wide, curved Tanto point blade and solid steel tsuba made from heat treated 1055 High Carbon Steel with a baked on anti-rust coating. Their broad full tangs are injection over-molded with high impact polypropylene, making them incredibly durable and weather resistant. We re-created the look of a traditional cord wrapped handle, Fuchi and Kashira but used modern materials that will not shrink, warp, tarnish or rot and require very little maintenance. These Machetes comes complete with a Cor-Ex sheath for carry and storage.

THAI MACHETE

The Thai Machete represents the culmination of over 4 years of development and refinement. Like the Thai swords that inspired it, our Machete is beautifully balanced, with a keen cutting edge and a sharp tip. Though most commonly seen used in pairs when practicing traditional Thai fighting arts, these long curved blades are amazingly versatile. Light enough to swing one handed, but with a long enough handle to employ a two handed grip for extra leverage and cutting power. The Thai Machete's wide blade and curved cutting edge make it an excellent brush cutter. Slicing grass, vines and light foliage with ease. Its fully sharpened blade is made from the same tough 1055 Carbon Steel as the other blades in our incredibly popular Machete line up. Its tough polypropylene handle has a flattened oval grip that won't twist or turn in your hand, while its steel reinforced guard offers extra hand protection.

Fully sharpened, the Thai Machete comes complete with a Cor-Ex sheath for carry and storage.

CUTLASS MACHETE

Our Cutlass Machete features a stiff 1055 Carbon steel blade that's just as capable of repelling boarders as it is for hacking a path through the blackberries to get to your favorite fishing hole!

With a tough full-tang steel construction and a steel reinforced knuckle bow guard, it's ready for your next adventure be it on land or sea!

ALL TERRAIN CHOPPER

In our grueling performance tests, the ATC (All Terrain Chopper) out performed many Machetes, and even put some swords to shame! The sheer cutting potential harnessed within the ATC's extra wide blade just has to be seen to be believed!

Worn either slung over the shoulder or across the back in its weight-distributing carry sheath, the ATC is surprisingly comfortable even when carried for extended periods of time. Following exhaustive field tests, we found the ATC to be a stalwart hunting and wilderness survival companion. Much more than just a machete, and the next best thing to an axe, it packed astonishing chopping power into an easy to carry package, delivering superb performance.

SLANT TIP MACHETES

Like our heavier All Terrain Chopper Machete, the Slant Tip Machetes are designed for sheer cutting and chopping power in any environment!

The European style slanted tip packs explosive performance, combining precision cutting with weight-forward head-heavy chopping power. - while the ergonomic polypropylene handle makes it comfortable to use all day, even when working in the toughest terrain.

They're available in 2 sizes with 18" and 21" blades, and come complete with a durable Cor-Ex™ sheath.

KUKRI MACHETES

There are very few knives in the world that we can think of that can out-chop or out-cut a good Kukri.

It's true that some of the best Kukris (like our Gurkha model) can be somewhat expensive, and while that "thoroughbred" performs extraordinarily well, sometimes what's required is a good, inexpensive, "workhorse" model - and our Kukri Machetes are those workhorses!

Available in two sizes (one with thirteen inch blade and one with a whopping seventeen inch blade) our Kukri Machetes are ready to plow through the toughest chores!

Perfect as a lighter-weight bushcraft or camping tool that can be carried on a belt or lashed to a pack, our Kukri Machetes pack a great deal of value into a relatively small, light and inexpensive package.

KUKRI PLUS MACHETE

The Cold Steel® Kukri Plus Machete features the same wide, curved blade that makes our Kukris capable of delivering the kind of performance that's the envy of many swords or bushcraft tools, but with the addition of an integral solid steel guard for added protection and safety.

Its full tang is completely encapsulated in a comfortable and durable polypropylene handle that has been ergonomically designed for comfort and safety, allowing you to keep a secure grip on the Machete even in the most inclement conditions. Featuring a rust resistant baked on matte black coating, the fully sharpened and expertly tempered 1055 Carbon Steel blade is safely and securely carried in a sturdy Cor-Ex sheath.

ROYAL KUKRI MACHETE®

It's hard to find a more versatile knife than a Kukri. A stalwart ally in a tight spot and an indispensable survival tool, a good Kukri is truly apocalypse proof! Our Royal Kukri Machete® presents the blade's keen point at a new, non-traditional angle, keeping the cutting power that made the Kukri the stuff of legend, but increasing its thrusting and piercing power. The handle, with its integral guard keeps the user's precious digits safe from harm while improving the balance and heft of the knife. Proven to be an outstanding multi-functional bush knife, the Royal Kukri Machete® is capable of the toughest bushcraft chores. It's fully sharpened 1055 Carbon Steel blade (with rust resistant baked on matte black coating) is equally at home clearing brush and undergrowth or dispatching wounded game, it also provides the comfort of a dependable last resort self-defense option.

BARONG MACHETE

The Barong heralds from Southeast Asia, where it is historically both an agricultural tool and an effective weapon during wartime. The Barong has an impressive lineage in the realm of Filipino Martial Culture and is still used by Martial Artists to this day. It is also an excellent bushcraft tool, cleaving vines and branches with ease.

Our Barong inspired Machete features a beautifully curved 18 inch leaf-shaped blade made from 1055 Carbon Steel with a baked on, matte black finish to aid in rust and corrosion resistance.

Its traditionally influenced down-turned Polypropylene handle is not only good looking, but it also helps anchor the blade in the hand when making hard chopping or slashing strokes. Each Barong comes complete with a Cor-Ex sheath for ease of carry, and convenience of use in the field.

