

Max Power Relief TENS Unit

OMRON Max Power Relief offers two times more power than the OMRON Pocket Pain Pro (PM400), which makes it one of our most versatile TENS units for drug-free chronic and acute pain relief.

Customized control – Six body pain modes (shoulder, lower back, arm, foot, leg, joint) and three massage-like modes (rub, tap, knead), each with 15 adjustable levels of power intensity

TENS technology – Scientific theory suggests that TENS technology blocks pain signals from reaching the brain, increases blood circulation to targeted areas and stimulates your body's natural painkillers

Long Life Pads – Includes comfortable, self-adhesive Long Life Pads (1 pair) that are reusable up to 150 times, with plastic holder for storage

Convenient – User-friendly controls and a large display screen make for easy operation

Portable – Compact design makes it easy to fit into your purse, carry-on, or briefcase for on-the-go pain relief
