How to add Yi Home service to Alexa

Alexa skill name

YI Iot Camera

Voice command and samples

you can give commands such as:

"Alexa, show bedroom"
"Alexa, turn on outdoor camera"

* To use this Skill, you need to specify the name of the desired camera, which can be found and configured in the YI Home app

Method

1.Using the Alexa App

# 2. The Recording/Photographing Function

- Click the button to turn on the Recording/Photographing function. Click again to complete the function.

- You can watch the recorded videos and images from this page.

3.Two-way Audio

■ Click the "Talking" button. You can communicate with your baby, pet or the elder clearly whenever you want.

■ Note: Using the two-way audio function, please avoid placing the camera and your phone too close. It may cause noise.

■ Note: If you can't hear the video sound, please check if the Mute button is turned on.
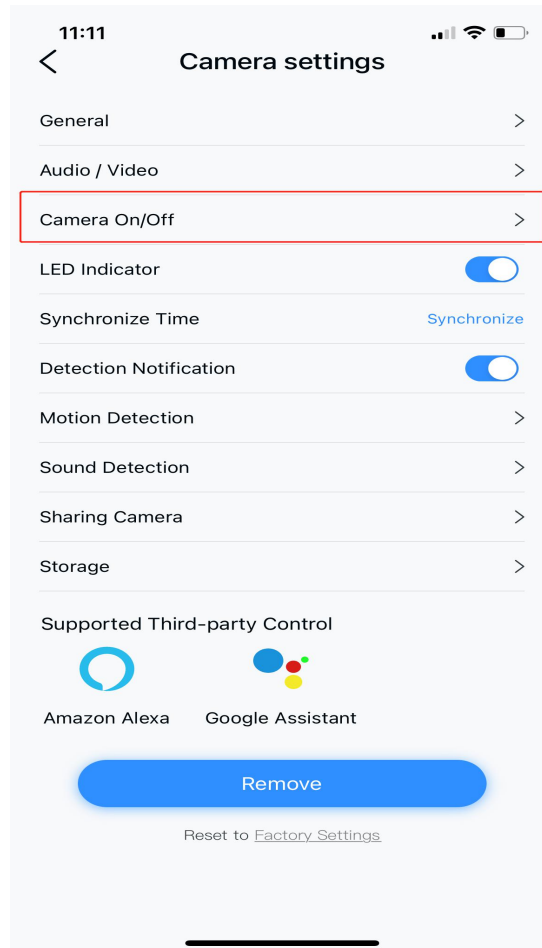

4.Function Page

5.Audio/Video

- Click the button according to your needs

- Rotate Image: If you want to install on the ceiling, you can turn on the mode, rotate the camera screen.

- Note: Please avoid placing the camera through windows, which will effect image quality at night.
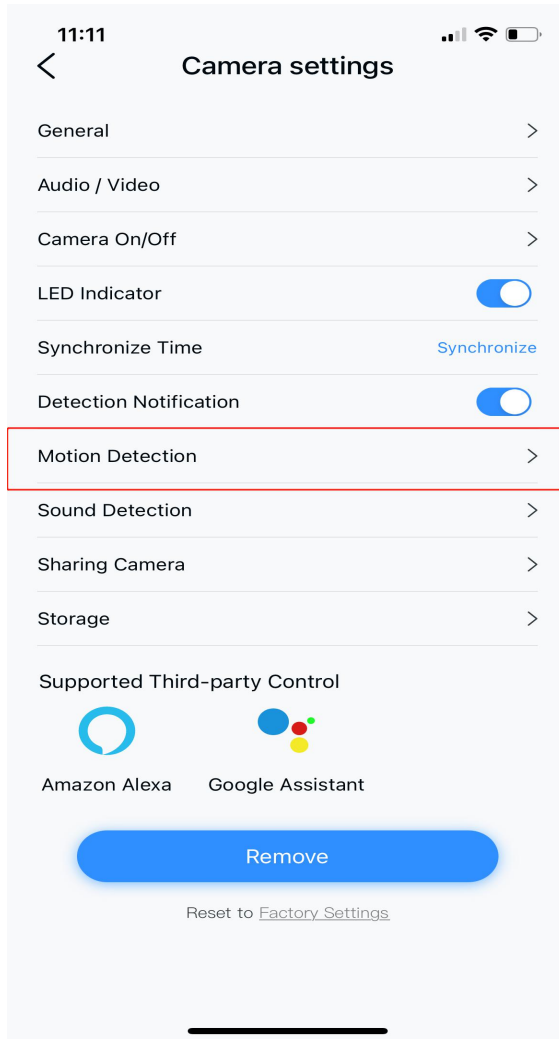

6.Camera on/off

- You can control the camera on/off from your phone.

