

# SoundRecon Xtreme

## Professional Gaming Headset

Enter the soundscape. Put on the SoundRecon Xtreme Professional Gaming Headset and hear everything in the game — from the booming bass of an explosion across the map, to the subtle rustle in the grass as your enemy tries to sneak up behind you. The 50mm gaming-grade drivers are custom-tuned to deliver high-resolution 3D positional sound, and the Performax-Fit Steel Frame design utilizes a zero-adjust suspension headband that reshapes itself to the wearer, spreads weight over an arc of memory foam padding, and relieves the pressure points around your ears. A suite of gamer-tested features rounds out the SRX pro-gaming experience: passive noise cancellation, a flexible boom mic with an LED mute indicator, in-line controls, 4-mode RGB prismatic lighting, and a single 3.5mm headset jack for multiplatform compatibility with PC, Mac, Nintendo Switch, Xbox, and PlayStation.