JUNGLE MACHETE

Made from spring tempered 1055 carbon steel, the Cold Steel® Jungle Machete is incredibly tough. With the weight-forward balance necessary to chop through vines, saplings, brush and even small trees, and a sharp point that offers a multitude of survival and bushcraft capabilities.

The Jungle Machete is sold fully sharpened, and shipped with a sturdy Cor-Ex™ sheath.

HEAVY MACHETE

GLADIUS MACHETE

The Cold Steel® Gladius Machete remains one of the most popular models in our hybrid sword / machete series.

It's made from spring tempered 1055 Carbon steel and hand sharpened. The Gladius Machete features the classic guard and ball shapedommel, but with the added strength and durability found with full-tang construction and modern materials. We use high-impact Polypropylene for our handle, making it almost impervious to the elements and rugged beyond belief. The Gladius Machete comes complete with a sturdy Cor-Ex™ sheath.

TWO HANDED LATIN MACHETE

The extra-long handle on our Two Handed Latin Machete can still easily be used one handed, but will comfortably accommodate two hands as well. Plus, the 21 inch Latin styled blade has the potential to make delicate, precision cuts in tight quarters as well as deliver limb-lopping strokes. If you like the look and feel of traditional Latin machetes, we're sure you're going to love the extra horsepower available in our two handed model!

D-GUARD LATIN MACHETES

These hybrid machetes combine the amazing cutting power of the Latin Machete with the incomparable hand protection of our Cutlass Machete. The thick solid steel tang runs all the way through the D-ring guard to give a safe and secure grip, and the entire handle is fully encased in tough, durable and weatherproof injection molded polypropylene.

BOLO MACHETE

Still popular throughout Asia and Pacific Rim, the Bolo Machete features a wide point that shifts its weight forward, making it capable of excellent work when heavy chopping or slashing is required.

GARDEN & CAMP MACHETE

Incredibly intuitive to use, the Garden & Camp Machete is a quick study in economy of motion. By slightly bending your knees and leisurely swinging the machete with a back and forth motion, you can make short work of many cutting tasks. Use it to trim the grass and weeds from your garden, or as a lightweight and handy cutting tool to clear brush from camp sites, hunting blinds and shooting lanes. Use it as a probe in long grass to look for obstructions, obstacles or varmints. Its strong, sharp and long double edged blade is lightweight and a breeze to carry and use all day.

HEAVY MACHETE

The Heavy Machete, as its name suggests, is one of the heaviest models in our lineup. The stout 1055 carbon blade widens toward the tip for maximum cutting and chopping power.

WAR HAMMER

The War Hammer was perhaps the ideal weapon for use against a knight encased in plate steel! The heavy hammer head could crush the strongest suit of plate with just a few blows, and the back spike could open that armor like a can opener!

Already proven to be popular with Historical European Martial Artists and reenactors alike, Cold Steel's® modern interpretation of the War Hammer is highly maneuverable and can be easily wielded with one or both hands. The head is drop forged out of 1055 Carbon steel and differentially heat treated. The point of the spike and hammer face are fully hardened so they can pierce and crush tough materials, while the rest of the hammer is forged to be softer - to absorb the shock of heavy blows. The handle of our War Hammer is 30" of straight grain American Hickory, and topped with a pair of sturdy steel langettes.

VIKING BEARDED AXE

The historically inspired Viking Bearded Axe is a design collaboration between Lynn C. Thompson, and custom bladesmiths Dave Baker and Rich McDonald. The stout 30" American Hickory handle, extra broad and sharp cutting edge, hooking "beard", and up-swept thrusting "horn" combine to make a formidable fighting axe that would be the pride of any Viking's collection!

A Cor-Ex™ sheath, which is sold separately, is available for the Viking Bearded Axe.

VIKING BATTLE AXE

Our Viking Battle Axe is intended to be used as a stand-alone weapon, but it can be paired effectively with a sword, shield, or long sax. It's a cutting, chopping, stabbing dynamo that any Viking worth his salt would envy.

It's drop forged and features a wide curved cutting edge that terminates in horns or "points" on the ends. This means you can stab, parry, or hook shields or "limbs" with ease.

Like our Viking Bearded Axe, it comes with a premium 30 inch long American Hickory handle which is long enough to accommodate two handed use!

AXE GANG® HATCHET

We've never hidden our enduring love of Martial Arts or our passion for movies. Many of the crew here at Cold Steel® study and train in at least one Martial Art, and several members of our team also work in Hollywood as weapons consultants, stunt men and fight choreographers.

The classic Chinese hatchet has appeared in countless Kung Fu movies over the years, and we've always been fascinated with its use!

Our interpretation of this classic blade, the Axe Gang® Hatchet is no mere movie prop! It features a differentially heat treated, drop-forged head - which has a hard edge capable of reaching razor sharpness, but a soft steel body for absorbing impact.

It also features a hand-picked straight grain American Hickory handle embellished with the Kanji characters for "Axe Gang."™ This stylish and iconic hatchet is as eye catching as it is durable. Add one to your collection today!

90AXG
AXE GANG
HATCHET

COMPETITION THROWING HATCHET

We've modified our Axe Gang Hatchet, to meet regulations for competition axe throwing in your favorite league. Now you can customize your competition throwing hatchet with your personal logos and bring your strongest game to the tournament!

