ENDURO™ 2 Ultraperformance Multisport GPS Watch
PRODUCT OVERVIEW:

Run to the ends of the earth with the Enduro 2 ultraperformance multisport GPS watch. Solar power provides battery life of up to 150 hours in GPS mode[1] to help you outlast your next ultrarace. SatIQ™ technology dynamically changes the GPS setting to maximize battery without compromising accuracy. The rugged, lightweight design won't slow you down, and the light UltraFit band offers a secure, comfortable fit during all your activities. TopoActive and ski maps will help you find your way, while a variety of built-in sports apps as well as endurance, stamina and other performance metrics will help take your training to the next level. And use traditional button controls or the new touchscreen interface to access selections. Enduro 2 includes an Adventure Racing World Series-approved adventure racing app. Plus, its advanced features, including NextFork™ map guide, grade-adjusted pace and automatic rest timer for ultraruns, help you prepare to go the distance. A superbright LED flashlight (twice as bright as the fēnix® 7X multisport GPS watch) even guides you in the dark.

Enduro 2

GARMIN®

ENDURO™ 2 Ultraperformance Multisport GPS Watch

KEY FEATURES:

	Feature	Description
IMPROVED	**SOLAR CHARGED BATTERY**	Get up to 46 days of battery life in smartwatch mode[2] for an uninterrupted picture of your health and fitness — and up to 150 hours in GPS mode[1] to get the most out of your training and races.
NEW	**BUILT FOR EXTREMES**	The rugged, sophisticated and lightweight design features a large 1.4" solar-charged display and 51-mm case with sapphire lens and titanium bezel and rear case. The UltraFit band provides long-distance comfort – even in punishing conditions.
NEW	**TOUCHSCREEN AND BUTTONS**	Traditional button controls that work in any environment are matched with a responsive new touchscreen interface for quick access to selections and functions.
	TRAIL RUN VO2 MAX	Trail run VO2 max estimates the cardiovascular fitness level of trail runners by adjusting based on the varying trail and terrain conditions that can affect run performance.
	ULTRARUN ACTIVITY	Use the ultrarun activity with rest timer, and log the time you spend at aid stations.
	ADVENTURE RACING APP	This activity profile allows you to see heart rate, elevation, segment times and other metrics when the race is on. It records GPS in this mode but is unavailable for viewing, in keeping with adventure race rules. A summary screen even helps verify your finish time with the race committee.
	CLIMBPRO FEATURE	Use the ClimbPro ascent planner on downloaded courses to see real-time information on your current and upcoming climbs, including gradient, distance and elevation gain — as well as descents and flats.
	PACEPRO™ TECHNOLOGY	A first-of-its-kind PacePro feature helps keep you on pace with grade-adjusted guidance as you run a course.
NEW	**GRADE-ADJUSTED PACE**	Understand how to adjust your pace over varying terrain to perform according to your plan.
NEW	**VISUAL RACE PREDICTOR**	Based on your running history and overall fitness level, this feature provides an estimate of what your pace could be for the distance you want to run. Trend data shows how your training is having an impact over time so you can close in on that next PR.
	HEAT AND ALTITUDE ACCLIMATION	Prepare yourself for any environment. When paired with your compatible smartphone, see how your body is holding up in different environments with heat and altitude acclimation.
	PERFORMANCE METRICS	View advanced training metrics that include running dynamics, heat- and altitude-adjusted VO2 max, trail running adjustment, recovery advisor and more.
NEW	**AUTOMATIC REST TIMER**	During an ultrarun activity your watch automatically keeps track of time spent at an aid station or checkpoint — so you don't need to worry about pausing your run.
	BUILT-IN SPORTS APPS	Use preloaded activity profiles for trail running, swimming, running, biking, hiking, rowing, skiing, golfing, surfing, indoor climbing and more.
	RECOVERY TIME ADVISOR	After each workout, recovery time lets you know when you'll be ready for another hard workout. It even accounts for training intensity and factors such as stress, daily activity and sleep.
	DAILY WORKOUT SUGGESTIONS	For training guidance that takes you and your fitness level into account, get daily run and ride recommendations based on your current training load and training status.
	BACKCOUNTRY SKI	Stay informed when you're in the snow. This preloaded profile helps distinguish between skiing and climbing. It shows metrics specific to either ascent or descent.
	XC SKI DYNAMICS	When paired with the HRM-Pro™ Plus chest strap (sold separately), the ski power metric helps measure the actual exercise load of your cross-country workouts.
	SURF-READY FEATURES	Get ready to catch some waves. This watch works with the Surfline Sessions™ feature, which creates a video of every wave you ride in front of a Surfline® camera[3]. So you can watch them later and see how you did with your Surfline Sessions subscription.
	MTB DYNAMICS	Track the details of every ride with mountain biking metrics plus specialized Grit™ and Flow™ measurements that rate trail difficulty and how smoothly you descend, giving you a score to beat next time.
NEW	**SUPERBRIGHT FLASHLIGHT**	To help guide your way in low-light conditions, a built-in superbright multi-LED flashlight (twice as bright as the fēnix® 7X multisport GPS watch) provides quick access to a bright, steady beam in either red or white light.
NEW	**MULTI-BAND GNSS WITH SATIQ™ TECHNOLOGY**	Multi-band GNSS with SatIQ technology ensures the best positioning accuracy in any environment while also optimizing the device's battery life.