- Note: Please avoid unplug the camera when you are connecting.

- Note: Please notice that this camera can only work with 2.4ghz wifi.
  --If you have a dual band, please ban the 5 ghz first and then connect the camera with 2.4ghz wifi. After connection, you can turn on the 5ghz.
 (You can search HOW on line)

7. Motion Detection

- Adjustable sensitivity and Schedule of motion detection

- Detection Zone: Select the scope of monitoring

8. Sound Detection

- Adjustable sensitivity and Schedule of sound detection
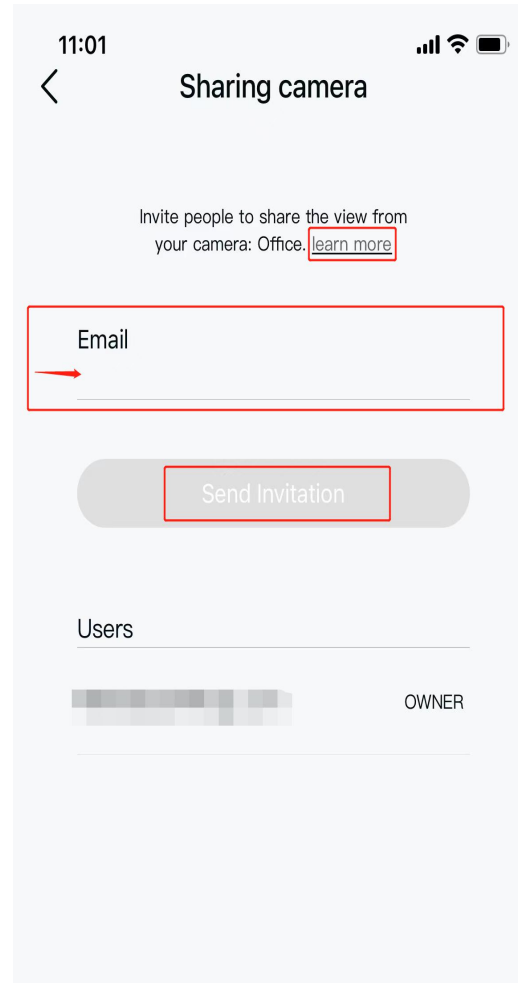

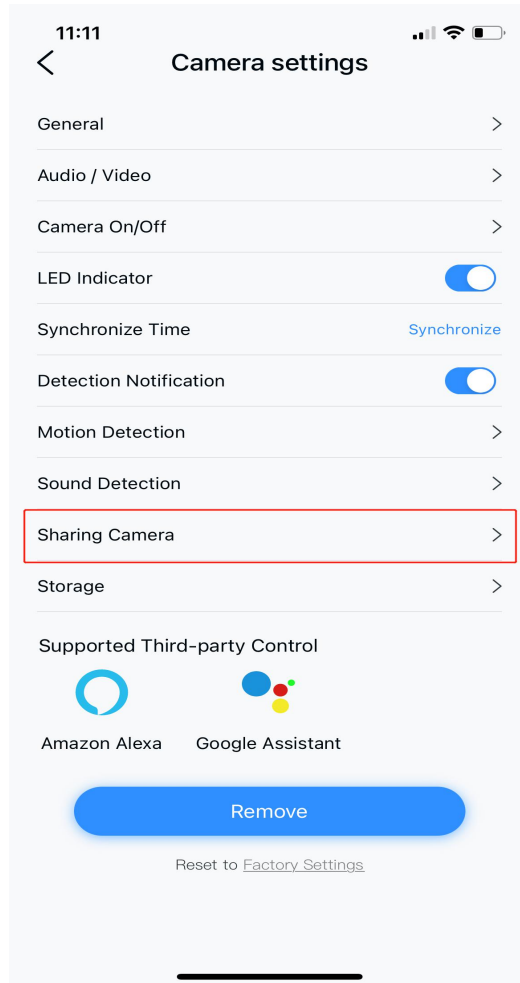

9. LED Indicator/Detection Notification

- If you feel the indicator is too bright at night, you can turn it off in the app.

- If you don't need to receive detection notifications. You can turn it off in the app.