PROFESSIONAL THROWING HATCHET

For those wanting the convenience of a quick-change handle we are now offering a Professional Throwing Hatchet. Thanks to its patent pending locking mechanism all you have to do to change a worn or damaged handle is to loosen the bolts, slip out the worn handle and exchange it for a new one and retighten the bolts. Now you can change your handle and be throwing again in under 2 minutes.

HUDSON BAY CAMP AXE

Our Hudson Bay Camp Axe is faithful to historical examples stretching back over 100 years.

Sized to be convenient to carry on every outdoor adventure, it's an essential tool you won't want to go into the woods without.

Best of all, it features our ground breaking clamp-like locking mechanism which is so ruggedly hard to "pull off" that it doubles the industry standard! Additionally, it's possible to change out a broken handle in just minutes.

What's more, if you're caught in the wilderness, a field-expedient replacement handle can be improvised from nearly any piece of wood available.

HUDSON BAY CAMP HATCHET

This cunning little hatchet is small enough not to be a "pain" but big enough to chop and cut in a substantial way. It's a great accessory/tool to carry on any outdoor adventure.

It shares the same clamp-like locking mechanism of our Hudson Bay Camp Axe and has a blade shape that has been proven over hundreds of years to be very effective and versatile.

TRAIL BOSS

The Cold Steel® Trail Boss is compact enough to carry all day in your hand or strapped to your pack, yet tough enough for chores that would make a hatchet or tomahawk scream for mercy.

Featuring a European style head with a 4" blade and a 4 1/2" cutting edge, it takes a big bite with every swing. Plus, it features a very sturdy, durable straight-grained American Hickory handle. In our extensive field-tests in the outback of Australia, the Trail Boss was used to chop kindling, clear roads and trails, to build blinds and even to chop down a fair sized tree!

DROP FORGED TOMAHAWKS

Our high-quality tomahawks are precision drop-forged from 1055 Carbon steel. The Drop forging process offers many distinct advantages for the production of impact tools, particularly ones that require a cutting edge.

By using a series of progressive dies affixed to high-powered hammers, the steel is kneaded and compressed into a completely homogenous mass, creating a very uniform grain structure and minimizing imperfections.

All of our Tomahawks are also differentially heat treated. With a cutting edge and hammer face that is fully hardened to take a keen edge, while the body of the blade is kept soft to absorb the shock and impact of striking blows.

All of the tomahawks shown here feature American Hickory handles and most can be complemented with an optional sheath (sold separately).

THE AMERICAN TOMAHAWK COMPANY® IS A REGISTERED TRADEMARK AND A DIVISION OF COLD STEEL®, INC.

TRAIL HAWK

Modeled after an early frontier pattern, the Cold Steel® Trail Hawk has proven to be incredibly popular with Survivalists, Preppers and Outdoorsmen, who admire its versatility and durability. It's an excellent chopping tool and has a functional hammer poll with a hardened face so you can drive nails and hammer in stakes. Best of all its extremely lightweight and a cinch to tuck it under your belt or lash it to a pack or shooting bag.

HUDSON BAY TOMAHAWK

Almost every tomahawk you can buy on the market today can trace its roots back to the Hudson Bay Axe used for centuries in the vast forests and swamps of North East Canada. Famous for its versatility and effectiveness, the Hudson Bay Axe became indispensable for anyone trying to wrest a living out of the wilderness.

We too are also great admirers of this famous axe pattern, so we decided (like so many before us), to re-scale it down into tomahawk format.

Drop forged out of 1050 Carbon Steel, like all of our hawks, it offers a 3 1/2" long cutting edge in the classic shape as well as a substantial "poll" that can be used for pounding, crushing, and hammering. You can even drive nails and spikes with it as it too, like the blade, is differentially hardened.

Supplied with a tough, straight grain American Hickory handle, it's ready for a life in the woods and in a pinch will also double as a frighteningly effective weapon.

SPIKE HAWK

Our Spike Hawk features a differentially heat treated and drop forged blade and tough steel spike.

This unusual hawk is very popular with sport throwers, who admire its ability to deeply "stick" into wooden targets by blade or by spike - Effectively doubling the chances of a successful throw!

Additionally, a hand crafted leather sheath (designed to safely house the point and edge) is also available and sold separately.

RIFLEMAN'S HAWK

The Rifleman's Hawk has a functional hexagonal hammer poll designed for serious work, like pounding nails or stakes. Reminiscent of some early American designs, the Rifleman's Hawk features the "peace pipe" appearance that was commonly used by Native Americans during the last century. In terms of fun and sport, this hawk throws and sticks extremely well. If you want something that hits its target like the proverbial "ton of bricks," then the Rifleman's Hawk is for you!

FRONTIER HAWK

Suitable for re-enactors from any period stretching from the French and Indian War clear up to the final settling of the West in the late 1800's, our Frontier Hawk is a joy to use!

It's as light as some camp hatchets, but its design allows for a vast and varied amount of cutting potential!

OPTIONAL SHEATHS

Sheaths are available for some of our tomahawk line. All sheaths are sold separately.

SPONTOON HAWKS:-

DIAMOND SHAPED BLADE & SLOPING POINT BLADE

While most tomahawks are chopping tools there was a less popular alternative known as a spontoon hawk. Made with a blade expressly designed for piercing it was capable of delivering deep puncture wounds that were quite lethal. Often found with a sloping or diamond shaped point and sharpened on both sides the Spontoon hawk offered little to no utility value but was undeniable a fearsome and brutally effective weapon.

Today modern made spontoon hawks are extremely rare (outside of the cheapest quality imports) so we decided to remedy the situation with our own models. Available in faux pipe hawk style they feature classic sloping and diamond shaped blades that can be fully sharpened!

