

Setting up Homey Bridge

Whether you're a brand new Homey user or a skilled pro, the setup of a new Homey Bridge will be a breeze. Take a look at how to get it done!

Box contents

In the box you will find:

- 1 Homey Bridge
- 1 Power adapter
- 1 Power cable

New Homey users

Welcome to Homey! Getting started is easy.

1. Download the Homey Mobile App from get.homey.app.
2. Follow the on-screen instructions to create your Homey account.
3. When you have completed your account, tap on **Set up Homey Bridge** and follow the on-screen instructions.

Existing Homey users

Plug Homey Bridge in using the supplied power adapter. The LED Ring of Homey Bridge will start rotating white, and after a few seconds pulse with a blue color to indicate it's ready for set-up.

1. Open the Homey Mobile App on your iOS or Android device.
2. Navigate to the **Devices** tab → tap the **+** symbol in the top right corner.
3. Ensure Bluetooth is turned on, and the Homey Mobile App has permission for your location. This is needed to find Homey Bridge automatically.
4. Homey Bridge will be found automatically. Press **Connect** to start the set-up and follow the on-screen instructions.

Control your Homey

Once logged in, you will see the home screen of Homey. Here you will have quick actions to control your devices or enable your favorite flows. You will also find a timeline with the latest updates.

In the bottom menu, you will also find the overview of your connected devices. Tap on **Devices** to open this view.

Want to build your own Flows? Tap on **Flows** to open the Flow editor.

Curious to see what else Homey can do? Tap on **More** to see what other possibilities and settings Homey has to offer.

Endless possibilities

To know all about what you can do with Homey, browse our [Knowledge base](https://support.homey.app/hc/en-us), <https://support.homey.app/hc/en-us>, to find all details and tutorials.