- View motion/sound detection informations. Then you can keep eyes on your house, parents, baby, etc. even when you are out.
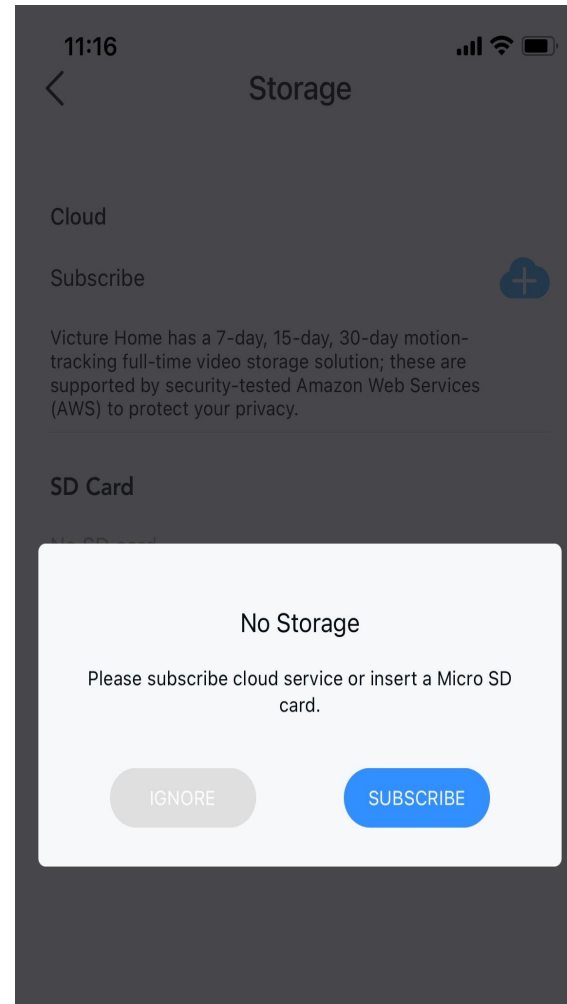