NORSE HAWK

The influence of the Viking's famous weaponry far out-lasting the reign of the Vikings themselves. Their axes in particular, have influenced many designs that can be seen to this very day.

Our Norse Hawk has a curved cutting edge to facilitate deep, slashing cuts and terminates in two sharp points. Traditionally, the bottom point would be used to capture an opponent's shield, leg, arm, shoulder or neck, momentarily immobilizing or bringing him closer and easier to dispatch. The top point was used to execute direct chops or, with a thrusting motion, to pierce or gouge.

The Norse Hawk remains one of our most popular Tomahawks. Both with reenactors and with sport throwers, who admire its balance, effectiveness and effortless sticking power!

WEeping HEART TOMAHAWK

Lynn C. Thompson has been training with an aluminum Weeping Heart Tomahawk for over 10 years and likes it so much we decided to duplicate it in drop forged steel. Offered with an extra long blade and spike with the characteristic heart cut out it provides lethal chopping and piercing power from either end. And as an added bonus its extra long length is a huge boon when slapping, parrying, blocking, catching and trapping an enemy's weapon.

PIPE HAWK

Precision forged from 1055 carbon steel, Cold Steel's® Pipe Hawk offers a long, wide cutting edge and a solid, fully hardened hammer poll that's turned and ribbed to mimic a traditional hollow pipe bowl.

It's fitted with a 22" hickory handle and is heavy enough to be effective as a chopping tool, plus, its solid bowl will drive nails, spikes and stakes with the power of a framing hammer.

NOTE: THIS DOES NOT FUNCTION AS A SMOKING PIPE.

TRENCH HAWK® & WAR HAWK®

The Cold Steel® Trench Hawk® features a sharp cutting edge and wedge-style spike, offering numerous tactical "options" for our nation's modern warriors. Drop forged from 1055 carbon steel and differentially hardened, the head of the Trench Hawk® will withstand tremendous blows as well as the awful stress of prolonged hard use.

The Polypropylene handle of our Trench Hawk® is highly resistant to shock and will withstand abuse that would break even a tough hickory handle. And, as an added benefit, is easily and cheaply replaced when finally worn out from repeated throwing.* The Trench Hawk® comes complete with a patented articulated Secure-Ex® sheath.

Our War Hawk® combines the tactical styling and material used in our popular Trench Hawk® with historically inspired design elements from fighting hand-axes of old. With its wide "bearded" axe head and curved reinforced reverse Tanto style spike it is a thoroughly modern tactical tomahawk and breaching tool! Each War Hawk® is supplied with a patented articulated Secure-Ex® sheath.

SPETSNAZ® SHOVEL SERIES: SPECIAL FORCES SHOVEL & TRENCH SHOVEL

Our Special Forces Spetsnaz® Shovel is modeled after an original Soviet "Spetsnaz" military entrenching tool. It has a stout hardwood handle, a broad flat steel blade and 3 sharp edges. It's ideally suited for digging foxholes and bunkers, to chop branches, build shelters, act as an improvised paddle, and even as a last-resort weapon of defense! It's even an excellent alternative to a Tomahawk for sport and recreational throwing!

Our larger variation, called the Spetsnaz® Trench Shovel, has all the winning features of the Special Forces model, with the added benefit of enhanced size. It is 50% longer in length, and has a slightly larger shovel head.

SC92SF OPTIONAL SHEATH FOR SPECIAL FORCES SHOVEL

An optional sheath (sold separately) is available for the Special Forces Spetsnaz® Shovel. It is made of Cor-Ex™ and features an integral belt loop.

NOTE: This sheath only fits the smaller model. It will not fit the larger Spetsnaz® Trench Shovel.

HONEY COMB

Look smart and feel secure anywhere with our personal grooming aid, the Cold Steel® Honey Comb.

Precision manufactured at great expense, it has the innocuous appearance of a simple hairbrush, but the fully functional brush also acts as a sheath that conceals an effective stiletto!

Rather than use metal, the Honey Comb has been injection molded from Zy-Ex - a tough, stiff nylon and fiberglass composite. We believe the Honey Comb is the all-round answer to personal defense at home, at work or overseas. As a hairbrush it's particularly appropriate in glove compartments, luggage, a backpack, or a woman's handbag, and its unassuming appearance won't turn heads or draw unwanted attention.

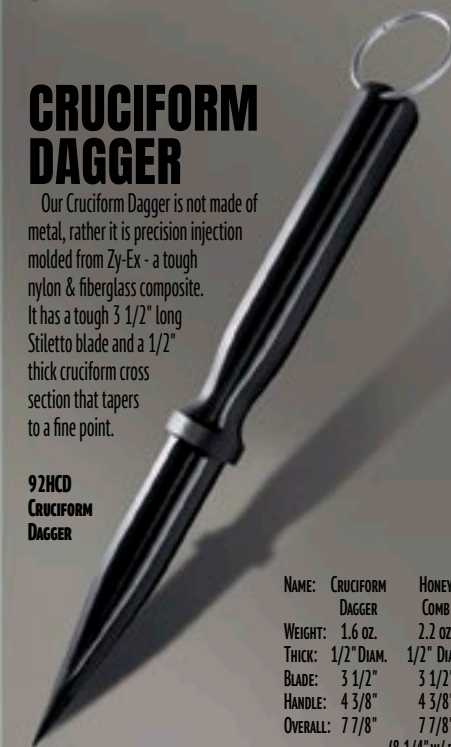

92HC
HONEY COMB

CRUCIFORM DAGGER

Our Cruciform Dagger is not made of metal, rather it is precision injection molded from Zy-Ex - a tough nylon & fiberglass composite. It has a tough 3 1/2" long Stiletto blade and a 1/2" thick cruciform cross section that tapers to a fine point.

