Specificataions

Technical Parameters				
NO	Name	Parameter Description		
1	USB	Type-C/ 5V2A		
2	Fingerprints max	20		
3	Low power warning	4.8V±0.2		
4	Voltage range	4.5~6.5V		
5	Stand-by current	<90uA		
6	Working current	<250mA		
7	Unlock time	≈1.5 sec		
8	Range of working Temperature	-10~55°C		

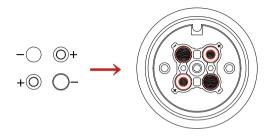

Packing List					
Name	PCS	Name	PCS		
Exterior knob	1	Strike box	1		
Screw B	2	Manual	1		
Interior knob	1	Screw A	4		
Key	2	Latch	1		
Data line	1	White box	1		
Pin	1	Strike plate	1		

How To Use

Installation Method

- Install the three-bar lock body (pay attention to the direction of the oblique tongue and the direction of opening the door). See Figure Step ①; unscrew the fixing screws of the lock body, as shown in Figure Step ②.
- Install the front panel as shown in step ③, and then insert the square iron and the pair of pull studs into the corresponding holes of the three-bar lock body.
- 3. Install the rear panel as shown in step ④. After removing the rear panel lock from the box, use a screwdriver to unscrew the battery cover screws as shown in step 8. After the front and rear wirings are connected, install the rear panel. Pay attention to: The UP↑ faces upwards. After adjusting the rear panel, tighten the pair of pull.
- 4. Installation method of 7# alkaline battery: install the battery (note: pay attention to the direction of the positive and negative electrodes when installing the battery), as shown in the figure below;

5. Install the battery cover as shown in step ①;

Add Bluetooth to APP (GEEK SMART)

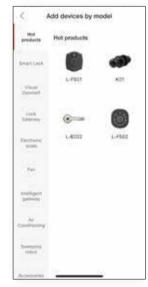

- 1. App Download Instructions
- A. Scan the OR code to the right you can use **Android** and **iOS** to download the APP.
- B. **Android** version software can be downloaded in the Google Play store. Search "**GeekSmart**".

- C. **iOS** version of the software can be downloaded in the iPhone App Store. Search **"GeekSmart"**.
- 2. Register and log in with your mobile phone number.

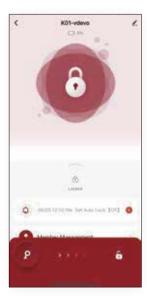

3. Press the "+" to add a device, find "Smart lock " and record "K01", click and follow the prompts to complete the device addition and use. (Note: Touching the fingerprint head on the APP and the lock link is faster to wake up the Bluetooth. After the adding Bluetooth, the lock will exit experience mode).

4. Add administrator fingerprint (to operate on the lock side)

Member management → Members → click "+" → fill in name and other data →
Role setting choose "Administrator" → back to Members interface → click the
account you just create → click (add) → (operate according to the prompt
displayed on the mobile phone), after the addition is successful, the fingerprint
can be unlocked.

NOTE: ONLY the first BLE conneted mobile phone can be the priority Admin, who have the authority to manage the lock, including adding or deleting the fingerprint, BLE unlock; any other users or admins don't have the authority to manage the lock, BLE unlock or remote control.

5. Add ordinary user fingerprint (operate on the lock side)

Member management →Members → click "+" →fill in name and other data

→Role setting choose "Common Member" →back to Members interface →
click the account you just create → click (Add) → (operate according to the
prompt displayed on the mobile phone), after the addition is successful, the
fingerprint can be unlocked.

6. Delete fingerprint (operate on the lock side)

Member management \rightarrow click (fingerprint icon) of XXXX \rightarrow click (fingerprint to be deleted) \rightarrow (operate according to the prompt displayed on the mobile phone), after the deletion is successful, the fingerprint cannot be unlocked.

Note: The lock end should retain an administrator fingerprint.

7.1 Remote unlocking

Settings→Remote unlock click (Open icon). Note: The gateway can only be unlocked remotely.

7.2 Auto lock(Passage mode enable/disable)

- ① How to enable the passage mode?
 - APP Settings→Auto-lock (icon is off),or you can short press the SET BUTTON on the back knob, please at once unlock by fingerprint or APP, the lock will be always in unlock mode (Passage mode is on).

FCC Warning

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- -Reorient or relocate the receiving antenna.
- -Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