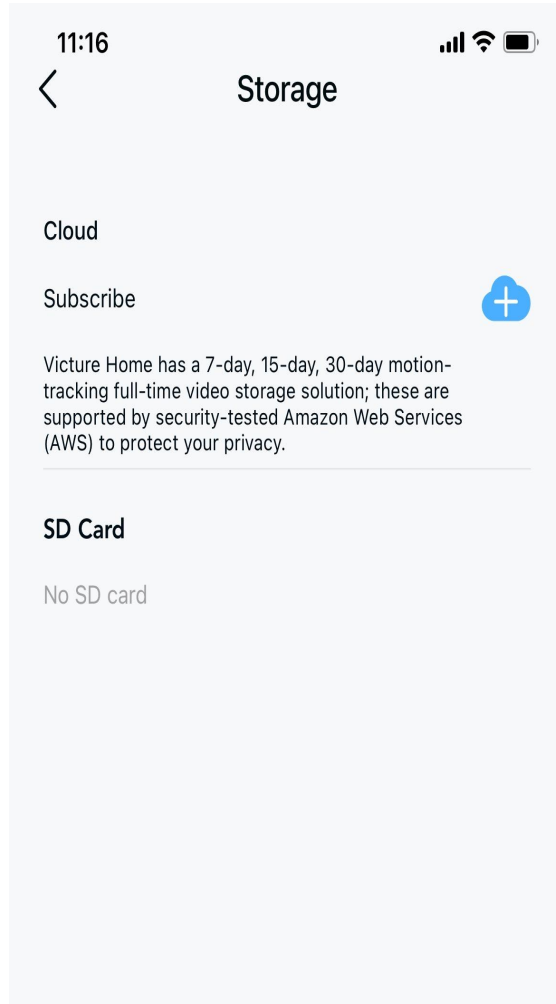

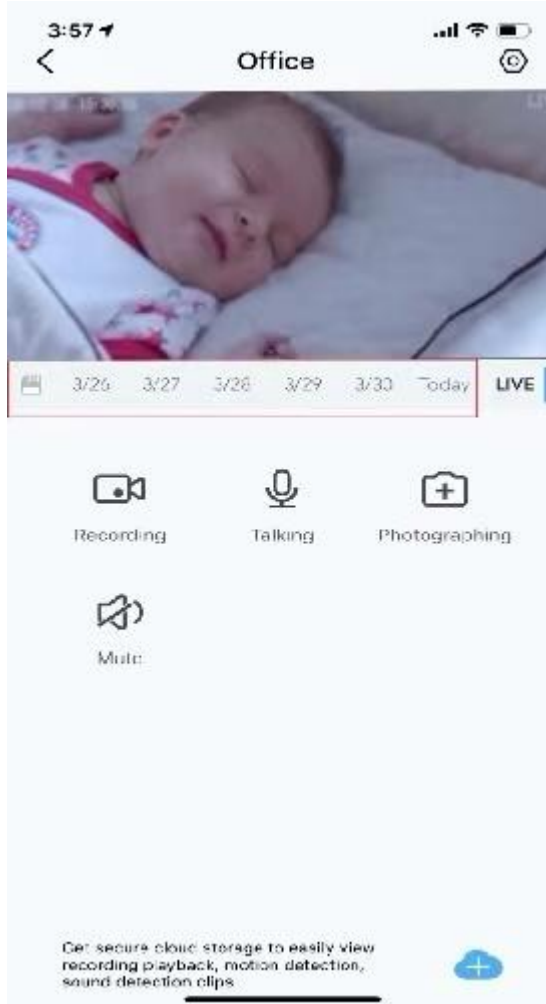

10. Sharing Camera

■ Steps:

1. The shared one needs to download the "Victure Home" APP and register a new account. (Plese choose the same region)
2. Fill in the email address in the app and then click "send invitation".
3. For protecting your privacy, the shared one can only watch the live stream.
4. If you don't understand the operation, you can click "learn more".
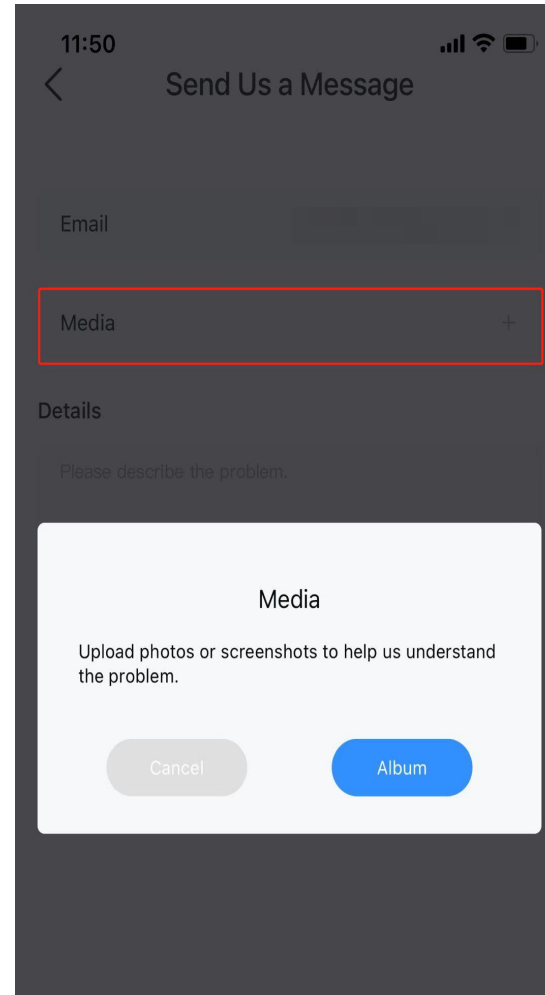