FGX® NIGHTSHADE SERIES FEATURING: NOMET TECHNOLOGY®

Made from Griv-Ex™ - the latest in fiberglass reinforced plastic - our FGX® Nightshade series knives are UV and heat stabilized to make them incredibly durable. The handles of these unusual knives are made from deeply checkered Kray-Ex™ that's molded directly onto the blade tangs. This offers a slightly tacky-feeling textured surface that will give you a decisive and secure grip whatever the weather.

Our FGX® Nightshade blades are unaffected by moisture. They never rust, warp, crack or split even in the most challenging environments. They are light enough to be tied, tucked, or taped just about anywhere, and, since they are unaffected by all but the most extreme heat and cold, they are a natural choice for concealed storage both inside and outside of your house - from hedges and flowerpots, to the refrigerator or the shower!

FGX® BALISONG SERIES

Our FGX Balisongs are not toys, but it is awfully hard to make yourself stop flipping them. Made entirely of Griv-Ex™ and other strategic non-metal materials, they are a marvel of injection molding at a ridiculously low price!

Both models feature sharp reinforced points. The tanto version has a plain edge and the double edge model comes with our "grip and rip" serrations that will cut to the bone.

Their handles and their retaining latches have been carefully engineered to give the necessary weight for hours of flipping fun while remaining all business when it comes to strength and reliability.

FGX® RING DAGGER

Our FGX Ring Dagger mimics our Drop Forged Battle Ring II in almost every respect except one. It's injection molded from Griv-Ex™ to make it far lighter in weight and highly affordable. Equipped with a sharp reinforced point and twin "grip and rip" serrated edges, it's "no joke" when it comes to self-defense and thanks to its integrally molded ring it offers eight grip options to suit any situation or preference.

FGX WASP

We have tried to make our FGX Wasp dagger look and feel as close as humanly possible to our Drop Forged Wasp. While significantly lighter in weight, it still offers amazing piercing power and will glide through soft targets like they were made of butter! For cutting power, we have equipped both edges with our "grip and rip" serrations, so it will cut exposed flesh to the bone.

Offered at a ridiculously low price, it's a bargain you won't want to pass up.

FGX® CHAOS®

The FGX Chaos® is an all Griv-Ex™ version of our own Chaos® Stiletto. It features an isosceles triangular cross section with hollow ground fullers creating three edges and a slightly curved tip that terminates in a needle sharp point.

DELTA DART

The Delta Dart's ergonomic handle is knurled for a secure grip, while the butt is rounded for both thumb and palm reinforced positions. Its triangular cross section gives it phenomenal piercing power.

An optional neck sheath is also available.

POCKET SHARK®

They say "the pen is mightier than the sword" - and Cold Steel® makes some mighty swords, but the Pocket Shark® makes for some clever competition. It's the biggest, baddest, permanent marker around!

The Pocket Shark® is made from a high impact polymer and features walls that are 4 times thicker than conventional markers. This means it's built for impact and will survive the meanest blows and roughest treatment imaginable. Plus, the screw on cap will stay in place and won't pop off like a regular marker and leak all over your clothes.

91SPB
POCKET SHARK®

Clip it to a shirt or coat pocket, or carry in your purse, pack or brief case. There's simply no excuse not to own one!

KOGA SERIES

The late Bob Koga remains an icon in the world of self-defense and law enforcement. An Air Force Veteran and LAPD Officer, with extensive Martial Arts training in Judo, Wrestling, Jiu Jitsu, Jo Do and Aikido, he became an outspoken proponent of the merits of the straight baton as opposed to the PR24 or side handle baton. The Cold Steel® Koga series are made of a high-impact polymer, and are designed to function as an aid in leverage when restraining an individual, and obtaining joint locks or submission holds. But they also serve as an admirable "intermediate impact tool". Law enforcement professionals often face a perplexing dilemma when contemplating employing fist or baton blows. Blows struck with the fist may be too weak, or worse, result in a broken hand, while blows struck with a baton may be too powerful resulting in grave injury. One solution however, is the Koga SD - bridging the gap by concentrating and magnifying the effect of hand blows while minimizing the likelihood of permanent injury.

BROOKLYN SERIES

Ever since their release back in 2006, our Brooklyn Series of Baseball Bats have been consistent fan favorites! Precision injection molded out of the heaviest-grade high-impact polypropylene that we can find, they are not only stronger than most traditional bats, but they are more durable too!

These unimaginably strong Bats won't rot, crack, or splinter or even fade! You needn't worry about dirt affecting them either, since they're almost impervious to the elements and clean up with little more than soap and water. Perfect for school or league games, they can be used as game bats, practice and warm-up bats or even serve as crossover trainers to develop strength and hand/eye coordination for those studying Martial Arts. From our micro sized Souvenir Bat (the Brooklyn Shorty) to our epic over-sized Whopper, and all of the other models in between, we're sure to have the bat for you!

BROOKLYN BANSHEE

The Brooklyn Banshee, or "sticker bat", was made with everyone in mind. We gave it a smooth finish so you can customize it with stickers in any way that you please, so you can make this bat your own. At 32" long and just a hair over 2 lbs even the youngsters can take this bat anywhere to show it off. Coming with a soft, faux bat tape grip that lets you sink your hands in for ultimate comfort plus a very secure hold, and a perfect weight to length balance, this bat will always have you ready for draft day. You won't even want to hide this thing under your bed or in the back of the truck, after its been decorated you'll want to display it everywhere for all your friends to see.

