Important Safety Consideration

The following safety instructions ensure the long service life of the projector to avoid fire or electric shock. Make sure to read them carefully and pay attention to all the following warnings.

- Do not install the projector in sites with improper ventilation. Keep the back of the projector well ventilated so it can cool the system without problem. Do not block the ventilation holes.
- Do not install the projector in dust and smoke sites.Do not install the projector near the temperature and smoke transducer. It may cause a sensor failure.
- Do not install the projector in sites with direct blowing of warm and cool air–condition wind. Otherwise it may cause the project failure due to moisture condensation or temperature increment.
- No water–proof function for this projector, Apparatus like vase or cup should not be put around the projector.
- No peeking into the lens while projectors is working.
- Please turn off the projector and cut off the power supply, if it is not used for a long time.
- To avoid risk of electronic shock, do not disassemble or repair the device. Incorrect repair may cause risk of electronic shock or injury to people during operating. If projector is defected, please contact our after–sale service team: **Support.walmart@apemans.com**

Troubleshooting

1. How to get a clear image quality?

A. Recommended using the projector in a relatively dark environment.

B. Place it horizontally, adjust the focus wheel.

C. If use keystone correction, there might be some slight edge blur.

2. What if there is no sound?

All projectors in the market cannot support Dolby audio. If there is no sound, you can turn off Dolby audio on video website like Netflix. (Settings > Display & Sounds > Audio > Dolby Digital Output > Dolby Digital (OFF))

And some files which are coded by Dolby/AC3/DTS may not be able to play sound because of copyright issue. This is the characteristic for all projectors.

3. Can the projector be used outdoors to watch movies?

LC500 can be used outdoors, but please make sure there is a socket, because the video projector needs a power cable to work (included).

4. The remote control does not work.

Make sure the remote points at the IR receiver directly, and do not cover IR receiver.

Make sure you have inserted the battery (not included) into the remote control.

5. There is no icons on desktop/the screen is black when I connect to my computer.

Please press “Win+P” and choose “Duplicate”. Do not choose other modes like “Computer only”.

6. Any other confusion

Please contact us for the following email address if you got any confusion about this projector.