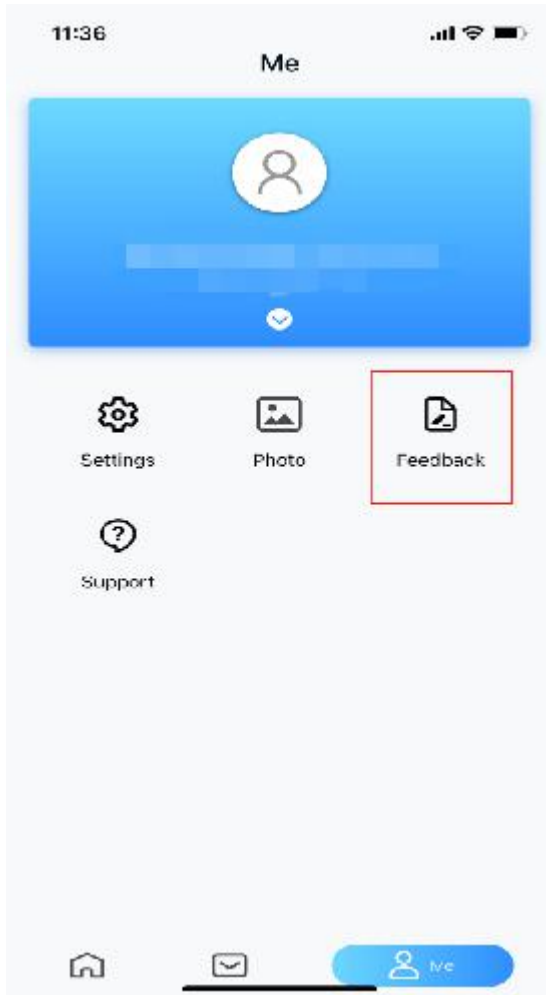

11. Cloud & SD Card Storage

- If you want to watch the video back, Please subscribe cloud service or insert a Micro SD card. Both methods can export the video.

- Note: A 64GB micro sd card at C10 is the best. And please format your sd card before inserting.
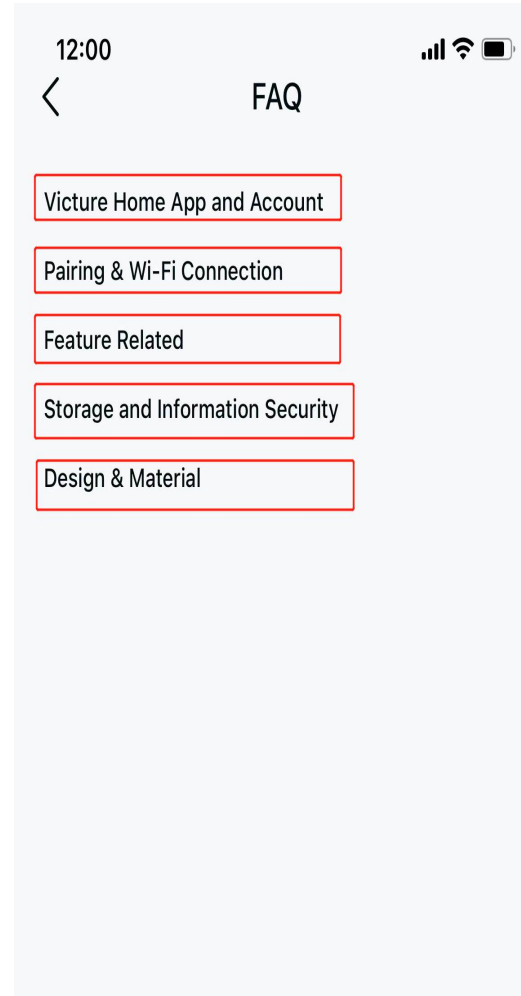

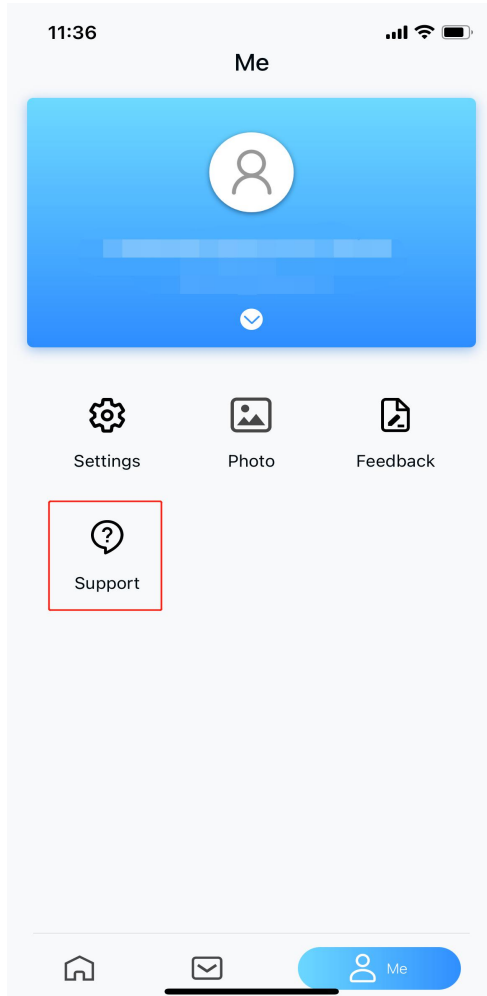

12. History Video

■ Select the timeline and then you can watch the history video. If you recorded with a Micro SD card, you can watch the history video on your computer: Remove the SD card and insert it into your PC.

■ All the video won't take up phone memory.

13. Feedback

■ If you have any questions, you can send us a message. Please feel free to contact us whenever you meet a problem. We will be responsible for all the issues.