TRENCH HAWK® AND AXE GANG® TRAINERS

Supplement your training with hard-wearing replicas of our two most popular designs. The Axe Gang® trainer and the Trench Hawk® training tools both closely duplicate the feel and size of their sharp counterparts, while being considerably safer to train with!

BUCKLER SERIES MEDIEVAL BUCKLER

The Buckler is a small historically inspired shield about the size of a large dinner plate. Cold Steel's® sturdy training replica has a thick, raised boss to protect the hand, and a rugged handle that will withstand plenty hard of use. Hugely popular with HEMA practitioners and historical reenactors

SOLDIER'S TARGE

Also available, due to popular demand, is our Soldier's Targe. While very similar to our Buckler, it's about twice the size and just as stout and reliable. Appropriate for training with all non-steel swords, it's sure to provide years of hard service.

MINI BUCKLER

The fist-sized Mini Buckler is smaller and more maneuverable at deflecting blows than our larger models. Its size gives it distinct blocking and defense advantages in situations where a larger buckler might be an impediment.

STEEL TRAINING SABER

A pair of much-used and worn "Hutton Style" military sabers has been in our Cold Steel® Salle D'Armes for nearly 15 years. Lynn Thompson, Luke LaFontaine and Anthony DeLongis have trained with them weekly for years, and now, we have finally brought our own interpretation of this excellent training tool to the market.

Our Steel Training Saber is deeply curved and fullered, blunted for training and with a forgiving spring temper for practice and sparring. Its substantial pierced steel guard has reinforced rolled edges for extra durability, and its tightly wrapped wire and leather grip will offer years of use as a dedicated training tool.

Super lightweight, agile and perfectly balanced, this is a must-have training tool for any historical fencer or HEMA practitioner!

BALICKI STICK

Guru Ron Balicki has had a long association with Cold Steel®, and his contributions to our success have been invaluable. Ron is known world-wide for his vast knowledge of Filipino Martial Arts, Thai Boxing, Boxe Française, Silat, Shootfighting, and Degerberg Mixed Martial Arts, as well as being the founder and chief instructor of MARS (Martial Arts Research Systems), overseeing 2000 MARS instructors and students globally. Lynn C. Thompson, has been Ron's private student and training partner for 20 years! Ron has learned a thing or two about fighting sticks and we are proud to introduce his favorite, the Balicki Stick. Slimmer, shorter, and substantially lighter than our standard Escrima Stick, it exhibits Ron's preference for speed and agility.

It's made from high impact virgin Polypropylene and has a subtle wood grain finish. Ron's name is featured in brilliant silver and there are silver bands at each end for visibility and style. It's a must have training stick for anyone interested in the Filipino Martial Arts.

BALICKI TRAINER

Now we are also offering a "soft" Balicki Training Stick as well. Made with a high impact plastic core and overmolded with foam, and another layer of Polypropylene, it offers a greater margin of safety and comfort. Ideal for solo training and sparring, it's sure to give many hours of hard use like its heavier brother. However, eye and hand protection are definitely still required!

SUBURITO

The Suburito is a specialized ancient training weapon that's meant to simulate the weight of a real Japanese sword. Primarily intended for solo practice or cutting drills, it inspires respect, as it hits with terrific force. Our interpretation was inspired by a wooden Suburito in Akido 5th Dan, Andrew Demko's private collection. Lynn C. Thompson trained with it for several months, and resolved to create one for Cold Steel®.

Injection molded from virgin high strength polypropylene with a long handle and square tip, it's enormously resistant to breaking and will never shrink, rot, crack or splinter like a wooden Suburito is prone to do. It's built to provide many years of hard service and, if used faithfully, it will surely make you a better swordsman.

It has an elegant wood grain finish and bears the five major precepts of Japanese sword cutting, written in Kanji characters.

SIJAMBOK

In Africa, the Sjangbok (Sham-Bawk) is a cattle prod, whip, riding crop and an effective means of self-protection, whether from venomous snakes, or from varmints of the two-legged variety!

Unlike most western style whips which require a rolling "crack" to function, the semi-rigid Sjangbok is swung like a rod or stick. The weight, speed and flexibility of the Sjangbok's lash does all the work, and little skill or training is required to wield it effectively. Our synthetic polymer version of the classic Sjangbok features a thick injection molded lash, and is equipped with a soft comfortable Kray-Ex™ handle that's designed to resemble braided leather.

Since the Sjangbok is made entirely from super-tough polymers, it's incredibly durable and able to withstand weather conditions which would cause a traditional leather whip to break, crack or mildew.

ESCRIMA STICK

Our Cold Steel® Escrima Stick resembles a traditional rattan stick used by Filipino Martial Artists in length, weight, and cross section.

Injection molded from super tough black high-impact polypropylene, it weighs a little over 15 ounces and measures 32" long and 1" in diameter. Unlike rattan, it resists mildew, and won't dry out, warp, crack, splinter or shrink. It's also amazingly durable and resistant to impact stresses.

Furthermore, our Escrima Stick can easily be modified to any length to suit your personal requirements. We're confident that you'll want to add one or more of these durable sticks to your training gear!

TRAINING STAFF

Thanks to pioneering innovations in the world of high-strength polymer production Cold Steel® is proud to offer our first synthetic training staff! Lynn C. Thompson found that a hard wearing octagonal "Okinawan style" Japanese Staff was an excellent training tool for cross-training across multiple Martial Arts disciplines. Perfect for pell work and for conditioning training, this high-impact staff will make an excellent addition to any Martial Artist's training regime!

