

CLEARSTREAM 4MAX™ COMPLETE

ULTRA LONG-RANGE AMPLIFIED INDOOR/OUTDOOR HDTV ANTENNA

Designed and engineered in the USA using patented technology to receive TV signals **70 miles** away from broadcast towers. Ideal for suburban and rural areas.

Dedicated UHF and Hi-VHF multi-directional elements deliver range and reception even if your TV towers are spread out.

Features quick-connect assembly for easy, convenient installation and durable, lightweight, premium materials for maximum performance

Whole-Home Ready – Everything you need to split this powerful antenna's signal to 3 different TVs in your home. Includes 3-way splitter, 30 ft. of our premium coaxial cable, a 20-inch mast with pivoting base, all-weather adjustable mounting hardware, and the Jolt Switch In-Line Amplifier gives you control when TV signals need a boost.

Proven Performance and Reliability

The Proof Is in the Loop. As perfectionists and antenna enthusiasts, innovation and quality are two of our highest priorities. This is why both our patented loop elements and lifetime warranty are unique in the industry and make us cord-cutters' favorite brand. Networks like ABC, CBS, NBC, FOX, PBS, Univision, and more broadcast in Full HD 1080, UHD 4K, 8K, and NEXTGEN TV where available, because OTA signals aren't subject to compression like cable and satellite. ClearStream TV antennas are specifically engineered to receive the frequencies broadcast in North America and truly provide the best, most consistent reception of over-the-air TV signals **straight from the source.**

Better Boost, Better Signals

The new and improved Jolt Switch features a simple ON/OFF switch to bypass amplification when a TV channel doesn't need it. When it's ON, TV signals are increased for clearer picture and sound, sometimes receiving channels beyond your antenna's standard range. When it's OFF, amplification is bypassed while TV signals are still filtered from FM and cellular interference.

Whole-Home Ready

The ClearStream 4MAX Complete HDTV antenna delivers crystal-clear TV reception in HD right out of the box thanks to quick-connect assembly design. Engineered to enhance UHF and Hi-VHF signal reception for the highest number of over-the-air channels available in your area. Multi-directional elements receive signals from the front and back, so you receive a greater range of frequencies. Ideal for suburban and rural areas where heavy foliage or roofing materials between your antenna and the towers can interfere with reception. No need to shop around, we've done the work for you. This antenna is the ideal solution for cord-cutters and comes with everything you'll need:

- Jolt Switch in-line amplifier offers the best signal reception in real time for channels that need amplification.
- Premium 3-way splitter reliably distributes signal to three different TVs.
- 30 ft. of high-performance coaxial cable designed with a high-capacity center conductor and molded F-connectors over a large, insulated dielectric to ensure the best picture and sound.
- 20-inch mast with pivoting base for installation on horizontal and vertical surfaces and all-weather adjustable mounting hardware made with premium materials.

Bring Free TV to All Your Screens. Homes already wired for satellite or cable service have the coaxial cable needed to send your antenna's signal to multiple screens, all you have to do is connect your ClearStream antenna and you've got FREE TV throughout the house!

The ClearStream 4MAX™ COMPLETE comes with:

- ClearStream 4MAX Complete Antenna
- 3-Way Splitter with Mounting Screws & Grounding Lug
- 30 ft. Detachable High-Performance Coaxial Cable
- Jolt Switch 18dB In-Line Amplifier with Coaxial Cable and 6 ft. USB Cable
- 20-inch Mast with Base
- Adjustable Mast Clamp
- All-Weather Mounting Hardware
- Assembly and Installation Instructions

70+ MILES
