

# HyperStream

## 1080P Webcam

Capture, create, and stream with the HyperStream 1080P Webcam. Enjoy ultra-crisp, smooth, and vibrant high-definition video quality and frame rates for online meetings, streaming, and more. Plug into any USB port to instantly start streaming without installing extra drivers, apps, or software. Fit everyone into frame, from large teams to presentations, with the 110° ultra-wide-angle lens. Look your best even in low-light settings as the automatic white balance instantly adjusts the lighting and exposure of your video. A pre-set fixed focus range provides the highest resolution without constantly adjusting, even if moving often. Equipped with a noise reduction microphone, your voice will always come through clearly without any unwanted noises. Make your videos sharp and clear with HyperStream.