BLACKTHORN SHILLELAGH

BLACKTHORN SERIES

Our Blackthorn sticks are built for strength and durability out of high impact polypropylene. Unlike wooden sticks found in nature, ours will not warp, crack, swell, or splinter.

They are made to resemble Blackthorn examples from nature, but artfully designed to a point where they not only mimic nature, but actually rival and supersede anything the natural world could produce! If nature had fashioned the most perfect Blackthorn sticks, and you were lucky enough to own some of them this is what they would look like. They are incredibly durable, and are easy to clean with a little soap and water.

IRISH BLACKTHORN WALKING STICK

The most well-known incarnation of the classic Blackthorn stick was the Irish Shillelagh – a tool that was so fearsome in trained hands that the English outlawed it! To circumvent this law, the Irish modified the Shillelagh into the classic walking stick that we are familiar with today. Our modern interpretation of this beautiful and historically significant walking stick is an incredible re-creation of an authentic Blackthorn stick.

BLACKTHORN STAFF

The Blackthorn Staff (almost 5 feet long) represents the culmination of years of costly research and development in the world of injection molding and high-impact polymer production.

This king-sized hiking staff, with its rustic wood-effect texturing, "clipped thorn" nodules and polished faux-wood knob is sure to be an unusual and much talked about part of any collection.

BLACKTHORN SHILLELAGH

Modeled after an ancient cudgel in Lynn C. Thompson's private collection, the Blackthorn Shillelagh mimics the look, feel and balance of the original. With a handsome bark-like wood texture and raised "clipped thorns" on the shaft, and a highly polished faux-wood head, this good looking stick will be sure to turn heads – whether it is carried under your arm at a historical re-enactment event, or simply hung by the door to greet uninvited guests.

1911 GUARDIAN II WALKING STICK

You can add a bit of 1911 pistol flare to your personal style by carrying our patented 1911 Guardian II Walking Stick. It has a handle that closely mimics the characteristics of a 1911 pistol grip in terms of size, shape and thickness, and it features thin, pebble grain synthetic grips. If you choose, you can modify your cane to your own tastes, because it can accommodate most custom 1911 pistol grips easily.

The tough and sturdy shaft is made from seamless 6061 Aluminum with a 3mm wall thickness. It's heat treated for strength so that it can support heavier loads without breaking. It's also capped with a custom-made rubber ferrule for extra traction, so it resists slipping or sliding on wet, icy or uneven surfaces.

WEIGHT: 24.1 oz.
HEAD: 4 1/2"
OVERALL: 37 3/4"
MATERIAL: 6061 ALUMINUM

CITY STICKS

These classy walking sticks are just as at-home at the opera as they are on a stroll through the urban jungle!

Our City Sticks are made out of eleven layers of super-tough fiberglass which, in our impact tests, proved to be astonishingly durable. Our City Sticks are topped with a mirror polished 6160 Aluminum head. Choose between the classic standard "scent stopper" head, or our pistol grip style - which is designed to fit one's hand like a 17th century pistol butt.

Both heads are also removable so that they can be easily engraved or modified to suit your tastes. The base of each of our City Sticks are fitted with a thick, rubber non-slip ferrule.

WEIGHT: 15.7 oz (REG.)
17.2 oz (PISTOL)
HEAD: 1 5/8" (REG.)
2 1/2" (PISTOL)
OVERALL: 37 5/8"
MATERIAL: 11 LAYER FIBERGLASS

DRAGON WALKING STICK

Our Dragon Walking Stick is modeled after an antique carved stick from Lynn's private collection, and painstakingly reproduced using expensive, hand-engraved custom molds.

The level of detail is astonishing, with scales running the full length of the undulating shaft, and a fearsome visage with snarling fangs, it is an eye-catching stick you'll be proud to carry and use. It is fashioned from the highest grade high-impact Polypropylene, assuring impressive strength and durability as well as weather-resistance.

WEIGHT: 36 oz.
HEAD: 4 5/8"
OVERALL: 39"

LUCKY DRAGON WALKING STICK

In China, red is a popular color during New Year and other holidays, and it is often used to signify that something is lucky or capable of bringing good fortune. We are proud to offer this vibrant lucky red Dragon Walking Stick in our lineup!

AXE HEAD CANE

The Cold Steel® Axe Head Cane is a direct response to our beloved fans, friends and customers.

For years now we have been asked to bring out our very own crook-top walking stick. Well, we listened - and we haven't been idle!

The Axe Head Cane represents the culmination of years of design and development. Combining our own study of the combative use of crook-topped canes in the world of Martial Arts with inspiration from historical hatchet-headed

walking sticks, we created a new axe-headed cane that remains perfectly innocuous for everyday use, but can be deployed in a myriad of different ways in a last ditch self-defense situation.

Made from high-impact Polypropylene, the Axe Head Cane will withstand even the harshest weather conditions and will never crack, warp or rot like a conventional wooden stick.

WEIGHT: 29.3 oz.
HEAD: 6 5/8"
OVERALL: 38"

HEAVY DUTY CANE

The Heavy Duty Cane features an extra strong partial crook handle made from heavy duty nylon, and a 2mm thick aluminum shaft that's heat-treated for strength. The tapered shaft is capped with a thick rubber ferrule for better traction on slick, icy sidewalks or uneven terrain.

