

Quick set up guide:

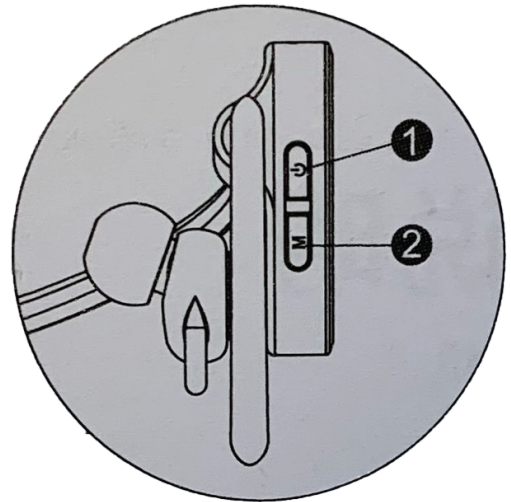

TOKK™ GLOW by UUD

PRED
TECHNOLOGIES™

Thanks !

We hope you will enjoy your new
TOKK™ GLOW.

Please refer to the user guide bellow.

Right Earbud

Connecting to Bluetooth device

- 1- Put on the left earbud (it will be easier to set up as you will be able to listen to the chime and be able to use the right earbud for the buttons).
- 2- Turn on the earbuds by pressing and holding the Power Button (1), located on the right earbud, you will hear "Power on".
- 3- Open the bluetooth of your smartphone, search the bluetooth name : "UUD208" and select to pair.
- 4- The indicator will flash slowly and you will hear a Chime (once you have connected your Earphone once you do not have to do this again, every time you will power the Earphone it will connect to your smart device automatically).

Laser Mode

- 1- With the Earphone turned on, press the M (2) button to turn the laser on and manage the 3 modes, press on M (2) to change modes.

Mode 1: Breathing Mode
Mode 2: Beats on the music
Mode 3: Constant Laser on

You can also download our app "smart life" available on Google Play and App Store. And follow the instructions on this app to Add your TOKK Glow Earbuds.

This will enable even more Laser modes.

Regular Calling

- 1- Press Power Button (1) to answer/hang up calls, press twice the power button to redial.

On and OFF

- 1- When you have successfully connected once the Earphone to your smart device, simply press Power Button (1), the led will flash fast until it connects again to your smart device, then when connected it flashes slowly. To turn off the Earphone press Power Button (1), you will hear a Chime and the led will flash 3 times then the device will power off.