**GARMIN**®

ENDURO™ 2 Ultraperformance Multisport GPS Watch

KEY FEATURES:

NEW	**NEXTFORK™ MAP GUIDE**	See the distance to the next trail intersection as well as the name of the upcoming trail so you can keep your bearings and stay on track.
NEW	**UP AHEAD**	Get at-a-glance awareness for selected points of interest checkpoints ahead. View performance metrics, split times and distance/elevation — plus a summary of key trail points coming up.
	ABC SENSORS	Navigate your next trail with ABC sensors, including an altimeter for elevation data, barometer to monitor weather and 3-axis electronic compass.
NEW	**SKIVIEW™ MAPS**	Take on the slopes with preloaded SkiView maps, and view run names and difficulty ratings for more than 2,000 ski resorts worldwide.
NEW	**MULTICONTINENT TOPO MAPS**	Preloaded TopoActive maps from around the world keep your explorations on track. Use built-in Wi-Fi® connectivity to easily load and update maps and software without using a computer.
	WRIST-BASED HEART RATE	Optical heart rate technology[4] gauges activity intensity as well as heart rate variability to calculate your stress level. It also tracks underwater without a heart rate strap.
	PULSE OX SENSOR	For altitude acclimation or sleep monitoring, a Pulse Ox sensor[5] uses light beams at your wrist to gauge how well your body is absorbing oxygen.
NEW	**HEALTH SNAPSHOT™ FEATURE**	See how your health is changing over time by logging 2-minute sessions which record key stats, including heart rate, heart rate variability, Pulse Ox, respiration and stress. Then generate a report with those stats to share via the Garmin Connect™ app on your compatible smartphone.
	BODY BATTERY™ ENERGY MONITORING	Optimize your body's energy reserves, using heart rate variability, stress, sleep and other data to gauge when you're ready to be active or when you may need to rest.
	SLEEP SCORE AND ADVANCED SLEEP MONITORING	Get a full breakdown of your light, deep and REM sleep stages. View it all on a dedicated widget that includes your sleep score and insights.
	RESPIRATION TRACKING	See how you're breathing throughout the day, during sleep and during breathwork and yoga activities.
	HYDRATION TRACKING	Log daily fluid intake as a reminder to stay hydrated. When auto goal is enabled, you'll even see estimated sweat loss after an activity, and your goal will adjust accordingly.
	SMART NOTIFICATIONS	Receive emails, texts and alerts right on your watch when paired with your compatible device.
NEW	**MUSIC APPS**	Download songs plus playlists from your Spotify, Deezer or Amazon Music accounts (subscription may be required) so you can listen to music on the go. Use wireless headphones (not included) for phone-free listening.
	GARMIN PAY™ CONTACTLESS PAYMENTS	Breeze through checkout lines with Garmin Pay contactless payment solution through participating providers.
	SAFETY AND TRACKING FEATURES	When your watch and phone are paired, a message with your location can be sent to your contacts manually or — during select outdoor activities — automatically with built-in incident detection[6].
	CONNECT IQ™ STORE	Download custom watch faces, add data fields and get apps and widgets from the Connect IQ Store on your compatible smartphone.
NEW	**HIIT WORKOUTS**	This activity profile tracks your high-intensity interval training workouts, including AMRAP, EMOM, Tabata and custom. Set the number of rounds, work/rest intervals and more.
NEW	**TURN-BY-TURN NAVIGATION**	Follow a route or course with help from turn-by-turn directions, which let you know ahead of time when the next turn is coming.
	POWER MANAGER	View how various settings and sensors impact your watch's battery life, so you can make battery-extending changes on the fly.