WEIGHT: 15 oz.
HEAD: 4"
OVERALL: 37 1/2"
MATERIAL: ALUMINUM SHAFT

AFRICAN WALKING STICK

Lynn C. Thompson has spent a lifetime collecting walking sticks and wooden weapons, and has amassed quite a collection of these beautiful handmade sticks. He has always had a particular fondness for the Knob Kerrie, a ball headed walking stick from Africa.

Our interpretation features some of the finest features of the traditional Zulu Kerrie - the undulating shaft, and distinctive geodesic ball - but instead of using expensive exotic hardwoods, we've made ours out of high-impact Polypropylene.

This means that, in addition to being incredibly durable, it won't rot, warp, crack, splinter, swell, shrink, mildew or fade. Although its primary function will always be as a walking stick to aid one's balance when crossing uneven, slippery or rough terrain, it also makes a formidable self-defense option in an emergency.

WEIGHT: 25.3 oz.
HEAD: 2 3/4"

WALKABOUT

The walking stick is so much more than just an aid to stability for the injured, ill or infirm. As any hiker or outdoorsman will tell you, it's also an excellent tool for traversing rough, slippery, uneven and treacherous terrain, a useful pointer or probe - and in dire straits it makes a capable self-defense option!

The Walkabout is made from incredibly durable and highly impact resistant polypropylene. Unlike wood, it's extremely weather resistant, and withstands inclement conditions that would cause a conventional stick to crack, warp or rot.

The Walkabout's handsome wood grain texture provides an excellent grip without sacrificing comfort or ease of use, and its simple one-piece construction makes it unbelievably tough while still remaining light enough to carry and use all day!

POLYPROPYLENE TRAINING SWORDS

Martial Artists have known a simple truth for ages - If your ultimate goal is to wield a sharp blade safely and effectively, you need to supplement your training with a tool that approximates the size, feel and heft of a blade, yet minimizes the possibility of causing grievous, permanent injury to yourself or your training partner. This concept was implemented by many cultures, including the ancient Romans, who used wooden swords to train their Gladiators. The only problem was that wooden training tools can rot, crack, chip or splinter and could not be used in all weather conditions. Cold Steel's® solution to these dilemmas was to design a line of synthetic polymer substitutes.

Low in cost and unaffected by all but the most extreme temperatures, they are waterproof, weatherproof and astonishingly durable.

JAPANESE STYLED TRAINING SWORDS

Our Japanese Training Swords are closely modeled after our world-famous Warrior series swords.

Their wide blades imitate the flowing lines of our Warrior swords, but as they are made from super tough polypropylene, with no sharp edges or points they are perfect for armored sparring, training, conditioning drills and "pell work".

Each model also features an intricately detailed imitation cord wrap grip, offering superior control even when wearing heavy gloves. Our Training Swords offer superior heavy-duty training potential for the modern Martial Artist.

TRAINING FIREARMS

Cold Steel's® Training Firearms are perfect for use by Military & Law Enforcement personnel, Personal Protection and Security Professionals and civilian Martial Artists.

Made from ultra-durable thermoplastic rubber, they are stiff enough to train drawing techniques from the holster and disarming techniques in close quarter training, but just soft enough to use in hand-to-hand striking situations with relative safety.

Strong enough to survive hours of training, but inexpensive enough to outfit even an entire gym of students without breaking the bank, these practical and tactical training aids are based on some of the most popular firearms in America today - but their bright coloration makes it unlikely that they would be ever mistaken for a real handgun!

COLD STEEL® TACTICAL GLOVES

Cold Steel®, the knife brand made famous for having the utmost concern for hand safety with its invention of the Tri-Ad® lock, is proud to introduce its first tactical glove, specially designed to provide superior hand protection for the knife fighter, martial artist, or shooter in your life. Unlike other tactical gloves, the Cold Steel® glove offers safety and security for your hands without feeling bulky or limiting dexterity, as its palm is comprised of smooth goatskin leather for unparalleled grip-ability and comfort. The top and back of the gloves are cut, slash, and impact resistant, extending through the end of each fingertip, thanks to 5mm of Thermoplastic Rubber (TPR). You're sure to find a pair that's the right fit for you - the Cold Steel® Tactical Gloves have an adjustable hook and loop closure and are available in Coyote Tan or Black in sizes from Medium to XXL.

SECURE-EX® C-CLIPS

Our Secure-Ex® C-Clips, invented by Mike Sastre of River City Sheaths, make it possible to attach your Cold Steel® knives to belts up to 1 1/2 inches wide! Mike's clever design includes mounting slots that facilitate wearing your knife vertically, upside down, or even on a forward or backward slant!

They're available in two sizes to accommodate large and small sheaths, and are supplied with all the essential hardware (screws and rubber washers). Plus, they can be attached to either side of your sheath so, if you want to, you can wear your knife inside your waistband! As an added bonus the C-Clips fit many other manufacturer's and custom knife maker's sheaths as well.

SACLA
C-CLIP LARGE
(PACK OF 2)

SACLB
C-CLIP SMALL
(PACK OF 2)

WARRANTY

We stand behind our knives and swords 100%. We subject them to the highest standards in the industry and strive to make each as perfect as possible. We warrant that our folding knives, fixed blade sheath knives, and swords are free from defects in workmanship and materials.

This warranty does not cover normal wear and tear, re-sharpening of the blade, damage caused by misuse, lack of normal maintenance, or disassembly.

Remember any knife or sword can break or fail if subjected to sufficient abuse, so please do not use our knives and swords inappropriately and remember no knife or sword should be used as an axe, hatchet, screwdriver, or pry bar.
