

Welcome To the Cerwin Vega Pro/Home brand of products

We are proud to present

VEGA MONITORS

For the past 24 months we have been working diligently engineering and refining our high-tech VEGA monitors to get them exactly where we want them with a major emphasis on high technology low latency wireless connectivity.

Prominent Features:

- An incredibly versatile powered nearfield studio monitors, great for any style of music.
- Great full range DSP active wireless speakers:
 - Home Desktop users can connect wirelessly using Bluetooth or by our low latency SKAA technology. If you want to connect multiple speakers in different rooms so they all play the same music you can using our embedded SKAA technology.
 - Professionals who would like to mix music in real time can now do so due to our embedded SKAA technology.
 - Typical connection distances: Bluetooth 5M+, SKAA mode 30M+ depending upon line of sight. Both Bluetooth and SKAA Signals can easily penetrate walls, floors and ceiling's depending upon the types of materials used it its initial construction.

Note: Metal mesh inside of walls, floors or ceilings will degrade the signals.

- Active 2-way (VEGA4S, VEGA6S & VEGA8S) - Custom bi-amped, class “D” amplifier offering large headroom and low noise amplification.
- Active 3-way (VEGA10S) - Custom Tri-amped, class “D” amplifier offering large headroom and low noise amplification.
- System-optimized auto-limiter prevents unexpected peaks from damaging the speakers while offering consistency and clarity at high volumes.
- Soft-dome tweeter with optimized waveguide provides smooth, pristine and articulate highs up to 35kHz.
- Lightweight, glass-aramid composite woofers deliver clear midrange and tight bass.
- Flat Low Frequency Adjustment adding versatility and improved accuracy for mixes that translate in different environments.
- Superior low-end extension with optional setting of +2dB Bass Boost acclaimed by music creators worldwide.
- High- and low-frequency controls let you contour your sound to your environment and preference.
- Cabinet bottom isolated from surfaces using a factory installed foam pad for improved clarity.
- Front-slotted bass port and resonant-free cabinet increases sonic clarity.
- Multiple audio connection inputs: XLR / TRS & 1/4", RCA for universal connectivity in any studio environment.
- Wireless Connectivity:
 - Built in Bluetooth.
 - Built in SKAA low latency (19ms) technology.
- AC Power Input: operates automatically from 110VAC to 240VAC (just change the power cord to match your country type).

Note:

When you purchase our VEGA monitors (these are pair packed) you will be buying them as a pair.

- A Monitor Pair Pack contains Qty (1) SKAA Hub Monitor and Qty (1) SKAA Satellite Monitor.
- Additional SKAA HUB and Satellite Monitors can be purchased singularly sold separately to add more speakers to your sound system.

Engineered in the USA by Cerwin Vega with over 50 years of innovation.
